Indigenous Food Sovereignty in the United States - Devon A. Mihesuah 2019-08-02

Centuries of colonization and other factors have disrupted indigenous communities' ability to control their own food systems. This volume explores the meaning and importance of food sovereignty for Native peoples in the United States, and asks whether and how it might be achieved and sustained. Unprecedented in its focus and scope, this collection addresses nearly every aspect of indigenous food sovereignty, from revitalizing ancestral gardens and traditional ways of hunting, gathering, and seed saving to the difficult realities of racism, treaty abrogation, tribal sociopolitical factionalism, and the entrenched beliefs that processed foods are superior to

traditional tribal fare. The contributors include scholar-activists in the fields of ethnobotany, history, anthropology, nutrition, insect ecology, biology, marine environmentalism, and federal Indian law, as well as indigenous seed savers and keepers, cooks, farmers, spearfishers, and community activists. After identifying the challenges involved in revitalizing and maintaining traditional food systems, these writers offer advice and encouragement to those concerned about tribal health, environmental destruction, loss of species habitat, and governmental food control.

**The History and Geography of Human Genes** - Luigi Luca

Cavalli-Sforza 2018-06-05

Hailed as a breakthrough in the understanding of human evolution, *The History and Geography of Human Genes* offers the first full-scale reconstruction of where human populations originated and the paths by which they spread throughout the world. By mapping the worldwide geographic distribution of genes for over 110 traits in over 1800 primarily aboriginal populations, the authors charted migrations and devised a clock by which to date evolutionary history. This monumental work is now available in a more affordable paperback edition without the myriad illustrations and maps, but containing the full text and partial appendices of the authors' pathbreaking endeavor.

on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover:

- How you can get your dog to come when called by acting less like a primate and more like a dog
- Why the advice to “get dominance” over your dog can cause problems
- Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of

mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

**Inner City Romance** - Guy Colwell 2015-02-22

Guy Colwell’s 1970s underground comic book series *Inner City Romance* tread new territory: it was filled with stories about prison, black culture, ghetto life, the sex trade, and radical activism. It portrayed the unpleasant realities of life in the inner city, where opportunities were limited and being on the lowest end of the economic ladder meant that one’s vision of the American dream was more about survival than lifestyle choices. Every issue of *Inner City Romance* is included in this collection, as well as many of the highly detailed paintings

### **Returns** - James Clifford

2013-11-04

Returns explores homecomings--the ways people recover and renew their roots. Engaging with indigenous histories of survival and transformation, James Clifford opens fundamental questions about where we are going, separately and together, in a globalizing, but not homogenizing, world. It was once widely assumed that tribal societies were destined to disappear. Sooner or later, irresistible economic and political forces would complete the destruction begun by culture contact and colonialism. But aboriginal groups persist, a reality that complicates familiar narratives of modernization. History is a multidirectional process where the word "indigenous," long associated with primitivism and

localism, takes on unexpected meanings. In these probing essays, native people in California, Alaska, and Oceania are shown to be agents, not victims, struggling within and against dominant forms of cultural identity and economic power. Their returns to the land, performances of heritage, and diasporic ties are strategies for moving forward, ways to articulate what can paradoxically be called "traditional futures." With inventiveness and pragmatism, often against the odds, indigenous people are forging original pathways in a tangled, open-ended modernity. Third in a series that includes *The Predicament of Culture and Routes*, this volume continues Clifford's signature exploration of intercultural representations, travels, and now returns.

**Of Plants and People** - Charles Bixler Heiser 1992

What are the origins of agriculture? How did people learn to domesticate plants? How did they come to improve some? How did they learn special techniques for processing certain plants for

food? In these highly personal and informal essays-old-fashioned botany, the author calls them-noted botanist Charles Heiser investigates those and other questions raised by the interactions of plants and people. His purpose is to try to find the origins of some of our domesticated plants and to consider other plants that might someday contribute to our food resources. In *Of Plants and People*, Heiser examines the origins of pumpkins, squashes, and other cucurbits. In *The Totora and Thor*, he digresses from food plants to trace the spread of the totora reed from South America to Pacific islands. *Little Oranges of Quito* is about the domestication of a wild plant, the naranjilla, that is going on today. *Chenopods: From Weeds to the Halls of Montezuma* concerns the uses of the Andean quinoa and its relatives, and *Sangorache and the Day of the Dead*, *A Trip to Tulcán*, and *Chochos and Other Lupines* all examine Latin-American domestic plants that could contribute to our own

