Lessons on Prayer - Witness Lee 1981-04-01

The effectiveness of our prayer depends upon our understanding of the meaning of prayer itself. In Lessons on Prayer Witness Lee first discusses the real meaning of prayer: Prayer is the mutual contact between man and God; prayer is man breathing God, obtaining God, and being obtained by God; and prayer is man cooperating and co-working with God, allowing God to express Himself and His desire through man, and thus accomplish His purpose.

The Justifying Judgement of God - Justyn Terry 2008-02-01

This monograph argues that the doctrine of atonement may be presented more coherently by recognizing judgement as the principle metaphor of the reconciling work of Christ. Judgement, understood not only as condemnation but as the whole process of bringing about justice, provides the pattern to which victory, redemption, and sacrifice may be compared and to which they should be related. The first section is a study of twentieth-century British atonement theology to understand the assumptions that give rise to the difficulties in proclaiming the atonement. The second section examines Karl Barth's account of reconciliation in terms of the judgement of Jesus Christ, and its relationship to victory, redemption, and sacrifice. The proposal is made that judgement is the paradigmatic metaphor of the doctrine of atonement. The implications of this claim are then considered for the response to the work of Christ, and how repentance, baptism, Eucharist, and holiness are related to judgement.

Touching Stories of My Life in Journey to Christian Holiness and Hands-on Patient Care in a Weeping Healthcare - Ramsis F. Ghaly FACS, MD 2019-08-26

This is the twelfth book of the series "Christianity and the Human Brain." It integrates the neuroscience and the Bible, the Holy Book of our Lord Jesus. My love for our Lord, Jesus Christ, abides with my lifetime passion for neurosurgery and medicine, my continual obsession of spiritual connectivity of the Holy Spirit to the human brain that indeed separates mankind from all other living creation. It has been my belief that the human brain does not limit itself to the physical skull but rather extends in a nonphysical form to the outside spiritual world, even while living on earth. In other words, a big part of the human brain is actually outside the skull and the body. As I perform brain surgeries for three decades, I realize my theory is so true. The majestic human brain can't be just the 1,500 grams of jelled matter inside the skull. The human journey, therefore, is transforming the human brain to become a brain of a man of God and the hand of man to a hand of a man of God. The spiritual human brain never dies, only the flesh. It is the center of my calling and unrelenting meditations while roaming in the heartfelt spirit lacking the physical proof that science demand of me. My life is dedicated to my Lord Jesus, patients, and residents. As a physician, I have reached the top in America, I am a professor of both neurological surgery and anesthesiology, and I am well-published in famous medical journals. As an academic teacher, I trained for more than thirty-four years, graduating thousands of trainee. But all is nothing as I strive for the Christian holiness and fullness. In a weeping healthcare with many patients' falling victims, I included actual patients' miracles, testimonials, and sincere quotes as a testament to the Almighty and the dire need for faith and integral goodhearted medicine. This book is full of many vibrant stories that I love to share. It is timely since I consider my generation soon will be viewed obsolete to the future generations, and what will remain are the books I authored. The book is a text of wealth covering broad and diverse topics of my life's journey in 134 chapters and organized over 14 sections. So many chapters are written about my special love for Lord Jesus Christ and His children. In poems, deep reflections, and spiritual release of mind, I wrote extensively. In fact, I shut my senses and impersonated the human brains of the men of God and the children of the Most High in their prominent biblical stories. A special section is dedicated to the mothers, newborns, and little children. While my soul is grieving, a section is designated on the ongoing Christian persecution, especially the genocide of Christians in my country Egypt, the ancient region of the Middle East, and the oldest historic continent of Africa. Furthermore, I wrote some of my dreams and thoughts that I couldn't otherwise convey for one reason and another, such as neuroscience in aerospace and some of the timely, touching subjects like drug overdose, human trafficking, and healthcare crises. Few chapters included are about my personal

views and introducing spirituality into the recent turmoil in politics. Friends, human life starts with love and ends with eternal love for our Savior. It is never enough to share our love, write about love, and talk about actual love stories of heavenly roses, joy, Christmas, healing touch, miracles, and our calling for his purpose. This is what my twelfth book is all about.

The Faith of Scientists - Nancy Frankenberry 2008-08-31

The Faith of Scientists is an anthology of writings by twenty-one legendary scientists, from the dawn of the Scientific Revolution to the frontiers of science today, about their faith, their views about God, and the place religion holds--or doesn't--in their lives in light of their commitment to science. This is the first book to bring together so many world-renowned figures of Western science and present them in their own words, offering an intimate window into their private and public reflections on science and faith. Leading religion scholar Nancy Frankenberry draws from diaries, personal letters, speeches, essays, and interviews, and reveals that the faith of scientists can take many different forms, whether religious or secular, supernatural or naturalistic, conventional or unorthodox. These eloquent writings reflect a spectrum of views from diverse areas of scientific inquiry. Represented here are some of the most influential and colossal personalities in the history of science, from the founders of science such as Galileo, Johannes Kepler, Francis Bacon, Isaac Newton, Charles Darwin, and Albert Einstein, to modern-day scientists like Carl Sagan, Stephen Jay Gould, Jane Goodall, Freeman Dyson, Stephen Hawking, Edward O. Wilson, and Ursula Goodenough. Frankenberry provides a general introduction as well as concise introductions to each chapter that place these writings in context and suggest further reading from the latest scholarship. As surprising as it is illuminating and inspiring, The Faith of Scientists is indispensable for students, scholars, and anyone seeking to immerse themselves in important questions about God, the universe, and science.

