**Global Legal Pluralism** - Paul Schiff Berman 2012-02-27

We live in a world of legal pluralism, where a single act or actor is potentially regulated by multiple legal or quasi-legal regimes imposed by state, substate, transnational, supranational and nonstate communities. Navigating these spheres of complex overlapping legal authority is confusing and we cannot expect territorial borders to solve all these problems. At the same time, those hoping to create one universal set of legal rules are also likely to be disappointed by the sheer variety of human communities and interests. Instead, we need an alternative jurisprudence, one that seeks to create or preserve spaces for productive interaction among multiple, overlapping legal systems by developing procedural mechanisms, institutions and practices that aim to manage, without eliminating, the legal pluralism we see around us. Global Legal Pluralism provides a broad synthesis across a variety of legal doctrines and academic disciplines and offers a novel conceptualization of law and globalization.

Good Economics for Hard Times - Abhijit V. Banerjee 2019-11-12

The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there-- what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and

Esther DuFlo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

**The Problems of Jurisprudence** - Richard A. Posner 1993-03-15

In this book, one of our country's most distinguished scholar-judges shares with us his vision of the law. For the past two thousand years, the philosophy of law has been dominated by two rival doctrines. One contends that law is more than politics and yields, in the hands of skillful

judges, correct answers to even the most difficult legal questions; the other contends that law is politics through and through and that judges wield essentially arbitrary powers. Rejecting these doctrines as too metaphysical in the first instance and too nihilistic in the second, Richard Posner argues for a pragmatic jurisprudence, one that eschews formalism in favor of the factual and the empirical. Laws, he argues, are not abstract, sacred entities, but socially determined goads for shaping behavior to conform with society's values. Examining how judges go about making difficult decisions, Posner argues that they cannot rely on either logic or science, but must fall back on a grab bag of informal methods of reasoning that owe less than one might think to legal training and experience. Indeed, he reminds us, the greatest figures in American law have transcended the traditional conceptions of the lawyer's craft. Robert Jackson did not attend law school and Benjamin Cardozo left before getting a degree. Holmes was neither the most successful of lawyers nor the most lawyerly of judges. Citing these examples, Posner makes a plea for a law that frees itself from excessive insularity and takes all knowledge, practical and theoretical, as grist for its mill. The pragmatism that Posner espouses implies looking at problems concretely, experimentally, without illusions, with an emphasis on keeping diverse paths of inquiry open, and, above all, with the insistence that social thought and action be evaluated as instruments to desired human goals rather than as ends in themselves. In making his arguments, he discusses notable figures in jurisprudence from Antigone to Ronald Dworkin as well as recent movements ranging from law and economics to civic republicanism, and feminism to libertarianism. All are subjected to Posner's stringent analysis in a fresh and candid examination of some of the deepest problems presented by the enterprise of law.

**Medicolegal Death Investigation System** - Institute of Medicine 2003-09-22

The US Department of Justice's National Institute of Justice (NIJ) asked the Institute of Medicine (IOM) of The National Academies to conduct a

workshop that would examine the interface of the medicolegal death investigation system and the criminal justice system. NIJ was particularly interested in a workshop in which speakers would highlight not only the status and needs of the medicolegal death investigation system as currently administered by medical examiners and coroners but also its potential to meet emerging issues facing contemporary society in America. Additionally, the workshop was to highlight priority areas for a potential IOM study on this topic. To achieve those goals, IOM constituted the Committee for the Workshop on the Medicolegal Death Investigation System, which developed a workshop that focused on the role of the medical examiner and coroner death investigation system and its promise for improving both the criminal justice system and the public health and health care systems, and their ability to respond to terrorist threats and events. Six panels were formed to highlight different aspects of the medicolegal death investigation system, including ways to improve it and expand it beyond its traditional response and meet growing demands and challenges. This report summarizes the Workshop presentations and discussions that followed them.
