Medici Money - Tim Parks
2013-08-22

The Medici are famous as the rulers of Florence at the high point of the Renaissance. Their power derived from the family bank, and this book tells the fascinating, frequently bloody story of the family and the dramatic development and collapse of their bank (from Cosimo who took it over in 1419 to his grandson Lorenzo the Magnificent who presided over its precipitous decline). The Medici faced two apparently insuperable problems: how did a banker deal with the fact that the Church regarded interest as a sin and had made it illegal? How in a small republic like Florence could he avoid having his wealth taken away by taxation? But the bank became indispensable to the Church. And the family completely subverted Florence's claims to being democratic. They ran the city. **Medici Money** explores a

crucial moment in the passage from the Middle Ages to the Modern world, a moment when our own attitudes to money and morals were being formed. To read this book is to understand how much the Renaissance has to tell us about our own world. **Medici Money** is one of the launch titles in a new series, Atlas Books, edited by James Atlas. Atlas Books pairs fine writers with stories of the economic forces that have shaped the world, in a new genre - the business book as literature.

Pension Reform and the Development of Pension

Systems - Emily S. Andrews
2006

"Formal pension systems are an important means of reducing poverty among the aged. In recent years, however, pension reform has become a pressing matter, as demographic aging, poor administration, early retirement, and unaffordable benefits have strained pension balances and overall public finances. Pension systems have become a source of macroeconomic instability, a constraint to economic growth, and an ineffective and/or inequitable provider of retirement income."

Innocent Until Proven Muslim - Maha Hilal 2021-10-26

On September 11, 2001, nineteen terrorists hijacked four airplanes and carried out attacks on the United States, killing more than three thousand Americans and sending the country reeling. Three days after the attacks, President George W. Bush

declared, "This is a day when all Americans from every walk of life unite in our resolve for justice and peace." Yet in the days following, Bush declared a "War on Terror," which would result in years of Muslims being targeted on the basis of collective punishment and scapegoating. In 2009, President Barack Obama said, "America must play its role in ushering in a new era of peace." Instead, Obama perpetuated the War on Terror's infrastructure that Bush had put in place, rendering his words entirely empty. President Donald Trump's overtly Islamophobic rhetoric added fuel to the fire, stoking public fears to justify the continuation of the War his predecessors had committed to. In *Innocent Until Proven Muslim*, scholar and organizer Dr. Maha Hilal tells the powerful story of two decades of the War on Terror, exploring how the official narrative has justified the creation of a sprawling apparatus of state violence rooted in Islamophobia and excused its

worst abuses. Hilal offers not only an overview of the many iterations of the War on Terror in law and policy, but also examines how Muslim Americans have internalized oppression, how some influential Muslim Americans have perpetuated collective responsibility, and how the lived experiences of Muslim Americans reflect what it means to live as part of a "suspect" community. Along the way, this marginalized community gives voice to lessons that we can all learn from their experiences, and to what it would take to create a better future. Twenty years after the tragic events of 9/11, we must look at its full legacy in order to move toward a United States that is truly inclusive and unified.

Comics in Translation - Federico Zanettin 2015-12-22
Comics are a pervasive art form and an intrinsic part of the cultural fabric of most countries. And yet, relatively little has been written on the translation of comics. *Comics in Translation* attempts to

address this gap in the literature and to offer the first and most comprehensive account of various aspects of a diverse range of social practices subsumed under the label 'comics'. Focusing on the role played by translation in shaping graphic narratives that appear in various formats, different contributors examine various aspects of this popular phenomenon. Topics covered include the impact of globalization and localization processes on the ways in which translated comics are embedded in cultures; the import of editorial and publishing practices; textual strategies adopted in translating comics, including the translation of culture- and language-specific features; and the interplay between visual and verbal messages. *Comics in translation* examines comics that originate in different cultures, belong to quite different genres, and are aimed at readers of different age groups and cultural backgrounds, from Disney comics to Art Spiegelman's

Maus, from Katsuhiko Ōtomo's Akira to Goscinny and Uderzo's Astérix. The contributions are based on first-hand research and exemplify a wide range of approaches. Languages covered include English, Italian, Spanish, Arabic, French, German, Japanese and Inuit. The volume features illustrations from the works discussed and an extensive annotated bibliography. Contributors include: Raffaella Baccolini, Nadine Celotti, Adele D'Arcangelo, Catherine Delesse, Elena Di Giovanni, Heike Elisabeth Jüngst, Valerio Rota, Carmen Valero-Garcés, Federico Zanettin and Jehan Zitawi.

