Curriculum Development and Evaluation in Nursing Education - Sarah B. Keating, EdD, MPH, RN, C-PNP, FAAN 2017-12-02

"This is a detailed yet practical guide to planning, developing, and evaluating nursing curricula and educational programs. It provides a comprehensive and critical perspective on the totality of variables impacting curricular decisions...This book provides readers with a comprehensive overview of curriculum development, redesign, and evaluation processes...92 - 4 Stars" --Doody's Book Reviews Reorganized and updated to deliver practical guidelines for evidence-based curricular

change and development, the fourth edition of this classic text highlights current research in nursing education as a springboard for graduate students and faculty in their quest for research projects, theses, dissertations, and scholarly activities. It also focuses on the specific sciences of nursing education and program evaluation as they pertain to nursing educators. New chapters address the role of faculty regarding curriculum development and approval processes in changing educational environments; course development strategies for applying learning theories, educational taxonomies, and team-building; needs assessment and the frame factors model; ADN and BSN and pathways to higher degrees; and planning for doctoral education. The fourth edition continues to provide the detailed knowledge and practical applications necessary for new and experienced faculty to participate in essential components of the academic role—instruction, curriculum, and evaluation. At its core, the text discusses the importance of needs assessment and evidence as a basis for revising or developing new programs and highlights requisite resources and political support. With a focus on interdisciplinary collaboration, the book addresses the growth of simulation, how to help new faculty transition into the academic role, and use of curriculum in both practice and academic settings. Additionally, the book describes the history and evolution of current nursing curricula and presents the theories, concepts, and tools necessary for curriculum development. Chapters include objectives, discussion points, learning activities, references, and a glossary. New to the Fourth Edition: Reorganized and updated to reflect recent evidence-based curricular changes and developments Highlights current research New chapter: Implementation of Curriculum - Course Development Strategies for the Application of Learning Theories, Educational Taxonomies, and Instruction Team-Building New chapter on Planning for Undergraduate Programs New content on Needs Assessment and the Frame Factors Model New content on Planning for Doctoral Education in Nursing New content on curriculum evaluation, financial support, budget management, and use of evidence Key Features: Supports new faculty as they transition to academe Addresses the need for preparing more

faculty educators as defined by IOM report, the ACA, and the Consensus Model Describes the scope of academic curriculum models at every practice and academic level Threads the concept of interdisciplinary collaboration in education throughout Serves as a CNE Certification Review

Maternal Child Nursing Care in Canada - E-Book - Lisa Keenan-Lindsay
2021-12-17

Featuring the most accurate, current, and clinically relevant information available, Perry's *Maternal Child Nursing Care in Canada* combines essential maternity and pediatric nursing information in one text. Comprehensive coverage includes promotion of wellness and the care for persons experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health concerns, including physiological dysfunctions and special needs and illnesses, are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Medication Alerts stress medication safety concerns for better therapeutic management. Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Research Focus boxes identify best practices by presenting evidence and how to apply the knowledge learned. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Clinical reasoning case studies offer you opportunities to test and develop your analytical skills and apply knowledge in various settings. Cultural Awareness boxes explore beliefs and practices about pregnancy, childbirth, parenting, women's health concerns, and caring for sick children. Evidence-Informed Practice boxes highlight findings that confirm effective practices or that identify practices with unknown, ineffective, or harmful effects. Emergency boxes alert you to emergency situations and guide you step-by-step through

emergency procedures. Family-Centred Care boxes highlight the needs or concerns of families that you should consider in providing family-centred care. Guidelines boxes outline nursing procedures in an easy-to-follow format. Home Care boxes detail important information that you need to deliver care to patients and families in the home setting. Medication Guide boxes include key information about medications used in maternity and newborn care, including their indications, adverse effects, and nursing considerations. Patient Teaching boxes assist you in helping patients and families become involved in their own care with optimal outcomes.

Cases on Technological Adaptability and Transnational Learning: Issues and Challenges - Mukerji, Siran 2010-04-30

"The case studies in this volume enforce technology is a principle catalysts for transnational collaborative interventions in providing learning and professional development opportunities to the people of both developed and developing countries"--Provided by publisher.

