**South African Language Rights Monitor 2005** - Lombaard Susan (author) 2011-09-01

The South African Language Rights Monitor (SALRM) Project surveys the mainstream newspapers of South Africa with a view to compile annual reports on the developments on the language front in the country.

While the main focus is on language rights and language (rights) activism, the yearly Monitor also covers other language-related problems, including name changes and aspects of language promotion.

**Sustainable Bioeconomy** - V. Venkatramanan 2020-11-06

Sustainable development is the most important challenge facing humanity in the 21st century. The global economic growth in the recent past has indeed exhibited marked progress in many countries. Nevertheless, the issues of income disparity, poverty, gender gaps, and malnutrition are not uncommon in the global landscape, in spite of the upward growth of the economy and technological advances. This grim picture is further exacerbated by our growing human population, unmindful resource use, ever-increasing consumption trends, and changing climate. In order to protect humanity and preserve the planet, the United Nations issued the "2030 agenda for sustainable development," which includes but is not limited to sustainable production and consumption practices, e.g. in a sustainable bioeconomy. The hallmark of the sustainable bioeconomy is a paradigm shift from a fossil-fuel-based economy to a biological-based one, which is driven by the virtues of sustainability, efficient utilization of resources, and "circular economy." As the sustainable bioeconomy is based on the efficient utilization of biological resources and societal transformations, it holds the immense potential to achieve the UN's Sustainable Development Goals. This book shares valuable insights into the linkages between the sustainable bioeconomy and Sustainable Development Goals, making it an essential read for policymakers, researchers and students of environmental studies.

*From Defence to Development* - Penny Mckenzie 2014-05-28

Remember the global peace dividend - the budget surpluses that were supposed to result from the raising of the Iron Curtain and the end of the arms race? As war-torn societies in the Middle East, Latin America, and parts of Africa found peace and began building democratic societies, governments were supposed to use the money they once spent on the military to better meet basic human needs. But has it happened?