Moderns Abroad - Mia Fuller
2007-01-24

This volume studies the architecture and urbanism of modern-era Italian colonialism (1869-1943) as it sought to build colonies in North and East Africa and the eastern Mediterranean. Mia Fuller follows, not only the design of the physical architecture, but also the development of colonial design theory, based

on the assumptions made about the colonized, and also the application of modernist theory to both Italian architecture and that of its colonies. *Moderns Abroad* is the first book to present an overview of Italian colonial architecture and city planning. In chronicling Italian architects' attempts to define a distinctly Italian colonial architecture that would set Italy apart from Britain and France, it provides a uniquely comparative study of Italian colonialism and architecture that will be of interest to specialists in modern architecture, colonial studies, and Italian studies alike.

Graphic Justice - Thomas Giddens
2015-03-24

The intersections of law and contemporary culture are vital for comprehending the meaning and significance of law in today's world. Far from being unsophisticated mass entertainment, comics and graphic fiction both imbue our contemporary culture, and are themselves imbued, with the concerns of law and justice. Accordingly, and spanning a

wide variety of approaches and topics from an international array of contributors, *Graphic Justice* draws comics and graphic fiction into the range of critical resources available to the academic study of law. The first book to do this, *Graphic Justice* broadens our understanding of law and justice as part of our human world—a world that is inhabited not simply by legal concepts and institutions alone, but also by narratives, stories, fantasies, images, and other cultural articulations of human meaning. Engaging with key legal issues (including copyright, education, legal ethics, biomedical regulation, and legal personhood) and exploring critical issues in criminal justice and perspectives on international rights, law and justice—all through engagement with comics and graphic fiction—the collection showcases the vast breadth of potential that the medium holds. *Graphic Justice* will be of interest to academics and postgraduate students in: cultural legal studies; law and

the image; law, narrative and literature; law and popular culture; cultural criminology; as well as cultural and comics studies more generally.

Zero K - Don DeLillo

2016-05-03

A New York Times Notable Book A New York Times bestseller, “DeLillo’s haunting new novel, *Zero K*—his most persuasive since his astonishing 1997 masterpiece, *Underworld*” (The New York Times), is a meditation on death and an embrace of life. Jeffrey Lockhart’s father, Ross, is a billionaire in his sixties, with a younger wife, Artis Martineau, whose health is failing. Ross is the primary investor in a remote and secret compound where death is exquisitely controlled and bodies are preserved until a future time when biomedical advances and new technologies can return them to a life of transcendent promise. Jeff joins Ross and Artis at the compound to say “an uncertain farewell” to her as she surrenders her body. “We are born without choosing to be.

Should we have to die in the same manner? Isn't it a human glory to refuse to accept a certain fate?" These are the questions that haunt the novel and its memorable characters, and it is Ross Lockhart, most particularly, who feels a deep need to enter another dimension and awake to a new world. For his son, this is indefensible. Jeff, the book's narrator, is committed to living, to experiencing "the mingled astonishments of our time, here, on earth." Don DeLillo's "daring...provocative...exquisite" (The Washington Post) new novel weighs the darkness of the world—terrorism, floods, fires, famine, plague—against the beauty and humanity of everyday life; love, awe, "the intimate touch of earth and sun." "One of the most mysterious, emotionally moving, and rewarding books of DeLillo's long career" (The New York Times Book Review), Zero K is a glorious, soulful novel from one of the great writers of our time.

The Years of Alienation in Italy

- Alessandra Diazzi 2019-06-11
The Years of Alienation in Italy offers an interdisciplinary overview of the socio-political, psychological, philosophical, and cultural meanings that the notion of alienation took on in Italy between the 1960s and the 1970s. It addresses alienation as a social condition of estrangement caused by the capitalist system, a pathological state of the mind and an ontological condition of subjectivity. Contributors to the edited volume explore the pervasive influence this multifarious concept had on literature, cinema, architecture, and photography in Italy. The collection also theoretically reassesses the notion of alienation from a novel perspective, employing Italy as a paradigmatic case study in its pioneering role in the revolution of mental health care and factory work during these two decades.

University and School Collaborations during a Pandemic - Fernando M.

Reimers 2021-11-05

Based on twenty case studies

of universities worldwide, and on a survey administered to leaders in 101 universities, this open access book shows that, amidst the significant challenges caused by the COVID-19 pandemic, universities found ways to engage with schools to support them in sustaining educational opportunity. In doing so, they generated considerable innovation, which reinforced the integration of the research and outreach functions of the university. The evidence suggests that universities are indeed open systems, in interaction with their environment, able to discover changes that can influence them and to change in response to those changes. They are also able, in the success of their efforts to mitigate the educational impact of the pandemic, to create better futures, as the result of the innovations they can generate. This challenges the view of universities as “ivory towers” being isolated from the surrounding environment and detached

from local problems. As they reached out to schools, universities not only generated clear and valuable innovations to sustain educational opportunity and to improve it, this process also contributed to transform internal university processes in ways that enhanced their own ability to deliver on the third mission of outreach.

