Yardsticks - Chip Wood
1997-01-01

Expanded from its previous edition to include ages 13 and 14, this book provides teachers and parents with a quick reference on important childhood developmental issues, explaining what children should be learning and doing in the classroom at each developmental stage. The book begins by discussing how developmental issues can affect administrative and classroom decisions in the areas of mixed age grouping, ability grouping, retention, food, exercise, the structure of the school day, and racial and cultural questions. Each of the 11 chapters, one for each year, includes a narrative description and charts outlining growth patterns, classroom implications, and appropriate curriculum. The charts allow readers to identify developmental "yardsticks" for

a given age. These charts outline characteristic growth patterns (physical, social, language, and cognitive) as well as what to expect in the classroom regarding vision and fine motor ability, gross motor ability, cognitive growth, and social behavior. The curriculum charts summarize the developmental continuum between ages 4 and 14, covering reading, writing, mathematics, and thematic units in social science, science, and current events. The book concludes with a list of over 100 favorite books for different ages, and resources for parents and teachers. (HTH)

She Reads Truth - Raechel Myers
2016-10-04

She wants faith, hope, and love. She wants help and healing. She wants to hear and be heard, to see and be seen. She wants things set right. She wants to know what is true—not partly true, or sometimes true, or almost true. She wants to see Truth itself, face-to-face. But here, now, these things are all cloudy. Hope is tinged with hurt. Faith

is shaded by doubt. Lesser, broken things masquerade as love. How does she find something permanent when the world around her is always changing, when not even she can stay the same? And if she finds it, how does she hold on? She Reads Truth tells the stories of two women who discovered, through very different lives and circumstances, that only God and His Word remain unchanged as the world around them shifted and slipped away. Infused with biblical application and Scripture, this book is not just about two characters in two stories, but about one Hero and one Story. Every image points to the bigger picture—that God and His Word are true. Not because of anything we do, but because of who He is. Not once, not occasionally, but right now and all the time. Sometimes it takes everything moving to notice the thing that doesn't move. Sometimes it takes telling two very different stories to notice how the Truth was exactly the same in both of them. For

anyone searching for a solid foundation to cling to, She Reads Truth is a rich and honest Bible-filled journey to finally find permanent in a world that's passing away.

Handbook of Research in Social Studies Education -

Linda S. Levstik 2010-04-15

This Handbook outlines the current state of research in social studies education - a complex, dynamic, challenging field with competing perspectives about appropriate goals, and on-going conflict over the content of the curriculum. Equally important, it encourages new research in order to advance the field and foster civic competence; long maintained by advocates for the social studies as a fundamental goal. In considering how to organize the Handbook, the editors searched out definitions of social studies, statements of purpose, and themes that linked (or divided) theory, research, and practices and established criteria for topics to include. Each chapter meets one or more of these criteria: research activity since the last Handbook that warrants a new analysis, topics representing a major emphasis in the NCSS

standards, and topics reflecting an emerging or reemerging field within the social studies.

The volume is organized around seven themes: Change and Continuity in Social Studies Civic Competence in Pluralist Democracies Social Justice and the Social Studies Assessment and Accountability Teaching and Learning in the Disciplines Information Ecologies: Technology in the Social Studies Teacher Preparation and Development The Handbook of Research in Social Studies is a must-have resource for all beginning and experienced researchers in the field.

Teaching in Themes -

Deborah Meier 2015
How do teachers and schools create meaningful learning experiences for students with diverse skills, abilities, and cultures? How can teachers authentically assess the learning of their students and build on their strengths and interests in ways that enrich the larger community? How can schools be turned into

places where everyone is learning from each other? These are the big questions that guide the work of teachers at the well-known Mission Hill School in Boston and that are addressed in this book.

Teaching in Themes will help schools incorporate a whole-school, theme-based curriculum that engages students across grade levels K-8. The authors provide detailed descriptions of four thematic units: What's Baking? Learning Together About Bread and Bakeries; The Impact of Nature and Play; The Struggle for Justice: U.S. History Through the Eyes of African-Americans; and Astronomical Inquiries.

Readers will see how teachers and students design "emergent inquiries" within the themes and create artwork, music, presentations, and a variety of hands-on learning experiences that support differentiated instruction across the curriculum. curricular theme and to build a multi-age learning community. Details of how teachers developed rich curriculum tailored to their unique students. The insights of legendary educator Deborah Meier on how whole-school thematic units were used to encourage collaboration among teachers. An afterword by teachers (and film makers) about the thinking behind their work featured in the widely-viewed film series “A Year at Mission Hill.” “The schools Deborah Meier created in New York and Boston are outstanding examples of democratic education in action. I will never forget the first time I visited one of Deborah’s schools in East Harlem and saw the joy and curiosity on the faces of children and teachers alike. I took time then to carefully describe the school’s practices, including its portfolio-based assessment system, because I believed the word needed to be spread. I still do. Happily, this new book from Deborah and her colleagues at the Mission Hill

School adds to the literature on creative and collaborative teaching and on building trusting and powerful learning communities.” —Linda Darling-Hammond, Charles E. Ducommun Professor of Education, Stanford University “Here is a book that shatters the prevailing definition of a ‘good’ school as one with high test scores. Teaching in Themes makes clear the often hidden fact that there are many kinds of ‘good’ schools for children, adults, and a democratic society, past and present. Experienced teachers tell a fascinating story about Boston’s Mission Hill School, its goals, curriculum, classroom lessons, and assessments that will knock the socks off many true believers in only one kind of a ‘good’ school.” —Larry Cuban, Professor Emeritus of Education, Stanford University “Real student engagement is not the result of entertaining instruction; it is borne from students being passionate about their own learning—about becoming

young experts. This book gives a behind-the-scenes look at Mission Hill, a remarkably successful public school where the quality of student thinking and student work takes precedence over test scores, and where thematic learning builds powerful intellectual bridges within classrooms and across the school.” —Ron Berger, chief academic officer, Expeditionary Learning