foods. Green 'Tomatoes' and Purple 'Cucumbers, the tomato and the pepino, respectively, describes two other crops that have received scant notice in the United States. The subject of "How Many Kinds of Peppers Are There?" is the genus Capsicum, with its sweet green and hot red peppers and all their related species and varieties. Heiser again writes about nonfood plants in the essay "Peperomias," but in the next chapter, "Sumpweed," he discusses a plant that was once used for food but that has been neglected in favor of others. And in "A Plague of Locusts" the author compares the honey locust tree with a close relative to try to determine what gives particular plants advantages in certain environments. In his final essay, Seeds, Sex, and Sacrifice, Heiser relates myth, anthropological evidence, and botanical findings to review the connection between religion and the origin of agriculture. The audience for this book will include botanists, horticulturists, anthropologists, and any reader interested in

the interrelationships between plants and people.

**Biography of a Mexican Crucifix** - Jennifer Scheper Hughes 2010

In 1543, in a small village in Mexico, a group of missionary friars received from a mysterious Indian messenger an unusual carved image of Christ crucified. The friars declared it the most poignantly beautiful depiction of Christ's suffering they had ever seen. Known as the Cristo Aparecido (the "Christ Appeared"), it quickly became one of the most celebrated religious images in

colonial Mexico. Today, the Cristo Aparecido is among the oldest New World crucifixes and is the beloved patron saint of the Indians of Totolapan. In *Biography of a Mexican Crucifix*, Jennifer Scheper Hughes traces popular devotion to the Cristo Aparecido over five centuries of Mexican history. Each chapter investigates a single incident in the encounter between believers and the image. Through these historical vignettes, Hughes explores and reinterprets the conquest of and mission to the Indians; the birth of an indigenous, syncretic Christianity; the violent processes of independence and nationalization; and the utopian vision of liberation theology. Hughes reads all of these through the popular devotion to a crucifix that over the centuries becomes a key protagonist in shaping local history and social identity. This book will be welcomed by scholars and students of religion, Latin American history, anthropology, and

theology.

**Arctic Human Development Report** - Joan Nymand Larsen 2015-02-18

The goals of the second volume of the AHDR - Arctic Human Development Report: Regional Processes and Global Linkages - are to provide an update to the first AHDR (2004) in terms of an assessment of the state of Arctic human development; to highlight the major trends and changes unfolding related to the various issues and thematic areas of human development in the Arctic over the past decade; and, based on this assessment, to identify policy relevant conclusions and key gaps in knowledge, new and emerging Arctic success stories. The production of AHDR-II on the tenth anniversary of the first AHDR makes it possible to move beyond the baseline

assessment to make valuable comparisons and contrasts across a decade of persistent and rapid change in the North. It addresses critical issues and emerging challenges in Arctic living conditions, quality of life in the North, global change impacts and adaptation, and Indigenous livelihoods. The assessment contributes to our understanding of the interplay and consequences of physical and social change processes affecting Arctic residents' quality of life, at both the regional and global scales. It shows that the Arctic is not a homogenous region. Impacts of globalization and environmental change differ within and between regions, between Indigenous and non-Indigenous northerners, between genders and along other axes.

**Of Corpse** - Peter Narvaez  
2003-07

Laughter, contemporary theory suggests, is often aggressive in some manner and may be prompted by a sudden perception of incongruity combined with memories of past emotional experience. Given this importance of the past to our recognition of the comic, it follows that some "traditions" dispose us to ludic responses. The studies in *Of Corpse: Death and Humor in Folklore and Popular Culture* examine specific interactions of text (jokes, poetry, epitaphs, iconography, film drama) and social context (wakes, festivals, disasters) that shape and generate laughter. Uniquely, however, the essays here peruse a remarkable paradox---the convergence of death and humor.

[The Years of Alienation in Italy](#)  
- Alessandra Diazzi 2019-06-11  
*The Years of Alienation in Italy* offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.
