Victimology - William G. Doerner 2020-12-29
This book covers the scope of crime victims' suffering in the U.S., offering a history of victims and the measurement of victimization, an explanation of the victim's role in the criminal justice process, and a recounting of the issues crime victims face as a result of crime and the criminal justice process. Doerner and Lab, both well-regarded scholars, write compellingly about how the current criminal's justice system can be transformed into a victim's justice system. Theory is woven together with the description of each topic, and specific examples illustrate each point. The book goes on to address the full impact of victimization, and a final section details specific types of victimization, ranging from violent crimes, including child and elder abuse, to property crime, to crime in the school and in the workplace. The authors explain how obstacles hinder the pursuit of justice, and provide significant policy and programming suggestions to render the system more victim-friendly. Appropriate for undergraduate as well as early graduate students in Victimology courses in Criminology, Criminal Justice, Sociology, and Justice Studies programs, this book offers rich pedagogical features and online student resources as well as test bank, PowerPoint lecture slides, and sample syllabus for instructors.

The Wiley-Interscience Paperback Series consists of selected books that have been made more accessible to consumers in an effort to increase global appeal and general circulation. With these new unabridged softcover volumes,

Wiley hopes to extend the lives of these works by making them available to future generations of statisticians, mathematicians, and scientists. "Many examples drawn from the author's experience of engineering applications are used to illustrate the theoretical results, which are presented in a cookbook fashion...it provides an excellent practical guide to the analysis of product-life data." -T.M.M. Farley Special Programme of Research in Human Reproduction World Health Organization Geneva, Switzerland Review in Biometrics, September 1983 Now a classic, Applied Life Data Analysis has been widely used by thousands of engineers and industrial statisticians to obtain information from life data on consumer, industrial, and military products. Organized to serve practitioners, this book starts with basic models and simple informative probability plots of life data. Then it progresses through advanced analytical methods, including maximum likelihood fitting of advanced models to life data. All data analysis methods are illustrated with numerous clients' applications from the author's consulting experience.

Research Designs and Methods in Psychiatry - Maurizio Fava 1992

This important contribution to psychiatric literature, coming from a group of investigators who have developed a successful clinical research unit over the last decade, has the immediacy, clarity, and practicality expected from those who have personally wrestled with the difficult issues of design and data analysis. In addition, it draws upon a number of pioneers who have devised methods now used broadly in treatment research in psychiatry. This amalgam presents a very informative, down to earth and

readable methods book, that should become the standard text in this growing field of investigation. The volume is divided into four sections: general issues, epidemiology, clinical studies, and psychopharmacology. The material offered in the book serves both as a review for clinical researchers and as a guide to clinicians to facilitate exploration in the fields of psychopathology and treatment. The path from clinical empiricism to scientific process ultimately leads to increased professional gratification and enhanced patient care.

No Nails, No Lumber - Jeffrey Head 2011-12-28

Imagine a house constructed in less than forty-eight hours, without using lumber or nails, that is more resistant to fire, earthquakes, and hurricanes than any traditionally built structure. This may sound like the latest development in prefab housing or green architecture, but the design dates back to 1941 when architect Wallace Neff (1895-1982) developed Airform construction as a solution to the global housing crisis. Best known for his elegant Spanish Colonial revival estates in Southern California, Neff had a private passion for his dome-shaped "bubble houses" made of reinforced concrete cast in position over an inflatable balloon. No

Nails, No Lumber shows the beauty and versatility of Neff's design in new and vintage photography, previously unpublished illustrations, and archival material and ephemera.

The Oxford Handbook of Auditory Science: Hearing - David R. Moore 2010

Volume 1: The Ear (edited by Paul Fuchs)

Volume 2: The Auditory Brain (edited by Alan Palmer and Adrian Rees)

Volume 3: Hearing (edited by Chris Plack) Auditory science is one of the fastest growing areas of biomedical research. There are now around 10,000 researchers in auditory science, and ten times that number working in allied professions. This growth is attributable to several major developments: Research on the inner ear has shown that elaborate systems of mechanical, transduction and neural processes serve to improve sensitivity, sharpen frequency tuning, and modulate response of the ear to sound. Most recently, the molecular machinery underlying these phenomena has been explored and described in detail. The development, maintenance, and repair of the ear are also subjects of contemporary interest at the molecular level, as is the genetics of hearing disorders due to cochlear malfunctions.

