Designing Better Services - Francesca Foglieni 2017-09-25

This book provides accessible, comprehensive guidance on service design and enables practitioners approaching the discipline for the first time to develop the strategic mindset needed to exploit its innovation potential. The opening chapters trace the origins of service design and examine its links with service innovation, as well as its strategic role in service organizations. It then offers step-by-step guidance on tackling a service design project, explaining the main design elements and indications of various useful design tools. It also introduces the topic of evaluation as a support practice in designing or redesigning better services, and providing evidence concerning the value of service design interventions. The third chapter explores how evaluation is currently approached in service design practice through the analysis of a number of case studies. Based on these experiences it extensively discusses evaluation, with a particular focus on service evaluation, and explains its importance in supporting service design and fostering innovation throughout the service design process. Further it describes pragmatic directions for setting up and conducting a service evaluation strategy. The concluding chapter uses an interpretive model to summarize the role evaluation could have in service design practice and focuses on interdisciplinary competences that need to be acquired by service designers in order to address the evolution of the discipline. The novel approach adopted in the book fosters the growing interest in design-driven service innovation and assists in realizing its full potential in both the private and the public sector.

Psychology and Work Today, 10th Edition - Duane P. Schultz 2020-07-24

Perspectives of Management Accounting for Sustainable Business Practices - Oncioiu, Ionica 2022-06-30

In the 21st century, management accounting gains new dimensions, expanding its research area. Additionally, management of sustainable performance is one of the phenomena faced by the current business environment, and in particular management corporations. The focus of management on profitability remains the main objective of any company, but it must also take into account the sustainability of social, economic, and environmental aspects. Under these circumstances, managerial decisions must be adjusted and strongly substantiated considering the information required by internal and external stakeholders including financial reporting. The information requirements of customers and other stakeholders are steadily increasing, and some companies face certain problems in implementing the concept of sustainability and environmental reporting. Perspectives of Management Accounting for Sustainable Business Practices proposes an interdisciplinary perspective and explores various theoretical and practical approaches to management accounting and its impact in the 21st century on different areas of activity. It contrasts external financial accounting for government regulators and the investment community with internal management accounting for managers to leverage decision making. Covering topics such as corporate social responsibility, disclosure issues, and performance analysis, this premier reference source is an essential resource for business leaders and executives, accountants, financial controllers, business analysts, budgeting managers, students and faculty of higher education, librarians, researchers, and academicians.

Social Procurement and New Public Governance - Josephine Barraket 2015-10-23

In recent years, the search for innovative, locally relevant and engaging public service has become the new philosophers' stone. Social procurement represents one approach to maximising public spending and social value through the purchase of goods and services. It has gained increasing attention in recent years as a way that governments and corporations can amplify the benefits of their purchasing power, and as a mechanism by which markets for social enterprise and other third sector organisations can be grown.

Despite growing policy and practitioner interest in social procurement, there has been relatively little conceptual or empirical thinking published on the issue. Taking a critically informed approach, this innovative text examines emerging approaches to social procurement within the context of New Public Governance (NPG), and examines the practices of social procurement across Europe, North America, and Australia. Considering both the possibilities and limitations of social procurement, and the types of value it can generate, it also provides empirically-driven insights into the practicalities of 'triple bottom line' procurement, the related challenges of measuring social value and the management of both the strategic and operational dimensions of procurement processes. As such it will be invaluable reading for all those interested in social services, public governance and social enterprise.

Management of Shipping Companies - Ioannis Theotokas 2018-04-19

The maritime sector is dynamic and volatile, creating the need for continuous monitoring of the latest developments and their effects on the organisation, management and strategies of shipping companies. This book analyses the business environment of these companies and the approaches they adopt in organising and managing their activities. Management of Shipping Companies aims to facilitate the learning and understanding of the fascinating world of shipping business. It examines the organisation and management of companies which manage ocean-going ships, emphasising the special characteristics of the industry and the framework created by these. This textbook offers a detailed account of the companies' processes and functions, the structural and contextual dimensions of their organisation, as well as an analysis of human resources, safety management and the outsourcing of shipping operations. Written in an easily digestible and critical manner, it includes case studies and analysis of best practices implemented by companies worldwide. This unique and accessible book is an ideal text for students in maritime studies programs as well as readers interested in learning about maritime businesses' organisation and management.

Computational Organization Theory - Kathleen M. Carley 2014-03-05

This volume represents an advance in our understanding of how to represent and reason about organizational phenomena. Although organizational theorists have long grappled with the complexities of adaptive agents, ecological systems, and non-linear relations among the basic elements of organizational design, they have not, until recently, had the tools to grapple with these complex relationships. Recent advances in logic, symbolic programming, network analysis, and computer technology have made possible a series of tools that can be used to understand the complexities of organizational behavior. New computational techniques make it possible to develop and test more realistic models of organizational behavior. This volume offers examples of this new breed of models, and provides insight into how these advances and techniques can be used to extend our theoretical understanding of organizations. Authored by leading researchers in the area of computational organization theory, the various chapters demonstrate the value of computational analysis for organizational theory and advance our understanding of the relationship between organizational design and performance. This book contains both theoretical and methodological contributions that enable organizational theorists to use computational and mathematical techniques to systematically address the complex relationships that underlie organizational life. It also presents new -- or sometimes, renewed -- approaches on how to conduct organizational research from multiple formal perspectives including: simulation, numerical analysis, symbolic logic, mathematical modeling, and graph theory.