Child Health Nursing - Jane W. Ball 2018-04-23

For courses in Pediatric Nursing. A comprehensive survey of family-centered pediatric nursing care *Child Health Nursing: Partnering with Children & Families* promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community. It focuses on the importance of partnering with families to adapt care plans for children based on their age, health status, and social and cultural influences. The text considers the impact of contemporary care environments on nursing practice, both in health promotion and in the care of children with acute or chronic health conditions. By offering industry best practices and practical applications, the book encourages students to apply evidence-based findings and clinical reasoning to planning superior care. The updated 3rd edition explains how modern nursing practice is affected by reforms to healthcare and its delivery--such as electronic health records, new approaches to chronic and acute condition management, and a focus on prevention. To support safe, effective, and innovative care, this edition draws on the latest recommendations of NANDA International diagnoses, Nursing

Intervention Classifications (NIC), Nursing Outcomes Classifications (NOC), and Healthy People 2020. Journal of Gerontological Nursing - 1976

Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland

security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Nclex-RN Exam Tips & Strategies for Foreign Nursing Graduates - Victoria Ogunrinu 2021-01-09

NCLEX-RN Exam Tips & Strategies For Foreign Nursing Graduates is an aggregate of the author's personal experience as a graduate of a foreign nursing school and simplification of the road navigation to NCLEX success and become a USRN. It takes less time to do a thing once and right than it does to explain why you did it wrong. NCLEX-RN EXAM Tips & Strategies for Foreign Nursing Graduates is exactly what you need to pass the NCLEX-RN or CGFNS exam at your first attempt. The book responds to the challenge of passing the NCLEX-RN by simplifying the complexities of the test through handy tips and strategies culled from first-hand experience. It serves as a guide to success in the NCLEX and CGFNS exam by its discussion of the concepts, principles, processes, and vocabulary needed to pass the tests with flying colors. As a foreign nursing graduate, not only does this book provide you functional strategies for performing excellently in the NCLEX, It also offers some sample practice test questions as well as detailed explanations of each answer, to name but a few. The book is written by a seasoned retired nurse leader whose career as an international nurse is characterized by great achievements. Her experience as an assistant hospital administrator and founder of VHealth International is what drives the content of this great book and what makes it a must-read for all. Amongst other things, the book teaches you how to: *Tackle multiple-choice and SATA questions.*Be a Master of 12 Essential Principles.*Apply therapeutic communication.*Understand the

psychology of CGFNS and NCLEX success.*Tackle dosage calculation.You can easily read this book anytime and anywhere on kindle, your computer, iPhone, iPad, or tablet, if you do not fancy going around with hard copy books.This is it! Look no further. Navigate your way to NCLEX SUCCESS and become a USRN.

Comprehensive Lactation Consultant Exam Review - Linda J. Smith 2010-10-15

Consistent with the direction being followed by the IBLCE exam board, The Third Edition of Linda J. Smith's highly successful Comprehensive Lactation Consultant Exam Review is organized around the chronological stages of the mother-baby dyad's development. With over 800 questions and over 30 new clinical pictures, the Third Edition encourages an in-depth exploration of each stage of the mother-baby dyad's development, and poses questions that are often unique to that particular stage. It contains two complete Practice Exams and presents thirteen actual Clinical Case Studies, each asking several questions about the case. This review guide is perfect for beginning lactation consultants and those re-certifying, as well as dietitians, childbirth educators, nurses, and breastfeeding counselors! This new edition offers:

- Information organized by Chronological Stages versus by Disciplines
- Over 100 more questions than the Second Edition, and over 30 new clinical pictures
- Practice Exams that follow the 2010 IBLCE exam format by having 175 multiple-choice questions, of which, 100 questions have clinical pictures

The companion online image gallery contains full color clinical pictures to help you learn!

Quick Facts is your starting place for NCLEX Prep and the foundation of the ReMar NCLEX Virtual Training System!

Price Setting and Price Regulation in Health Care - OECD 2019-06-26

The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

Reflective Practice in Nursing - Lioba Howatson-Jones 2016-02-27

Would you like to develop some strategies to manage knowledge deficits, near misses and mistakes in practice? Are you looking to improve your reflective writing for your portfolio, essays or assignments? Reflective practice enables us to make sense of, and learn from, the experiences we have each day and if nurtured properly can provide skills that will you

come to rely on throughout your nursing career. Using clear language and insightful examples, scenarios and case studies the third edition of this popular and bestselling book shows you what reflection is, why it is so important and how you can use it to improve your nursing practice.

Key features: · Clear and straightforward introduction to reflection directly written for nursing students and new nurses · Full of activities designed to build confidence when using reflective practice · Each chapter is linked to relevant NMC Standards and Essential Skills Clusters

Interview Questions and Answers - Richard McMunn 2013-05

The Future of Nursing - Institute of Medicine 2011-02-08

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Leininger's Culture Care Diversity and Universality - Marilyn R. McFarland 2015

Preceded by Culture care diversity and universality: a worldwide nursing theory / [edited by] Madeleine M. Leininger, Marilyn R. McFarland. 2nd ed. c2006.