Cognitive Linguistics -

Vyvyan Evans 2018-10-24

A general introduction to the area of theoretical linguistics known as cognitive linguistics, this textbook provides up-to-date coverage of all areas of the field, including recent developments within cognitive semantics (such as Primary Metaphor Theory, Conceptual Blending Theory, and Principled Polysemy), and cognitive approaches to grammar (such as Radical Construction Grammar and Embodied Construction Grammar). The authors offer clear, critical evaluations of competing formal approaches within theoretical linguistics. For example, cognitive

linguistics is compared to Generative Grammar and Relevance Theory. In the selection of material and in the presentations, the authors have aimed for a balanced perspective. Part II, Cognitive Semantics, and Part III, Cognitive Approaches to Grammar, have been created to be read independently. The authors have kept in mind that different instructors and readers will need to use the book in different ways tailored to their own goals. The coverage is suitable for a number of courses. While all topics are presented in terms accessible to both undergraduate and graduate students of linguistics, cognitive linguistics, psycholinguistics, cognitive science, and modern languages, this work is sufficiently comprehensive and detailed to serve as a reference work for scholars who wish to gain a better understanding of cognitive linguistics.

Crisis in the Global Economy - Andrea Fumagalli
2010-04-09

Crisis in the Global Economy is the latest and most innovative collective reflection on the state of global capitalism, developed in the mobile "multiversity" of the UniNomadenetwork of international researchers and activists during the months immediately following the first signals of the current financial and economic crisis. It constitutes the first organic and interdisciplinary attempt to analyze a crisis that is not merely financial in nature but implicates globalization and neoliberal capitalism. Crisis in the Global Economy begins with the recognition that the current financial crisis is a systemic crisis of the entire capitalistic system as it has been developing since the 1890s. Taking as its premise that today's financial markets are the pulsing heart of cognitive capitalism, financing the activity of accumulation, Crisis in the Global Economy shows how the flow of capital rewards production that exploits knowledge and controls spaces beyond traditional business. The

ineffectiveness of the extraordinary economic measures taken by single nation-states over the past few months demonstrates that this crisis is of a completely different order. A financial crisis that affects the "real economy" shows that financialization is one of the most recent and perverse articulations of capitalism. The contributions to *Crisis in the Global Economy* invite us to consider exit strategies from the current crisis--strategies that may lead us toward a new horizon of constructing the common.

Organised Crime in Europe - Cyrille Fijnaut 2007-01-21
This volume represents the first attempt to systematically compare organised crime concepts, as well as historical and contemporary patterns and control policies in thirteen European countries. These include seven 'old' EU Member States, two 'new' members, a candidate country, and three non-EU countries. Based on a standardised research protocol, thirty-three experts from different legal and social disciplines provide insight through detailed country reports. On this basis, the editors compare organised crime patterns and policies in Europe and assess EU initiatives against organised crime.

Decentralizing Revenue in Latin America - Vicente Fretes Cibils 2015-04-13

This book analyzes the reasons for lackluster performance selected Latin American

countries in mobilizing subnational own-source revenues and explores policy options to increase these revenues as efficiently and equitably as possible. Seven case studies--Argentina, Bolivia, Brazil, Colombia, Mexico, Peru, and Venezuela--span a wide range of characteristics, including federal and unitary countries, different geographical sizes, levels of economic development, and degrees of revenue decentralization. In this book, subnational governments include both intermediate and local levels of government, which are distinguished in the case studies. Together, the case studies provide a reasonably representative picture of the challenges faced throughout Latin America in mobilizing subnational own-source revenues in a manner that supports equitable growth.

