Rebuilding Asia Following Natural Disasters - Patrick Daly
2016-04-06

Providing a detailed and comparative assessment of the humanitarian responses to a series of major disasters in Asia over the past two decades, including massive earthquakes, volcanic eruptions, and tsunamis, this book explores complex and changing

understandings and practices of relief, recovery, and reconstruction. These critical investigations raise questions about the position and responsibilities of a growing range of stakeholders, and provide in-depth explorations of the ways in which local communities are transformed on multiple levels - not only by the impact of disaster events,

but also by the experiences of rebuilding. This timely volume highlights how the experiences of Asia can contribute towards post-disaster responses globally, to safeguard future communities and reduce vulnerabilities. This is a valuable resource for academic researchers interested in post-disaster transformations and development studies, practitioners in NGOs, and government officials dealing with disaster response and disaster risk reduction.

and Asian Education in order to better understand and predict the emerging trends of global education and this book will serve to provide a forum for debate of this nature. The book provides an insight into the interplay of Asian and European education, identifies the key areas for further development and firmly grounds the approach as one of conversation and dialogue, rather than one-sided dictation. It also highlights the critical issues within the development of international education, discusses the value and challenges of existing TNE practices as a mechanism to respond to the emerging Asian needs and provides an insight into the future direction of education in the Asian century.

Nfpa 58 Liquefied Petroleum Gas Code - 2013

The Local Impact of Globalization in South and Southeast Asia - Bart Lambregts 2015-08-27

In the past two decades, several millions of IT-enabled services jobs have been

relocated or 'offshored' from the US and Europe to, in particular, low cost economies around the world. Most of these jobs so far have landed in South and South-East Asia, with India and the Philippines receiving the bulk of them. This has caused profound changes in the international division of labour, and has had correspondingly wide social and economic effects. This book examines how this 'next wave in globalization' affects people and places in South and South-East Asia. It brings together twelve case studies from India, the Philippines, China, Hong Kong and Thailand, and explores how and for whom services offshoring creates opportunities, triggers local economic transformations and produces challenges. This book in addition compares how different countries take part in this 'second global shift', investigates service-sector driven economic development from a historical perspective, and engages with the question whether and to what extent services offer a new promising

avenue of sustained economic growth for developing countries. It argues that service-led development in developing countries is not easy for all the workers involved, or a guaranteed path to sustained economic development and prosperity. This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located. Based on cutting edge empirical research and original data, the volume offers a state-of-the-art contribution to this growing debate. The book provides valuable insights for students, scholars and professionals interested in services offshoring, socio-economic development and contemporary transformations in South and South-East Asia. [Territorial Disputes and State Sovereignty](#) - Jorge E. Núñez
2020-05-11

Adopting a multi-disciplinary approach, this book opens new ground for research on territorial disputes. Many

sovereignty conflicts remain unresolved around the world. Current solutions in law, political science and international relations generally prove problematic to at least one of the agents part of these differences. Arguing that disputes are complex, multi-layered and multi-faceted, this book brings together a global, inter-disciplinary view of territorial disputes. The book reviews the key conceptual elements central to legal and political sciences with regards to territorial disputes: state, sovereignty and self-determination. Looking at some of the current long-standing disputes worldwide, it compares and contrasts the many issues at stake and the potential remedies currently available in order to assess why some territorial disputes remain unresolved. Finally, it offers a set of guidelines for dispute settlement and conflict resolution that current remedies fail to provide. It will appeal to students and scholars working in international

relations, legal theory and jurisprudence, public international law and political sciences.

National Electrical Code - National Fire Protection Association 2010

Safe, efficient, code-compliant electrical installations are made simple with the latest publication of this widely popular resource. National Electrical Code is adopted in all 50 states, and is an essential reference for those in or entering careers in electrical design, installation, inspection, and safety.

The Routledge Handbook of Urban Resilience - Michael A. Burayidi 2019-11-27

This volume provides a comprehensive discussion and overview of urban resilience, including socio-ecological and economic hazard and disaster resilience. It provides a summary of state of the art thinking on resilience, the different approaches, tools and methodologies for understanding the subject in urban contexts, and brings together related reflections and initiatives. Throughout the different chapters, the handbook critically examines and reviews the resilience concept from various disciplinary and professional perspectives. It also discusses major urban crises, past and recent, and the generic lessons they provide for resilience. In this context, the authors provide case studies from

different places and times, including historical material and contemporary examples, and studies that offer concrete guidance on how to approach urban resilience. Other chapters focus on how current understanding of urban systems - such as shrinking cities, green infrastructure, disaster volunteerism, and urban energy systems - are affecting the capacity of urban citizens, settlements and nation-states to respond to different forms and levels of stressors and shocks. The handbook concludes with a synthesis of the state of the art knowledge on resilience and points the way forward in refining the conceptualization and application of urban resilience. The book is intended for scholars and graduate students in urban studies, environmental and sustainability studies, geography, planning, architecture, urban design, political science and sociology, for whom it will provide an invaluable and up-to-date guide to current approaches across

these disciplines that converge in the study of urban resilience. The book also provides important direction to practitioners and civic leaders who are engaged in supporting cities and regions to position themselves for resilience in the face of climate change, unpredictable socioenvironmental shocks and incremental risk accumulation. Water Policy in the Philippines - Agnes C. Rola
2018-01-29