Self-Tracking - Gina Neff 2016-06-24
What happens when people turn their everyday experience into data: an introduction to the essential ideas and key challenges of self-tracking. People keep track. In the eighteenth century, Benjamin Franklin kept charts of time spent and virtues lived up to. Today, people use technology to self-track: hours slept, steps taken, calories consumed, medications administered. Ninety million wearable sensors were shipped in 2014 to help us gather data about our lives. This book examines how people record, analyze, and reflect on this data, looking at the tools they use and the communities they become part of. Gina Neff and Dawn Nafus describe what happens when people turn their everyday experience—in particular, health and wellness-related experience—into data, and offer an introduction to the essential ideas and key challenges of using these technologies. They consider self-tracking as a social and cultural phenomenon, describing not only the use of data as a kind of mirror of the self but also how this enables people to connect to, and learn from, others. Neff and Nafus consider what's at stake:

who wants our data and why; the practices of serious self-tracking enthusiasts; the design of commercial self-tracking technology; and how self-tracking can fill gaps in the healthcare system. Today, no one can lead an entirely untracked life. Neff and Nafus show us how to use data in a way that empowers and educates. *The Developing Human Brain* - F. H. Gilles
2013-10-22

The Developing Human Brain: Growth and Epidemiologic Neuropathology presents the analyses that study the conditions and events of pregnancy, labor, and delivery as they relate to neuropathological outcomes. This book reviews the weaknesses and strengths of epidemiologic methods applied to autopsy populations and provide the details of the neuropathologic sample. Organized into three sections encompassing 27 chapters, this book begins with an overview of the hypotheses about the relationships between potential antecedents and morphologic events that can subsequently be tested in the living child using specific measure of cerebral or neurologic function. This text then examines the general principles of epidemiology. Other chapters consider the advantages and disadvantages of using autopsy data for epidemiologic studies. This book discusses as well the statistical and descriptive methods used to provide a panoramic view of the developing human brain based on infants aborted at different stages of development. The final chapter deals with anatomical changes at the final months of the second trimester. This book is a valuable resource for neuropathologists, neurologists, and pathologists.

Adolescence and Beyond - Patricia K. Kerig 2011-12-28

While the period of transition from adolescence to adulthood has become a recent focus for developmental psychologists and child mental health practitioners, the full role of the family during this period is only beginning to be explored. Many compelling questions, of interest to anyone involved in adolescence research, remain unanswered. To what extent do family experiences influence the way one navigates through emerging adulthood? How do we begin to understand the interplay between adolescents' contexts and their development and well-being? *Adolescence and Beyond: Family Processes and Development* offers an accessible synthesis of research, theories, and perspectives on the family processes that contribute to development. Chapters from expert researchers cover a wide variety of topics surrounding the link between family processes and individual development, including adolescent romantic relationships, emotion regulation, resilience in contexts of risk, and socio-cultural and ethnic influences on development. Drawing on diverse research and methodological approaches that include direct family observations, interviews, and narrative analyses, this volume presents cutting-edge conceptual and empirical work on the key developmental tasks and challenges in the transition between adolescence and adulthood. Researchers, practitioners, and students in social, developmental, and clinical psychology--as well as those in social work, psychiatry, and pediatrics--will find this book an invaluable summary of important research on

the link between family process and individual development.

Fierce Self-Compassion - Dr. Kristin Neff 2021-06-15

The author of *Self-Compassion* follows up her groundbreaking book with new ideas that expand our notion of self-kindness and its capacity to transform our lives, showing women how to balance tender self-acceptance with fierce action to claim their power and change the world. Kristin Neff changed how we talk about self-care with her enormously popular first book, *Self-Compassion*. Now, ten years and many studies later, she expands her body of work to explore a brand-new take on self-compassion. Although kindness and self-acceptance allow us to be with ourselves as we are, in all our glorious imperfection, the desire to alleviate suffering at the heart of this mindset isn't always gentle, sometimes it's fierce. We must also act courageously in order to protect ourselves from harm and injustice, say no to others so we can meet our own needs, and motivate necessary change in ourselves and society. Gender roles demand that women be soft and nurturing, not angry or powerful. But like yin and yang, the energies of fierce and

tender self-compassion must be balanced for wholeness and wellbeing. Drawing on a wealth of research, her personal life story and empirically supported practices, Neff demonstrates how women can use fierce and tender self-compassion to succeed in the workplace, engage in caregiving without burning out, be authentic in relationships, and end the silence around sexual harassment and abuse. Most women intuitively recognize fierceness as part of their true nature, but have been discouraged from developing it. Women must reclaim their power in order to create a healthier society and find lasting happiness. In this wise, caring, and enlightening book, Neff shows women how to reclaim balance within themselves, so they can help restore balance in the world.

