The Finest Blend - Gale Parchoma 2020-10-30

As Canadian universities work to increase access to graduate education, many are adopting blended modes of delivery for courses and programs. Within this changing landscape of higher education, The Finest Blend answers the call for rigorous research into these methods to ensure quality learning and teaching experience and presents case studies of French and English universities across Canada that are experimenting with blended learning models in graduate programs. Drawing on various research methods, the contributors to the volume investigate the sustainability of blended learning, shifts in pedagogical practices, and the role of instructional designers. They share key practices for both graduate students and instructors and emphasize the importance of institutional and departmental support for both students and faculty transitioning to blended delivery modes. Touching on theory, design, delivery, facilitation, administration, and evaluation, this book provides a comprehensive overview of current practices and opportunities for blended learning success. With contributions by Alicia Adlington, Shaily Bhola, Denise Carew, Jane Costello, Daph Crane, Jane Hanson, Michael Fairbrother, Wendy Kraglund-Gauthier, Shehzad Ghani, Michele Jacobsen, Carol Johnson, Sawsen Lakhali, Yang (Flora) Liu, Dorothea Nelson, Pam Phillips, Marlon Simmons, Kathy Snow, Maurice Taylor, and Jay Wilson.

**Good Quality Practice (GQP) in Pharmaceutical Manufacturing: A Handbook** - Jordi Botet 2015-09-28

Pharmaceutical manufacturing can be viewed as a supply chain which spans from the production and purchase of the starting and packaging materials through the manufacture of dosage forms until the safe reception of the finished product by the patient. The entire chain comprises of several processes: auditing, materials purchase (procurement), production, storage, distribution, quality control, and quality assurance. The quality standard for pharmaceutical production is 'current good manufacturing practice (CGMP)', which is applied within the frame of a pharmaceutical quality system (PQS). This implementation, however, requires a scientific approach and has to take into account several elements such as risk assessment, life cycle, patient protection, among other factors. Hence, pharmaceutical manufacturing is a complex subject in terms of regulation, given the technical and managerial requirements. This comprehensive handbook describes CGMP for new professionals who want to understand and apply the elements which build up pharmaceutical quality assurance. The book gives details about basic quality control requirements (such as risk management, quality hazards and management systems, documentation, clean environments, personnel training) and gives guidelines on regulatory aspects. This is an ideal handbook for undergraduates

studying pharmaceutical or industrial manufacturing and supply chains as well for entrepreneurs and quality control professionals seeking to learn about CGMP standards and implementing quality assurance systems in the pharmaceutical sector.

*Ten years of the Vienna Initiative 2009-2019* - European Investment Bank 2019-12-19

This year, the Vienna Initiative marks its 10th anniversary. For this special occasion, the Steering Committee has prepared a commemorative book, with essays and contributions from the key actors and institutions instrumental to the work of the Vienna Initiative since its inception. This volume provides a unique window on the Vienna Initiative's innovative crisis mitigation activities, its subsequent evolution and its current

scope. At the time of the Lehman crisis, international institutions, national authorities and international commercial banks collaborated closely, taking full responsibility for their strategies in the CESEE region and voluntarily providing firm commitments on their activities. In the form of the Vienna Initiative, they built a functioning coordination platform, capable of transforming and evolving according to changing needs. Ten years later, this coordination platform remains an important of effective inter-institutional and private-private sector cooperation. The establishment of the Vienna Initiative was far from easy. However, given the size of euro area banks' cross-border operations in CESEE, a disorderly deleveraging would have been very costly for both CESEE countries and the foreign banks. With this in mind, the main stakeholders eventually got together to participate in the Vienna Initiative and achieve its main objective. The foreign banking groups committed to maintain their presence in the region, while the EIB, EBRD and the World Bank Group provided substantial financing to banks and the real economy. These efforts had a major positive impact on the region. They helped curb liquidity disruptions and restore confidence in the banking system, while alleviating balance of payments pressures. This coordinated response from commercial banks and IFIs was a prerequisite for the success of the IMF-funded macroeconomic adjustment programs in several CESEE countries. Over time, the Vienna Initiative has transformed itself from a crisis mitigation instrument to a broader coordination platform, dealing with the unique challenges of widespread cross-border banking with regulatory and supervisory interdependence, while supporting the emergence of an efficient, deep and sound banking and financial sector that supports growth in the region. In particular, with CESEE countries on a solid recovery path, the focus has shifted to tackling the legacy problem of high NPLs, or to dealing with the impact of the EU's upgraded institutional framework - particularly the creation of the Banking Union - on the host countries, most of which do not participate in the Banking Union. With the region needing to transform, up-scale its innovation capabilities and adjust to technological change, a dedicated working group has been set up to propose measures that could improve access to finance for innovative firms which typically lack tangible assets and thus may have hard time obtaining standard bank loans in a system that still offers limited alternatives. The Vienna Initiative has been a major achievement of international coordination and an important instrument for the future of the CESEE region.