Organization Development in the Largest Global Organization - Robert L. Reinhard 2022-01-01

The U.S. military, as the core constituent of the Department of Defense, collectively represents the largest and most complex organization on earth. As such, the U.S. military implemented the largest formal OD programs in the world. These programs, from inception to present day, utilized diverse and evolving OD intervention typologies to garner congruence with the environment. The research for this book, accomplished using an inductive, grounded theory approach, examined the initiatives that fostered the use of OD intervention typologies. The findings revealed three major epochs of OD interventions that span a 50-year timeline. The epochs include: (1) Traditional OD; (2) Total Quality Management (TQM); and (3) Continuous Process Improvement (CPI). The epoch of Traditional OD represents the use of human process interventions while TQM and CPI represent the use of technostructural interventions. In the end, the relationship between organization design and culture, and the selection of OD intervention typologies, were best explained using variables that explicate diverse environmental occurrences that influenced senior military leaders' perceived need for specific OD interventions. These perceived needs were predicated on the requirement to exploit vital resources in an effort to bolster warfighting operational readiness in support of the American citizenry.

The Executive and the Elephant - Richard L. Daft 2010-08-02

Lessons for leaders on resolving the ongoing struggle between instinct and the creative mind Kings, heads of government, and corporate executives lead thousands of people and manage endless resources, but may not have mastery over themselves. Often leaders know that right action is important, but have little (if any) understanding of what prevents them from acting in accordance with their intentions. In this important book, leadership expert Richard Daft portrays this dilemma as a struggle between instinct (elephant) and intention (the executive) using the most current research on the intentional vs. the habitual mind to explain how this phenomenon occurs. Based on current research and real-life examples Offers leaders a method for directing themselves more productively Written by an expert in leadership, organizational performance, and change management Through real-life examples and recent studies in psychology, management and Eastern spirituality Daft provides guidance to all of us who struggle finding our own balance and cultivating the behavior of others.

Organizational Change for the Human Services - Thomas Packard 2021

"Human service organizations are faced with environments of volatility, uncertainty, complexity, and ambiguity. The COVID-19 pandemic, other healthcare challenges, expectations for evidence-based practice

usage, and racial justice are vivid examples. Clients and communities deserve effective services delivered by competent, compassionate, and committed staff members. Taxpayers, donors, philanthropists, policy makers, and board members deserve to have their contributions used to deliver programs that are effective and efficient. All these forces create demands and opportunities for organizational change. Planned organizational change can happen at the level of a program, division, or an entire organization. Administrators and other staff will need complementary skills in leading and managing organizational change. Staff deserve opportunities to have their unique competencies used to achieve organizational goals. Organizational change involves leading and mobilizing staff to address problems, needs, or opportunities facing the organization by using change processes which involve both human and technical aspects of the organization"--

Organization Theory and Design - Jonathan Murphy 2014

Organizing involves continuous challenges in the face of uncertainty and change. How is globalization impacting organizations? How will new strategies for a turbulent world affect organizational design? In this second edition of *Organization Theory and Design*, developed for students in the UK, Europe, the Middle East and Africa, respected academics Jonathan Murphy and Hugh Willmott continue to add an international perspective to Richard L. Daft's landmark text. Together they tackle these questions in a comprehensive, clear and accessible study of the subject.

North America and Europe (NAE) Report - International Assessment of Agricultural Knowledge, Science, and Technology for Development (Project) 2009

The International Assessment of Agricultural Knowledge, Science, and Technology for Development (IAASTD) looks realistically at how we could effectively use agriculture/AKST to help us meet development and sustainability goals. An unprecedented three-year collaborative effort, the IAASTD involved more than 400 authors in 110 countries and cost more than \$11 million. It reports on the advances and setbacks of the past fifty years and offers options for the next fifty years. The results of the project are contained in seven reports: a Global Report, five regional Sub-Global Assessments, and a Synthesis Report. The Global Report gives the key findings of the Assessment, and the five Sub-Global Assessments address regional challenges. The volumes present options for action. All of the reports have been extensively peer-reviewed by governments and experts and all have been approved by a panel of participating governments. The Sub-Global Assessments all utilize a similar and consistent framework: examining and reporting on the impacts of AKST on hunger, poverty, nutrition, human health, and environmental/social sustainability. The five Sub-Global Assessments cover the following regions: Central and West Asia and North Africa (CWANA) East and South Asia and the Pacific (ESAP) Latin America and the Caribbean (LAC) North America and Europe (NAE) Sub-Saharan Africa (SSA)

Empowerment Series: Understanding Human Behavior and the Social Environment - Charles Zastrow 2019-01-31

UNDERSTANDING HUMAN BEHAVIOR AND THE SOCIAL ENVIRONMENT, 11th Edition, looks at the lifespan through the lens of social work theory and practice, covering human development and behavior theories within the context of individual, family, group, organizational, and community systems. Using a chronological lifespan approach, the book presents separate chapters on biological, psychological, and social impacts at the different lifespan stages with an emphasis on strengths and empowerment. Part of the Brooks/Cole Empowerment Series, this edition is up to date and thoroughly integrates the core competencies and recommended behaviors outlined in the current Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE).