Mafiacraft - Deborah Puccio-Den 2020-01-14

The Mafia? What is the Mafia? Something you eat? Something you drink? I don't know the

Mafia. I have never seen it.? So said Mommo Piromalli, a ?Ndrangheta crime boss, to a journalist in the seventies. In *Mafiacraft*, Deborah Puccio-Den explores the Mafia's reliance on the force of silence, and undertakes a new form of ethnographic inquiry that focuses on the questions, rather than the answers. For Puccio-Den, the Mafia is not a stable social fact, but a cognitive event shaped by actions of silence. Rather than inquiring about what has previously been written or said, she explores the imaginative power of silence and how it gives consistency to special kinds of social ties that draw their strength from a state of indetermination. What methods might anthropologists use to investigate silence and to understand the life of the denied, the unspeakable, and the unspoken? How do they resist, fight, or capitulate to the strength of words, or to the force of law? In *Mafiacraft*, Puccio-Den's addresses these questions with a fascinating anthropology of silence that

opens up new ground for the study of the world's most famous criminal organization. Metropolitan Growth and Migration in Peru - Gunnar Malmberg 1988

Constructing Us - Miguel A. Aijón Oliva 2019-07-08

Developments in the analysis of linguistic variation show the need for a theoretical model whereby variants are viewed as cognitively-based communicative choices. In this book, the analysis of the first and second grammatical persons in Spanish media discourse illustrates an approach to linguistic structure and usage as motivated by the need to create meaning at all semiotic levels. Rather than mere sets of deictic forms, persons constitute arrays of functional strategies used by speakers to develop certain representations of themselves and others. The degree of salience attributed to some participant through grammatical configuration - including features like person, way of formulation and syntactic function - strongly conditions the discursive role of that participant, as well as the communicative situation at large. Methodologically, the

demonstration conjugates the analysis of quantitative usage patterns with that of specific instances of choice, in order to elucidate the stylistic potential of syntactic forms in media contexts. Understanding variation as the construction of meaning is essential to the scientific advancement of linguistics as an inherently social and cognitive discipline. *State Martyr* - Baldassare Scolari 2019-06

Der Politiker Aldo Moro wurde 1978 von der terroristischen Organisation "Rote Brigaden" entführt und getötet. Im Verlauf der Ereignisse stilisierten die Medien Moro zum "Staatsmartyrer". Der Band geht der hochaktuellen Frage nach, welche Rolle das ursprünglich christliche Konzept des Martyrers in der Spannung zwischen demokratischem Staat und Terrorismus spielt. Was leistet dieser Begriff aus der christlichen Antike im modernen gesellschaftspolitischen Diskurs? Welche Veränderungen hat der

Terminus "Martyrer" in der Europäischen Religions- und Kulturgeschichte durchgemacht? Anhand von medialen Quellen zum Fall Moro wird eine wesentliche Phase der nachkriegszeitlichen Politik in Italien rekonstruiert. Die Studie eröffnet einen interdisziplinär angelegten theoretischen Horizont, um die Rolle religiöser Motive im gesellschaftspolitischen Kontext zu verstehen. Sie bringt eine zentrale neue Dimension in die Sakularisierungsdebatte ein, bei der Sakularisierung als neue Konfiguration von Politik und Religion verstanden wird.

A Socialist Empire - Louis Baudin 2011-08
2011 Reprint of 1961 Edition. Many social scientists have attempted to lump the unique Inca society into modern political and economic categories. Louis Baudin argued that Incan society was socialistic. He claimed that the ayllu system is what classified the Inca as a system of state socialism. Baudin defines state socialism as being based on the

idea of the regulative action of a central power in social relations. According to Baudin, the idea of private property in Europe had been in existence for centuries, but no such idea existed at the times of the Incas. He claims, that society in Peru rested on a foundation of collective ownership which, to a certain extent, facilitated its establishment, because the effacement of the individual within a group prepared him to allow himself to be absorbed. Baudin argued that the higher ranking Incas tried, and succeeded to an extent, to force a degree of uniformity on the common Inca. The Inca were forced to dress similarly, eat the same food, practice the same religion, and speak the same language, Quechua.

Innovation and Transition in Law: Experiences and Theoretical Settings -

This book features a discussion on the modernisation of law

and legal change, focusing on the key concepts of innovation" and "transition". These concepts both appear to be relevant and poorly defined in contemporary legal science. A critical reflection on the heuristic value of these categories seems appropriate, particularly considering their dyadic value. While innovation is increasingly appearing in the present day as being the category in which one looks at the modernisation of law, the concept of transition also seems to be the privileged place of occurrence for such dynamics. This group of Italian and Brazilian scholars contributing to this volume intends to investigate such problems through an interdisciplinary prism. It includes points of view both internal to legal studies - such as the history of law, theory of law, constitutional law, private law and commercial law - and external, such as political philosophy and history of justice and political institutions.