This book describes challenges in the policy and practices of the various water sectors in the Philippines that have led to water conflicts. Such conflicts arise in the nature of rural-urban competition, trans-administrative boundary issues, and inconsistencies between customary and state rules, and even within state rules. Using inter-, multi- and trans-disciplinary approaches, and analysing from various scales - community, local and national governments - the book discusses policies and strategies needed towards achieving water security especially for the poor. Reflective of the complex and urgent water policy and governance issues in many developing countries, the book offers valuable lessons and insights to policy makers, water sector managers,

planners and regulators as well as to academics, researchers and students.

Urban Disaster Resilience -

David Sanderson 2016-04-14
Accelerating urbanization worldwide means more urban-centered disasters. Floods, earthquakes, storms and conflicts affecting densely populated areas produce significant losses in lives, livelihoods and the built environment, especially in comparison to rural areas. Poor urban dwellers, almost always the most vulnerable, too often bear the brunt. Aid agencies and urban professionals have been slowly adapting to these new conditions, but older models and practices hinder the most effective engagements. Drawing directly from the experiences of urban disasters in the Philippines, Chile, India, Thailand, Iraq, Haiti and Nepal, among other countries, Urban Disaster Resilience brings to light new collaborations and techniques for addressing the challenges of urban disasters in the coming years. Chapters range

from country-specific case studies to more synthetic frameworks in order to promote innovative thinking and practical solutions. Edited by David Sanderson, Jerold S. Kayden and Julia Leis, this book is a crucial read for humanitarian and disaster specialists, urban planners and designers, architects, landscape architects, housing and economic development professionals, real estate developers, private business managers and students interested in the subject, whether based in non-governmental organizations, local, state or national governments, international agencies, private firms, or the academy.

How Sentiment Matters in International Relations: China and the South China Sea

- David Groten

2019-07-29

Der Aufstieg der Volksrepublik China stellt die internationale Politik und Diplomatie vor immense Herausforderungen. Gleichzeitig nehmen die Spannungen zwischen den USA und der Volksrepublik unaufhörlich zu. Beide Staaten steuern unmittelbar auf einen Konflikt zu, den keine Seite intendiert und dessen allumfassende Konsequenzen noch kaum absehbar sind. Ein besonderer Schauplatz dieser wachsenden

Auseinandersetzung ist die Region Südostasien, in der sowohl die USA, im Verbund

mit einigen Anrainerstaaten, als auch die Volksrepublik China miteinander in einem harten Wettbewerb um die regionale Vorherrschaft stehen. Dieses Buch zeigt anhand der territorialen und maritimen Konflikte in der Südchinesischen See auf, dass Chinas zunehmend proaktive und rücksichtslosere Position gegenüber diesen Konflikten und den Konfliktparteien auch eine Folge der zunehmenden Wahrnehmung von Respektlosigkeit und dem damit einhergehenden Wunsch Chinas, dies entsprechend zu korrigieren, ist und nicht allein eine strategische Entscheidung oder gar unvermeidliche Entwicklung darstellt. Auf diesen Ergebnissen aufbauend wird die Möglichkeit eines nachhaltigen Konfliktmanagements diskutiert und entsprechend eine Reihe konkreter Handlungsempfehlungen formuliert.

The Structural Engineer's Pocket Book British Standards Edition is the only compilation of all tables, data, facts and formulae needed for scheme design to British Standards by structural engineers in a handy-sized format. Bringing together data from many sources into a compact, affordable pocketbook, it saves valuable time spent tracking down information needed regularly. This second edition is a companion to the more recent Eurocode third edition. Although small in size, this book contains the facts and figures needed for preliminary design whether in the office or on-site. Based on UK conventions, it is split into 14 sections including geotechnics, structural steel, reinforced concrete, masonry and timber, and includes a section on sustainability covering general concepts, materials, actions and targets for structural engineers.

