Lowry, Rawlings and Merkin's Insurance Law - Rob Merkin QC 2022-09-22

The 4th edition of this leading introductory text - now under the sole authorship of Rob Merkin QC - provides a detailed examination of the developing law of insurance, combining exposition of the law with critical analysis. The book is designed primarily for undergraduate and postgraduate students, but is also a useful resource for those in the insurance industry studying for professional examinations and legal practitioners who need a concise guide to the legal principles. The text is enhanced by extensive citations to case law and academic commentaries; and a new companion website delivers annual case law updates. This new edition has been substantially rewritten in light of the transformation of insurance law in recent years. The text has been revised to include new legislation and coverage of the effects of Brexit. However, the approach and - where possible - the analysis of John Lowry and Philip Rawlings have been retained. The first part of the book considers the regulation of insurance business and the general principles underlying the law of insurance contracts. The second part examines the way those principles are shaped by the context in which they operate. A new chapter with case studies on COVID-19, earthquakes, and mesothelioma applies the principles to the problems and uncertainties for insurance law revealed by catastrophic losses. This authoritative text offers a sound grasp of the

current realities of insurance practice.

Principles of Insurance Law - Jeffrey W. Stempel 2012-01-01

Over the past two decades, there have been a number of important developments in the areas of liability, property, and life and health insurance that have significantly changed insurance law. Accordingly, the Fourth Edition of *Principles of Insurance Law* has been substantially rewritten, reformatted, and refocused in order to offer the insurance law student and practitioner a broad perspective of both traditional insurance law concepts and cutting-edge legal issues affecting contemporary insurance law theory and practice. This edition not only expands the scope of topical coverage, but also segments the law of insurance in a manner more amenable to study, as well as facilitating the recombination and reordering of the chapters as desired by individual instructors. The Fourth Edition of *Principles of Insurance Law* includes new and expanded treatment of important insurance law developments, including:

- The critical role of insurance binders as temporary forms of insurance as illustrated in the World Trade Center property

insurance disputes resulting from the terrorist attacks of September 11, 2001; • The continuing debate between "legal formalists" and "legal functionalists" for "the heart and soul" of insurance contract law; • What constitutes a policyholder's "reasonable expectation" regarding coverage; • The current property and liability insurance "crisis"; • Risk management and self-insurance issues; • Emerging, and frequently conflicting, case law concerning the intersection of insurance law and federal anti-discrimination regulation; • Ongoing interpretive battles over the preemptive scope of ERISA; • The United States Supreme Court ruling that a California statute attempting to leverage European insurers into honoring commitments to Holocaust era policies is preempted by the Executive's power over foreign affairs; • The State Farm v. Campbell decision, which struck down a \$145 million punitive damages award in an insurance bad faith claim as well as setting more restrictive parameters for the recovery of punitive damages; • New issues over the dividing line between "tangible" property typically covered under a property insurance policy and "intangible" property, which is typically excluded - an issue of increasing importance in the digital and cyber age; • Refinement of liability insurance law regarding trigger of coverage, duty to defend, reimbursement of defense costs, and apportionment of insurer and policyholder responsibility for liability payments; • The difficult-to-harmonize decisions concerning when a loss arises out of the "use" of an automobile; • Insurer bad faith and the availability, if any, of actions against a policyholder for "reverse bad faith"; and • The degree to which excess insurance and reinsurance may be subject to modified approaches to insurance policy construction.

[Covid-19 and Insurance](#) - María Luisa Muñoz Paredes 2023-02-11

This book offers a novel study on the impact of the Covid-19 pandemic on insurance from an international and comparative perspective. It assesses how insurance has to adapt to a new landscape, the effects of which will last over time and cut across all areas of the field. To avoid physical contact, digitalisation has accelerated dramatically, affecting insurance in all its phases: risk selection, underwriting, pricing and claims settlement. However, the effects of the Covid-19 pandemic go far beyond that. The extent to which a claim caused directly or indirectly by the virus is or is not covered by a given policy has been the subject of debate in many insurance branches. The most litigated cases worldwide are those that concern damages resulting from business interruption due to restrictions enforced by the authorities in virtually every country. This book analyses the rulings (for and against the insured) that have already been handed down by courts in various jurisdictions (for example in the US, Latin America, Spain and Germany), in order to provide guidance to the parties in future lawsuits and also to guide the courts' own responses. This analysis extends to the measures that governments have taken in relation to insurance during the pandemic, as well as the changes that insurers have introduced in their general conditions to exclude coverage for the pandemic. This response is unsatisfactory, as the big question is how pandemic-related risks can be covered if private insurers simply refuse to do so. Solutions based on risk sharing with public entities or the use of contractual modalities such as parametric insurance are among those outlined by the authors. The book was written by experts from academia and lawyers specialising in this field, and written for all those interested in the field of insurance: lawyers, judges, academics and legal professionals.

Construction Accident Law - Marc M. Schneier 1999

Twenty years ago, there were 2500 lawyers in China, basically no legal system, and law schools and law libraries had either been closed or destroyed. It was one of the poorest countries in the world with an adult literacy rate of one-third. Today, illiteracy has dropped to below 10 per cent, consumption has more than doubled, and China has exploded as a major economic force in the global community, with the USA alone investing billions of dollars, aside from pursuing an increasing number of untapped markets. Now with more than 100,000 lawyers and mandated Rule of Law, China has enacted a multitude of new laws, regulations, and orders that must be understood if one wants to do any kind of foreign investment or trade in that country. This work is a guide to the complex laws of China. It opens with a survey of the historical development of China's contemporary legal system, and provides a summary of Chinese legislative and regulatory institutions and their functions. It also gives an overview of the judiciary and the many forces affecting China's evolving legal system.

Care Without Coverage - Institute of Medicine 2002-06-20

Many Americans believe that people who lack health insurance somehow get the care they

really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital-based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million-one in seven-working-age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

Property and Casualty Insurance Concepts Simplified - Christopher J. Boggs 2010

This book details key property and casualty concepts rarely discussed or found in print; rather they are often left to be "discovered" over time. These important concepts are now written

down for all insurance practitioners to easily access. Examples of the topics and concepts found in this book include rules for reading ANY insurance policy; why losses are excluded; contractual risk transfer; legal liability theories; "COPE" details; and the proper explanation of coinsurance concepts. Also included is a rather extensive glossary of insurance and insurance-related terms. Readers will: 1) Gain a deeper understanding of insurance theories; 2) Be better prepared to explain insurance concepts to their clients; and 3) Develop a greater appreciation and understanding of the claims valuation process.