Paediatric Formulation - Nunzio Denora 2021-09-02

The development of paediatric medicines can be challenging since this is a different patient population with specific needs. A medicine designed for use in paediatric patients must consider the following aspects: patient population variability; the need for dose flexibility; route of administration; patient compliance; excipient tolerability. For example, the toxicity of excipients may differ in children compared to adults and children have different taste preferences. Globally, about 75% of drugs do not carry regulatory approval for use in children; worldwide, many medications prescribed for the treatment of paediatric diseases are used off-label, and less than 20% of package inserts have sufficient information for treating children. This book provides an update on both state-of-the-art methodology and operational challenges in paediatric formulation design and development. It aims at re-evaluating what is needed for more progress in the design and development of age-appropriate treatments for paediatric diseases, focusing on: formulation development; drug delivery design; efficacy, safety, and tolerability of drugs and excipients.

**Agricultural and Agribusiness Law** - Theodore A. Feitshans  
2015-10-05

This introductory textbook provides an overview of the concepts necessary for an understanding of agricultural and agribusiness law. The text will help students of land-based industries with little or no legal background to appreciate and identify issues which may require referral or consultation with legal counsel. Each concise chapter addresses a different legal issue that those employed in agriculture and agribusiness may face, and both federal law and representative examples of state law are included. In addition to traditional topics such as contracts, property law and estate planning, the book also covers more contemporary issues such as organic certification, animal law, genetically engineered crops and food safety. Agricultural law extends beyond those directly engaged in farming to those in agribusiness who provide services and inputs to farmers, buy farmers' products, store or transport products, manufacture food products, and serve as intermediaries between farmers and consumers. The book will therefore also serve as a reference and a guide for those employed in agribusiness as well as agriculture.

*The Right to Food Guidelines, Democracy and Citizen Participation* - Katharine S. E. Cresswell Riol  
2016-11-10

It is now more than a decade since the Right to Food Guidelines were negotiated, agreed and adopted internationally by states. This book provides a review of its objectives and the extent of success of its

implementation. The focus is on the first key guideline - "Democracy, good governance, human rights and the rule of law" - with an emphasis on civil society participation in global food governance. The five BRICS countries (Brazil, Russia, India, China and South Africa) are presented as case studies: representing major emerging economies, they blur the line between the Global North and South, and exhibit different levels of human rights realisation. The book first provides an overview of the right to adequate food, accountability and democracy, and an introduction to the history of the development of the right to adequate food and the Right to Food Guidelines. It presents a historical synopsis of each of the BRICS states' experiences with the right to adequate food and an analysis of their related periodic reporting to the Committee on Economic, Social and Cultural Rights, as well as a specific assessment of their progress in regard to the first guideline. The discussion then focuses on the effectiveness of the Right to Food Guidelines as both a policy-making and monitoring tool, based on the analysis of the guidelines and the BRICS states.