Power and Complacency -

Phillip T. Lohaus 2021-07
The United States is at a crossroads. Despite a defense

budget that dwarfs that of any of the nation's rivals, the marginal return on this investment has decreased dramatically since the end of World War II. Why? Why have America's rivals, despite inferior resources, increasingly set the terms of international competition? How might America's leaders reconsider the application of power to ensure a favorable place on an increasingly crowded global stage? By tracing the geographic and historical development of four global actors—Russia, Iran, China, and the United States—Phillip T. Lohaus illuminates four equally distinct approaches to competition outside of warfare. He argues that while America's actions may have birthed information as a currency of power, the nation's failure to fully grasp the implications of this transition has created critical opportunities for its rivals to increase their power at the expense of the United States. The American way of competition, rooted in a scientific understanding of

warfare, may impede effectiveness in the amorphous and unscientific landscape of twenty-first-century competition. From Rome to Britain, complacency has contributed to the downfall of many empires. Yet the slow bleed of American power may still be stanchd by an approach to competition that emphasizes subtlety, diffusion, and ubiquity. America has developed and used these tools in the past—its very survival may hinge on returning to them. *Power and Complacency* defines the differing perspectives of America's international conflicts and offers possible solutions for reformulating its superpower strengths.

Legal Aspects of Sustainable Development - Volker Mauerhofer 2015-11-26

This book addresses legal aspects of sustainable

development and offers the latest thinking on a wide range of current themes. By taking a cross-cutting approach, it adds considerably to the exploration of this emerging scientific field. Twenty-nine original contributions present innovative thoughts and replicable ideas from this exciting, new area, which will be of value to practitioners and researchers alike. These contributions are allocated into a horizontal and sectorial part. The section covering horizontal policies has five sub-parts: 1) general aspects; 2) human and intellectual property rights; 3) communication and social enterprise governance; 4) public participation and 5) assessment tools. The second part on sectorial policies also has five sub-parts: 1) forest and water management; 2) renewable energy; 3) cities, waste and material management; 4) biodiversity, nature conservation, oceans and spatial planning and 5) agriculture and rural policy. It offers a multifaceted discussion of sustainable development and

law by authors from five continents and from both the public and the private sectors. This selection guarantees a broad view that presents the more theoretical arguments from the academic as well as the practical perspective. Furthermore, the authorship includes senior, highly experienced academics and practitioners as well as those at the start of their career. This ensures thoughtful expansions of established theories as well as the emergence of innovative ideas. Moreover, the ten sub-parts bring together likeminded thoughts, resulting in an exchange of different viewpoints on a similar theme. This allows the readers to concentrate on individual chapters, while at the same time discovering a variety of thoughts and ideas.

Responding to Climate Change in Asian Cities - Diane Archer
2016-11-03

The role of cities in addressing climate change is increasingly recognised in international arenas, including the Sustainable Development

Goals, the UN Framework Convention on Climate Change, and the New Urban Agenda. Asia is home to many of the countries that are most vulnerable to climate change impacts and, along with Africa, will be the site of most urban population growth over the coming decades. Bringing together a range of city experiences, *Responding to Climate Change in Asian Cities* provides valuable insights into how cities can overcome some of the barriers to building climate resilience, including addressing the needs of vulnerable populations. The chapters are centred on an overarching understanding that adaptive urban governance is necessary for climate resilience. This requires engaging with different actors to take into account their experiences, vulnerabilities and priorities; building knowledge, including collecting and using appropriate evidence; and understanding the institutions shaping interactions between actors, from the national to the

local level. The chapters draw on a mix of research methodologies, demonstrating the variety of approaches to understanding and building urban resilience that can be applied in urban settings. Bringing together a range of expert contributors, this book will be of great interest to scholars of urban studies, sustainability and environmental studies, development studies and Asian studies.

Sociological Perspectives on Media Piracy in the Philippines and Vietnam - Vivencio O. Ballano 2015-12-26

This book addresses the persistence of the optical media piracy trade in the Philippines and Vietnam. It goes beyond arguments of defective law enforcement and

copyright legal systems by applying sociological perspectives to examine the socio-economic forces behind the advent of piracy in the region. Using documentary and ethnographic data, in addition to resistance and ecological theories in sociology of law and technology as the overall theoretical framework, the book investigates factors that contribute to this phenomenon and factors that impede the full formalization of the optical media trade in the two countries. These factors include the government's attitude towards the informal sector and strong resistance to tougher IPR protection, unstable and sometimes conflicting policies on technologies, burdensome business registration process and weak enforcement of business regulations, bureaucratic corruption and loopholes in law enforcement system as well as trade ties with China. In addition to that, the book highlights the social background of the actors behind the illegal business of

counterfeit CDs and DVDs, thereby explaining the reasons they continue to persist in this type of trade. It invites policymakers, law enforcers, advocates of anti-piracy groups, and the general public to use a more holistic lens in understanding the persistence of copyright piracy in developing countries, shifting the blame from the moral defect of the traders to the current problematic copyright policy and enforcement structure, and the difficulty of crafting effective anti-piracy measures in a constantly evolving and advancing technological environment.