Character Studies in the Fourth Gospel - Hunt, et al 2016

Using various narrative approaches and methodologies, an international team of forty-four Johannine scholars here offers probing essays related to individual characters and group characters in the Gospel of John. These essays present fresh perspectives on characters who play a major role in the Gospel (Peter, Nicodemus, the Samaritan woman, Thomas, and many others), but they also examine characters who have never before been the focus of narrative analysis (the men of the Samaritan woman, the boy with the loaves and fishes, Barabbas, and more). Taken together, the essays shed new light on how complex and nuanced many of these characters are, even as they stand in the shadow of Jesus. Readers of this volume will be

challenged to consider the Gospel of John anew.

Jesus the Divine Human - William Lucas 2017-04-06

Almost everyone knows that December 25 is not really Jesus's birthday, and quite a few are aware that August 21 is his real birthday. There are many more things we were not taught about Jesus. An example: who was Jesus in human form? The information we were taught about Jesus is mostly incorrect. Those so-called churches fathers were more interested in prestige, control, wealth, and power. They weren't really interested in learning about Jesus. How can you possibly learn anything about God when all your attention is on wealth, prestige, and controlling people's lives? These are all the things God is not about. Friends, there's a book I have been studying for many years titled *The Urantia Book* that has devoted 700 of its 2,097 pages about the life and teachings of Jesus, and the book has 2,097 pages. Being inspired by this text on Jesus, I wrote a book titled *Jesus the Divine Human: From Higher Worlds*. Check out the reality about Jesus that has been hidden for many years.

Richard Thieme's Islands in the Clickstream - Richard Thieme 2004-06-26

CNN called Richard Thieme "a member of the cyber avant-garde". Digital Delirium named him "one of the most creative minds of the digital generation". Now Richard Thieme's wisdom on the social and cultural dimensions of technology is available in a single volume. "Islands in the Clickstream" ranges beyond the impact of technology to spirituality, psychological insight, and social commentary. Now that people are used to living in virtual worlds and move easily between online and offline worlds, they want to connect that experience to the deeper issues of our lives, including spiritual issues. Some examples include "Dreams Engineers Have", "The Crazy Lady on the Treadmill", and "Whistleblowers and Team Players". These essays raise serious questions for thoughtful readers. They have attracted favorable commentary from around the world and a fanatic, almost rabid fan base. * This author has become an extremely popular and highly visible talking head. He is a rare "personality" in the otherwise bland world of technology commentators. * The book leverages the loyalty of his audience in the same way Bill O'Reilly's "The O'Reilly Factor" and Al Franken's "Lies and the Lying Liars Who Tell Them" do. * The book is an easy read intended to provoke thought, discussion and disagreement.

Mexico, from Independence to Revolution, 1810-1910 - William Dirk Raat 1982-01-01

The first classroom reader devoted exclusively to nineteenth-century Mexican history, this volume brings together twenty-six essays and primary documents treating Mexico's Age of Caudillos. The readings—many by Mexican politicians, historians, and commentators and available here in English for the first time—are organized into four groups representing major eras in the early national development of Mexico: Independence, the age of Santa Anna, La Reforma and the French Intervention, and the Porfiriato. The selections range from autobiography to political and economic history, from the history of ideas to philosophy and social history. The interpretive essays represent both traditional and revisionist views, while the primary materials comprise both political documents and contemporary personal accounts.

Not Only, But Also - Malcolm Nash 2018-05-18

Malcolm Nash achieved sporting immortality as the bowler hit for a world-record six sixes by the legendary batsman Garry Sobers at Swansea in 1968 but, as Malcolm himself notes, although this single over made

his name well-known, it should not define his long and distinguished cricketing career. A highly regarded bowler, Malcolm played over 600 matches for Glamorgan between 1966 and 1983, took over 1,300 wickets, had an England trial and was unlucky not to receive international recognition. In *Not Only, But Also*, his sporting memoir published 50 years after that historic day in Swansea, Malcolm not only looks back at that over at St Helen's but also explores and celebrates his wider achievements with ball and bat, painting an intriguing and nostalgic picture of county cricket, and the life of a county cricketer, in the 1960s and 1970s. Described by his friend John Arlott as 'a highly skilful manipulator of medium-pace seam bowling', Malcolm's story is of a cricketing life full of excitement and incident. It is a career remembered not only for that single over bowled to the best cricketer in the world, but also by much, much more.