As of this writing, the TS7700C supports the ability to off load to IBM Cloud® Object Storage, Amazon S3, and RSTOR. This publication explains features and concepts that are specific to the IBM TS7700 as of release R5.2. The R5.2 microcode level provides IBM TS7700 Cloud Storage Tier enhancements, IBM DS8000® Object Storage enhancements, Management Interface dual control security, and other smaller enhancements. The R5.2 microcode level can be installed on the IBM TS7770 and IBM TS7760 models only. Note: The latest Release 5.2 was split into two phases: R5.2 Phase 1 (also referred to as and) R5.2 Phase 2 (and R) TS7700 provides tape virtualization for the IBM z environment. Off loading to physical tape behind a TS7700 is used by hundreds of organizations around the world. Tape virtualization can help satisfy the following requirements in a data processing environment. New and existing capabilities of the TS7700 5.2.2 release includes the following highlights: Eight-way Grid Cloud, which consists of up to three generations of TS7700 Synchronous and asynchronous replication of virtual tape and TCT objects Grid access to all logical volume and object data that is independent of where it exists An all-flash TS7770 option for improved performance Full Advanced Object Store Grid Cloud support of DS8000 Transparent Cloud Tier Full AES256 encryption for data that is in-flight and at-rest Tight integration with IBM Z® and DFSMS policy management DS8000 Object Store AES256 in-flight encryption and compression Regulatory compliance through Logical WORM and LWORM Retention support Cloud Storage Tier support for archive, logical volume version, and disaster recovery Optional integration with physical tape 16 Gb IBM FICON® throughput that exceeds 5 GBps per TS7700 cluster Grid Resiliency Support with Control Unit Initiated Reconfiguration (CUIR) support IBM Z hosts view up to 3,968 common devices per TS7700 grid TS7770 Cache On-demand feature that is based capacity licensing TS7770 support of SSD within the VED server The TS7700T writes data by policy to physical

tape through attachment to high-capacity, high-performance IBM TS1160, IBM TS1150, and IBM TS1140 tape drives that are installed in an IBM TS4500 or TS3500 tape library. The TS7770 models are based on high-performance and redundant IBM POWER9™ technology. They provide improved performance for most IBM Z tape workloads when compared to the previous generations of IBM TS7700.

[Handbook of Cultural Factors in Behavioral Health](#) - Lorraine T. Benuto 2020-02-08

Having the knowledge and capacity to deliver therapy to a diverse population is recognized as benefiting client-therapist relationships and producing positive clinical outcomes. In fact, the APA requires that psychologists be aware of and respect the cultural characteristics of their clients which includes psychologists being aware of any biases and prejudice they may hold. Being aware of cultural characteristics, which include age, gender, ethnicity, race, religion and other cultural factors, is important. In the United States, minority ethnic groups are growing substantially, with 28% of the U.S. population identifying as races other than white (U.S. Census, 2016). Additionally, approximately 65 million people in America speak a foreign language that is not English, with over 25 million people having limited English language

proficiency. With a diverse pool of clients, helping professionals should be better prepared to work with diverse clients. This handbook offers clinicians a comprehensive resource with which to work with diverse populations. The myriad discussions among the chapters include: Ethical guidelines for working with culturally diverse clients Cultural considerations in psychological assessment and evaluation Behavioral health service delivery with culturally diverse clients Cross-cultural factors in the treatment of trauma related disorders Cultural considerations in the assessment and behavioral treatment of substance use disorders Handbook of Cultural Factors in Behavioral Health expertly offers clinicians a comprehensive set of resources and tools that will assist them working with diverse clients. Clinicians working with culturally diverse clients, as well as researchers and students learning about how cultural factors are relevant to the helping profession will all find this volume an integral addition to their library.