Great Powers, Grand Strategies - Anders Corr
2018-01-15

This book focuses on grand strategic approaches to the South China Sea dispute by major powers in the region -- those capable of projecting

force to the South China Sea and abroad. It explores international dimensions of the South China Sea dispute, and how military, diplomatic, and economic strategies of global actors have both contributed to solutions and exacerbated conflict. Key international organizations and major powers have their own chapters, including China, the United States, the Association of Southeast Asian Nations (ASEAN), the European Union (EU), Japan, India, Australia, and Russia. The book is unique in the existing literature in that it provides an all-encompassing, interconnected, and theoretical explanation of major powers involved in the South China Sea conflict. Grand strategy -- which includes not only military, but economic, political, and diplomatic strategies, is addressed in the volume as a whole. Authors seek to put the grand strategies of the major powers into analytic juxtaposition to determine likely outcomes of, and optimal major power strategies for, the

South China Sea conflict over time. The volume focuses on the deeper aspects of grand strategy and history, not customarily in the daily news coverage of incidents-at-sea and negotiations. The South China Sea Conflict has been ongoing since at least 1909, when the Qing sent a German-guided ship on a two-day voyage to the Paracels to fire cannon and claim the area. The two major adversaries -- China and the U.S. (plus allies), are in a long-term stalemate with incremental changes and frequent outbursts of brinkmanship. Occupation and economic activities in foreign exclusive economic zones (EEZs) increased substantially in the 1980s, and are the basis of a conflict that will likely persist for the next 10-20 years. Country-specific specialists are in discussion with one another between the covers of this book, in order to better understand the strategies of major players and their likely outcomes. One cannot understand the South China Sea dispute without

understanding the interaction of grand strategies, and that requires consideration of military, diplomatic, and economic aspects of the conflict across all major powers. This book provides that comparative strategic analysis of the dispute that is required to make progress towards its solution.

Introduction to Housing -
Katrin B. Anacker 2018-06-01

This foundational text for understanding housing, housing design, homeownership, housing policy, special topics in housing, and housing in a global context has been comprehensively revised to reflect the changed housing situation in the United States during and after the Great Recession and its subsequent movements toward recovery. The book focuses on the complexities of housing and housing-related issues, engendering an understanding of housing, its relationship to national economic factors, and housing policies. It comprises individual chapters written by

housing experts who have specialization within the discipline or field, offering commentary on the physical, social, psychological, economic, and policy issues that affect the current housing landscape in the United States and abroad, while proposing solutions to its challenges.

Handbook on Battery Energy Storage System - Asian Development Bank 2018-12-01

This handbook serves as a guide to deploying battery energy storage technologies, specifically for distributed energy resources and flexibility resources. Battery energy storage technology is the most promising, rapidly developed technology as it provides higher efficiency and ease of control. With energy transition through decarbonization and decentralization, energy storage plays a significant role to enhance grid efficiency by alleviating volatility from demand and supply. Energy storage also contributes to the grid integration of renewable energy and promotion of microgrid.

Guidelines for Mainstreaming Natural River Management in Water Sector Investments - Asian Development Bank 2021-09-01

The natural river management (NRM) approach is designed to harness the natural functions of river systems so they sustainably provide important services such as water supply and flood and drought management. Drawing heavily on the concepts of ecosystem services, integrated water resources management, and integrated river basin management, NRM aims to harmonize nature-based solutions and nonstructural measures with engineering interventions. This publication explains the value of NRM and provides step-by-step guidance on how the approach can be systematically integrated into water sector investments.

Under the government's 2017-2022 Development Plan that has an infrastructure investment target of \$180 billion, PPPs are expected to play a pivotal role in financing national and subnational infrastructure investments. With a pipeline of 37 PPPs, the government is taking various steps to further improve the environment for PPPs.

Anti-corruption Education and Peacebuilding - Jean de Dieu Basabose 2019-03-06

This study explores corruption in Rwanda and highlights the necessity of developing anti-corruption education as a way of combating corruption. It argues that an effective campaign against corruption should consider promoting

anti-corruption education with the aim of enabling present and future generations to maintain and live out the Ubupfura (meaning "trust/respect") ethical values. Considering the link between anti-corruption and peacebuilding efforts, as explained in this study, it is underlined that continuous efforts to raise such generations could undoubtedly move Rwandan society toward a sustainable peace.

Peacebuilders, anti-corruption agents, and public policymakers are the primary beneficiaries of the study.

The Philippine Archipelago -