Children of Austerity - Bea

Cantillon 2017

The 2008 financial crisis triggered the worst global recession since the Great Depression. Many OECD countries responded to the crisis by reducing social spending. Through 11 diverse country case studies (Belgium, Germany, Greece, Hungary, Ireland, Italy, Japan, Spain, Sweden, United Kingdom, and the United States), this volume describes the evolution of child poverty and material well-being during the crisis, and links these outcomes with the responses by governments. The analysis underlines that countries with fragmented social protection systems were less able to protect the incomes of households with children at the time when unemployment soared. In contrast, countries with more comprehensive social protection cushioned the impact of the crisis on households with children, especially if they had implemented fiscal stimulus packages at the onset of the crisis. Although the macroeconomic 'shock' itself

and the starting positions differed greatly across countries, while the responses by governments covered a very wide range of policy levers and varied with their circumstances, cuts in social spending and tax increases often played a major role in the impact that the crisis had on the living standards of families and children.

A. P. Giannini - Francesca Valente 2018-02

Envisioning a socio-economic utopia, A. P. Giannini was not a typical banking tycoon. With a socially enlightened heart, he made the American dream a reality. Founding the Bank of Italy for poor immigrant families, he wanted to overcome the barriers put in place by the banking elite to fulfill the dreams of "little guys."

The (Mis)Behaviour of Markets - Benoit B. Mandelbrot 2010-10-01

This international bestseller, which foreshadowed a market crash, explains why it could happen again if we don't act now. Fractal geometry is the

mathematics of roughness: how to reduce the outline of a jagged leaf or static in a computer connection to a few simple mathematical properties. With his fractal tools, Mandelbrot has got to the bottom of how financial markets really work. He finds they have a shifting sense of time and wild behaviour that makes them volatile, dangerous - and beautiful. In his models, the complex gyrations of the FTSE 100 and exchange rates can be reduced to straightforward formulae that yield a much more accurate description of the risks involved.

A triumph of failed ideas: European models of capitalism in the crisis -

Steffen Lehndorff 2012
The current crisis in Europe is being labelled, in mainstream media and politics, as a 'public debt crisis'. The present book draws a markedly different picture. What is happening now is rooted, in a variety of different ways, in the destabilisation of national models of capitalism due to the

predominance of neoliberalism since the demise of the post-war 'golden age'. Ten country analyses provide insights into national ways of coping - or failing to cope - with the ongoing crisis. They reveal the extent to which the respective socio-economic development models are unsustainable, either for the country in question, or for other countries. The bottom-line of the book is twofold. First, there will be no European reform agenda at all unless each country does its own homework. Second, and equally urgent, is a new European reform agenda without which alternative approaches in individual countries will inevitably be suffocated. This message, delivered by the country chapters, is underscored by more general chapters on the prospects of trade union policy in Europe and on current austerity policies and how they interact with the new approaches to economic governance at the EU level. These insights are aimed at

providing a better understanding across borders at a time when European rhetoric is being used as a smokescreen for national egoism.

Access to Financial Services in Brazil - Anjali Kumar 2005

It examines different aspects of financial service provision, and explores approaches to address problems of financial exclusion. Topics discussed include: microfinance schemes; private banking; rural finance systems; institutional infrastructure; and the role of government policy.

Italian Fascism and Developmental Dictatorship -

A. James Gregor 2014-07-14
Political scientists generally have been disposed to treat Italian Fascism--if not generic fascism--as an idiosyncratic episode in the special history of Europe. James Gregor contends, to the contrary, that Italian Fascism has much in common with an inclusive class of developmental revolutionary regimes. Originally published in 1980. The Third Industrial Revolution - Jeremy Rifkin
2011-10-04

The Industrial Revolution, powered by oil and other fossil fuels, is spiraling into a dangerous endgame. The price of gas and food are climbing, unemployment remains high, the housing market has tanked, consumer and government debt is soaring, and the recovery is slowing. Facing the prospect of a second collapse of the global economy, humanity is desperate for a sustainable economic game plan to take us into the future. Here, Jeremy Rifkin explores how Internet technology and renewable energy are merging to create a powerful "Third Industrial Revolution." He asks us to imagine hundreds of millions of people producing their own green energy in their homes, offices, and factories, and sharing it with each other in an "energy internet," just like we now create and share information online. Rifkin describes how the five-pillars

of the Third Industrial Revolution will create thousands of businesses, millions of jobs, and usher in a fundamental reordering of human relationships, from hierarchical to lateral power, that will impact the way we conduct commerce, govern society, educate our children, and engage in civic life. Rifkin's vision is already gaining traction in the international community. The European Union Parliament has issued a formal declaration

calling for its implementation, and other nations in Asia, Africa, and the Americas, are quickly preparing their own initiatives for transitioning into the new economic paradigm. The Third Industrial Revolution is an insider's account of the next great economic era, including a look into the personalities and players — heads of state, global CEOs, social entrepreneurs, and NGOs — who are pioneering its implementation around the world.