*Understanding the Australian Health Care System* - Eileen Willis  
2016-04-14

In this third edition of *Understanding the Australian Health Care System*, authors Eileen Willis, Louise Reynolds and Helen Keleher introduce the reader to the key issues and theoretical concepts that provide insight into the way the Australian health care system is organised and how policy change impacts the health care profession. The third edition has been comprehensively revised, but continues to focus on the role and function of the health professional working within the Australian health care system. Fifteen health disciplines are considered in this new edition, with an emphasis on interprofessional practice and the social determinants of health. New chapters on workers' compensation systems, oral health and dental services, clinical exercise physiology and pharmacy Significantly expanded glossary Up-to-date information on the most recent Australian health reforms Case studies on all of the major health care professions in Australia, including nurses, midwives, speech pathologists, audiologists, health managers, paramedics, social workers, dietitians, doctors (GPs), occupational therapists, physiotherapists, dentists and oral therapists, exercise physiologists, pharmacists and homeopaths A suite of video interviews with multidiscipline practitioners and thought leaders exploring aspects of Australian health care, theories and challenges now and for the future.

*Maldives People's Majlis Election, 22 March 2014* - Commonwealth Observer Group  
2014-07-15

The report of the Commonwealth Observer Group for Maldives parliamentary election held on 22 March 2014. The Group was chaired by Bruce Golding, the former Prime Minister of Jamaica, and was comprised of 7 members in total. The Commonwealth Observer Group found that the polls were well organised and well managed, with all stakeholders playing their respective roles in ensuring that polling was peaceful and credible. However, the group was concerned by the Supreme Court's declared dismissal of the chair and vice chair of the Election Commission for contempt of court, which undermined the separation of powers provided for in the Maldivian constitution, as well as reports of widespread vote buying and the lack of effective regulation of campaign financing.

*Pharmaceutical Market Access in Emerging Markets* - Güvenç Koçkaya 2016-10-20

The definition of Market Access was first reported by the World Trade Organization as "to open markets for trade and improve transparency, reciprocity, and non-discrimination in international trade".

Pharmaceutical Market Access is different and it could be defined as achieving the optimal price for a product or service and/or the maximum reimbursement for the approved target population with no restrictions on funding for the medical technology. By the way, Market Access is not only the market authorization, but it also includes overlapping activities like pricing, health technology assessment, formulary, and reimbursement. Market Access is one of the most important activities for pharmaceutical companies and emerging countries represent an important opportunity for launching new products. It was reported that the Compounded Average Growth Rate (CAGR) was 6.0% in the period 2011-2017, and expected sales exceeding 1.1 trillion USD by 2017 for emerging countries. Furthermore, CAGR 2008-2012 for recently launched pharmaceuticals were 9.8% for emerging countries and 1.5% for the top 8 developed countries. The Market Access processes in the most important emerging countries in the selected regions are defined in this book with the aim to help local experts, local government officers, headquarter managements, and everyone who want to learn more about healthcare system and health policies pathways of Market Access, mapping and structure of decision makers, challenges and catalyzers for Market Access in the emerging countries.

**Pharmaceutical Product Development** - Vandana B. Patravale 2016-05-25

Pharmaceutical product development is a multidisciplinary activity involving extensive efforts in systematic product development and optimization in compliance with regulatory authorities to ensure the quality, efficacy and safety of resulting products. Pharmaceutical Product Development equips the pharmaceutical formulation scientist with extensive and up-to-date knowledge of drug product development and covers all steps from the beginning of product conception to the final packaged form that enters the market and lifecycle management thereof. Applications of core scientific principles for product development are also thoroughly discussed in conjunction with the latest approaches involving design of experiment and quality by design with comprehensive illustrations based on practical case studies of several dosage forms. The book presents pharmaceutical product development information in an easy-to-read mode with simplified theories, case studies and guidelines for students, academicians and professionals in the pharmaceutical industry. It is an invaluable resource and hands-on guide covering managerial, regulatory and practical aspects of pharmaceutical product lifecycle management.