Communities in Action - National Academies of Sciences, Engineering, and Medicine 2017-04-27

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean

they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. **Communities in Action: Pathways to Health Equity** seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Therapeutic Communication - Jurgen Ruesch 1961

This volume deals with universal processes of therapeutic communication, a term which covers whatever exchange goes on between people who have a therapeutic intent, with an emphasis upon the empirical observation of the communicative process. -- Preface.

Code of Ethics for Nurses with Interpretive Statements - American Nurses Association 2001

Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making.

Spiritual, Ethical, and Pastoral Aspects of Death and Bereavement

- Gerry R Cox 2022-03-23

This collection of previously unpublished essays addresses a wide range of topics relevant to the on-going debates regarding dying and death and the subtleties, nuances, and complexities accompanying these phenomena. The authors have attempted to contribute their experiences, insights, and research results to clarify rather than obfuscate. Topic coverage is broad; however, content depth is not sacrificed. The diversity of authors' backgrounds, both geographical and disciplinary, also serves to make this volume unique. The chapters in this volume offer a substantial contribution in assisting care-givers in arriving at acceptable ethical positions in their pastoral, counseling, medical, and mortician roles.

Nursing Times - 1980

The Role of Telehealth in an Evolving Health Care Environment - Institute of Medicine 2012-12-20

In 1996, the Institute of Medicine (IOM) released its report **Telemedicine: A Guide to Assessing Telecommunications for Health Care**. In that report, the IOM Committee on Evaluating Clinical Applications of Telemedicine found telemedicine is similar in most respects to other technologies for which better evidence of effectiveness is also being demanded. Telemedicine, however, has some special characteristics-shared with information technologies generally-that warrant particular notice from evaluators and decision makers. Since that time, attention to telehealth has continued to grow in both the public and private sectors. Peer-reviewed journals and professional societies are devoted to telehealth, the federal government provides grant funding to promote the use of telehealth, and the private technology industry continues to develop new applications for telehealth. However, barriers remain to the use of telehealth modalities, including issues related to reimbursement, licensure, workforce, and costs. Also, some areas of telehealth have developed a stronger evidence base than others. The Health Resources and Service Administration (HRSA) sponsored the IOM in holding a workshop in Washington, DC, on August 8-9 2012, to examine how the use of telehealth technology can fit into the U.S. health care system. HRSA asked the IOM to focus on the potential for telehealth to serve geographically isolated individuals and extend the reach of scarce resources while also emphasizing the quality and value in the delivery of health care services. This workshop summary discusses the evolution of telehealth since 1996, including the increasing role of the private sector, policies that have promoted or delayed the use of telehealth, and consumer acceptance of telehealth. **The Role of Telehealth in an Evolving Health Care Environment: Workshop Summary** discusses the current evidence base for telehealth, including available data and gaps in data; discuss how technological developments, including mobile telehealth, electronic intensive care units, remote monitoring, social networking, and wearable devices, in conjunction with the push for electronic health records, is changing the delivery of health care in rural and urban

environments. This report also summarizes actions that the U.S. Department of Health and Human Services (HHS) can undertake to further the use of telehealth to improve health care outcomes while controlling costs in the current health care environment.

Kenya National Assembly Official Record (Hansard) - 1983-03-15

The official records of the proceedings of the Legislative Council of the Colony and Protectorate of Kenya, the House of Representatives of the Government of Kenya and the National Assembly of the Republic of Kenya.

Non-medical Prescribing - Mahesh Sodha 2009-01-01

A new guide designed to ensure confident prescribing in specialist areas. The need for this text stems from the necessity to develop non-medical prescribing in practice. It offers a resource for all non-medical prescribers including nurses, pharmacists, optometrists, physiotherapists and other healthcare professionals who desire to become supplementary or independent prescribers in their field. The book is divided into two comprehensive sections and provides an overview of non-medical prescribing by healthcare professionals other than doctors.

Health Professions Education - Institute of Medicine 2003-07-01

The Institute of Medicine study Crossing the Quality Chasm (2001) recommended that an interdisciplinary summit be held to further reform

of health professions education in order to enhance quality and patient safety. Health Professions Education: A Bridge to Quality is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

Saunders Comprehensive Review for NCLEX-PN - Linda Anne Silvestri 2000

This innovative book prepares students for the NCLEX-PN exam with thorough content review and 3,000 practice questions. Silvestri provides readers with information on NCLEX-PN preparation, test-taking strategies and the NCLEX-PN from students' perspectives. A free CD-ROM contains all 1,600 questions from the book plus 1,400 additional questions.
