Algebra Part 2 (Speedy Study Guides) - Speedy Publishing 2014-06-17

Not everyone has a knack for Mathematics and several people simply give up when the teacher begins adding letters into the equations. However, there are actually some solid uses for Algebra 2 other than keeping headache medicine manufacturers in business. Building on the ideas and core concepts learned in basic Algebra, the intermediate Algebra 2 introduces abstract thinking. Students learn how to identify likenesses and evaluate equations based on their characteristics. This information is useful for higher mathematical pursuits and is also helpful for general life. The analytic approach to problem solving is essential in

both employment situations and personal relationships.

Bījaganita - Brahmagupta 2005 Algebra, with Arithmetic and Mensuration, from the Sanskrit of Brahmagupta and Bhaskara was one of the earliest fruits of the European encounter with the scientific heritage of India. Colebrooke's work first appeared in 1817 and remains useful even today. This work contains English translations of two classics of Indian mathematics, namely Bhaskara's Lilavati and Bījaganita. These are supplemented by the twelfth and eighteenth chapters of Brahmagupta's Brahmasphutasiddhanta. These

translations are enriched by copious extracts from various commentaries by Gangadhara, Suryadasa, Ganesa and Ramakrsna on the Lilavati; by Krsna Daivajna and Ramakrsna on the Bījaganita. He also made use of the Persian translations of the mathematical treatises. 'The preface seeks to situate Indian Algebra in the context of development in other parts of the world.

Asia's Naval Expansion -

Geoffrey Till 2017-10-03

The navies of China, India and to a lesser extent Japan are expanding rapidly at present. This has the potential to alter the US-dominated naval balance in Asia-Pacific but it also raises a question: are the regions powers involved in a naval arms race? Naval development is and always has been a crucial indicator of economic and political development. It shows the emergence of a significant shift in strategic weight from West to East. But within the Asia-Pacific Region, alongside growing economic and institutional integration, there are geo-political tensions that threaten the regions stability and peace. The balance

between the two determines the form that naval development in that region is taking. Some aspects of this suggest the beginnings of a naval arms race that would have profound consequences for the region and the world.
