How do you tell your boyfriend of three years you are moving to Alaska without him? Like the ocean, the waves of this story may carry you through from beginning to end, or you may flip freely to gather just what you need. Apply these words to your own narrative. Reach for these poems as you would a favorite song, to bend meaning in whatever direction your heart desires. This is heartbreak and self-love. This is trial and error. This is everything I have felt since I was seventeen. I have done my best to craft you a cup of tea conversation to be shared and sipped. I am offering my heart to you so, should you need it, you might be able to tend to your own.

Narrative Methods for the Human Sciences - Catherine Kohler Riessman 2008

"Cathy Riessman is the leading figure in narrative research and her new book is a delight. Covering basic issues of transcription and research credibility as well as visual data and engagingly written, it is a goldmine for students and researchers alike. If we want to make narrative research serious and revealing, it is to this book that we should turn." —David Silverman, Professor Emeritus, Goldsmiths' College, University of London "Narrative Methods for the Human Sciences provides an accessible framework for researchers — to analyse narrative texts with confidence, empathy, and humility. —NARRATIVE INQUIRY "This is a terrific book. Cathy Riessman has an encyclopedic knowledge of this field and of the participants in it. This breadth and depth of knowledge is abundantly clear throughout the book." —Susan Bell, Bowdoin College "This book has been a great source of inspiration to me and my students, not only for its methodological clarity, but also for the spirit of social activism it engenders." —Ian Baptiste, The Pennsylvania State University "Narrative Methods for the Human Sciences is an essential starting point for both students and experienced researchers interested in using narrative analysis in applied or other contexts. Written with admirable clarity, an engaging style, and supported by detailed examples of analysis, the book outlines the main methodological issues and approaches within the exciting and fast-developing field of narrative research. Even researchers already familiar with narrative methods should find the presentation of thematic, structural,

dialogic/performance, and visual forms of analysis a fruitful stimulus to new research endeavours." —Brian Roberts, University of Central Lancashire, U.K. "I just had to thank you for paving the path for us new and 'hopeful' narrative researchers. I have been a student of both your books on narrative analysis, and want to thank you for your guidance from your work, and also your latest book Narrative Methods for the Human Sciences. This work and the references you have chosen for us have helped me immensely during this time in my doctoral program, especially as I enter into the analysis phase." —Maria T. Yelle, nursing doctoral candidate, University of Wisconsin-Madison Narrative Methods for the Human Sciences provides a lively overview of research based on constructing and interpreting narrative. Designed to improve research practice, it gives a detailed discussion of four analytic methods that students can adapt. Author Catherine Kohler Riessman explains how to conduct the four kinds of narrative analysis using model studies from sociology, anthropology, psychology, education and nursing. Throughout the book, she compares different approaches including thematic analysis, structural analysis, dialogic/performance analysis, and visual narrative analysis. The book helps students confront specific issues in their research practice, including how to construct a transcript in an interview study; complexities of working with materials translated from another language; defining narrative segments; relating text and context; locating oneself as the researcher in a responsible way in an inquiry; and arguing for the credibility of the case-based approach. Broad in scope, Narrative Methods for the Human Sciences also offers concrete guidance in individual chapters for students and established scholars wanting to join the "narrative turn" in social research. Key Features Focuses on four particular methods of narrative analysis: This text provides specific diverse exemplars of good narrative research, as practiced in several social science and [Catalog of Copyright Entries. Once We Were Sisters - Sheila Kohler 2017-01-17

ONE OF PEOPLE MAGAZINE'S BEST NEW BOOKS "A searing and intimate memoir about love turned deadly." —The BBC "An intimate illumination of sisterhood and loss." —People When Sheila Kohler was thirty-seven, she received the heart-stopping news that her sister

Maxine, only two years older, was killed when her husband drove them off a deserted road in Johannesburg. Stunned by the news, she immediately flew back to the country where she was born, determined to find answers and forced to reckon with his history of violence and the lingering effects of their most unusual childhood—one marked by death and the misguided love of their mother. In her signature spare and incisive prose, Sheila Kohler recounts the lives she and her sister led. Flashing back to their storybook childhood at the family estate, Crossways, Kohler tells of the death of her father when she and Maxine were girls, which led to the family abandoning their house and the girls being raised by their mother, at turns distant and suffocating. We follow them to the cloistered Anglican boarding school where they first learn of separation and later their studies in Rome and Paris where they plan grand lives for themselves—lives that are interrupted when both marry young and discover they have made poor choices. Kohler evokes the bond between sisters and shows how that bond changes but never breaks, even after death. "A beautiful and disturbing memoir of a beloved sister who died at the age of thirty-nine in circumstances that strongly suggest murder. . . . Highly recommended." —Joyce Carol Oates [Old-House Journal](#) - 1976-07