**Child Guidance Centres in Japan** - Michael Rivera King 2020-10-26

In contemporary Japan, 85% of children in alternative care remain housed in large welfare institutions, as opposed to family-based foster care. This publication examines how Japan has been isolated from global discourse on alternative care, urging a shift in social work and alternative care policies. As the first ethnographic account from inside child guidance centres, it makes a key contribution towards understanding the closed world of Japan's social services; including the decision-making processes by which a child is removed from the family and placed into care. In addition, regional variation in policy

implementation for alternative care is outlined, with reference to detailed case studies and a discussion around organisational cultures of the child guidance centres. Where foster care is constructed as anything other than professional, it is often seen as a threat to the child's family-bond with their natal parent and therefore not used. Child Guidance Centres in Japan destabilises this construction of the family-bond as singular and discrete, highlighting new practices in alternative care. *Child Guidance Centres in Japan: Alternative Care and the Family* will be a vital resource for students, scholars of social work and Japanese studies, as well as practitioners and lobbyists involved in alternative care.

[EU Securities and Financial Markets Regulation](#) - Niamh Moloney 2014-10-24

The Global Financial Crisis has re-ordered how the EU intervenes in the EU financial market, both with respect to regulation and with respect to supervision. After 5 years of a behemoth reform agenda, the new landscape is now clear. Rule-making power has decisively moved to the EU and radical reforms have been made to the organization of supervision. EU Securities and Financial Markets Regulation provides the first comprehensive, critical, and contextual account of the vast new rule-book which now applies to the EU financial market in the aftermath of the seismic reforms which have followed the financial crisis. Topics covered in-depth include the AIFMD, EMIR, the Short Selling Regulation, the new market abuse and transparency regimes, the rating agency regime, the UCITS IV-VI reforms, and MiFID II/MiFIR; the analysis is wide-reaching, extending to secondary legislation and relevant soft law. The book also examines the far-reaching institutional changes which have followed and considers in detail the role and impact of the European Securities and Markets Authority and the potential impact of the Single Supervisory Mechanism for euro area banks on the supervision of the EU financial market. EU Securities and Financial Markets Regulation is the third edition of the highly successful and authoritative monograph first published as EC Securities Regulation. Almost entirely recast and re-written from the 2008 second edition to reflect the changes wrought by the Global Financial Crisis, it adopts the in-depth contextual and analytical approach of earlier editions and so considers the market, political, international, institutional, and constitutional context of the new regulatory and supervisory regime, and the underlying forces which have (and will continue to) shape it.

The third edition of EU Customs Law provides a fully updated treatment of legislation, new treaties and cases in the two courts of the EU especially but also in Member States. This volume also includes commentary on the Union Customs Code and secondary legislation, and increased coverage of areas such as the wider role of customs authorities apart from the collection of customs duty, such as security of goods and post 9/11 developments generally, the history of customs unions and their implications for governments, non-EU customs unions to which EU law is relevant, and the inter-relation between customs duty and direct tax.

Capturing Social and Behavioral Domains and Measures in Electronic Health Records - Institute of Medicine 2015-01-08

Determinants of health - like physical activity levels and living conditions - have traditionally been the concern of public health and have not been linked closely to clinical practice. However, if standardized social and behavioral data can be incorporated into patient electronic health records (EHRs), those data can provide crucial information about factors that influence health and the effectiveness of treatment. Such information is useful for diagnosis, treatment choices, policy, health care system design, and innovations to improve health outcomes and reduce health care costs. Capturing Social and Behavioral Domains and Measures in Electronic Health Records: Phase 2 identifies domains and measures that capture the social determinants of health to inform the development of recommendations for the meaningful use of EHRs. This report is the second part of a two-part study. The Phase 1 report identified 17 domains for inclusion in EHRs. This report pinpoints 12 measures related to 11 of the initial domains and considers the implications of incorporating them into all EHRs. This book includes three chapters from the Phase 1 report in addition to the new Phase 2 material. Standardized use of EHRs that include social and behavioral domains could provide better patient care, improve population health, and enable more informative research. The recommendations of Capturing Social and Behavioral Domains and Measures in Electronic Health Records: Phase 2 will provide valuable information on which to base problem identification, clinical diagnoses, patient treatment, outcomes assessment, and population health measurement.
