Left of Bang - Patrick Van Horne 2014-06-19
"At a time when we must adapt to the changing character of conflict, this is a serious book on a serious issue that can give us the edge we need." —General James Mattis, USMC, Ret. "Left of Bang offers a crisp lesson in survival in which Van Horne and Riley affirm a compelling truth: It's better to detect sinister intentions early than respond to violent actions late. Left of Bang helps readers avoid the bang." —Gavin de Becker, bestselling author of *The Gift of Fear*
"Rare is the book that is immediately practical and interesting. Left of Bang accomplishes this from start to finish. There is something here for everyone in the people business and we are all in the people business." —Joe Navarro, bestselling author of *What Every BODY is Saying*. "Left of Bang is a highly important and innovative book that offers a substantial contribution to answering the challenge of Fourth Generation war (4GW)." —William S. Lind, author of *Maneuver Warfare Handbook* "Like Sun Tzu's *The Art of War*, Left of Bang isn't just for the military. It's a must read for anyone who has ever had a gut feeling that something's not quite right...be it walking down the street, sitting in a corporate boardroom, or even entering an empty home." --Steven Pressfield, bestselling author of *The Lion's Gate*, *The Warrior Ethos* and *Gates of Fire* "An amazing book! Applying the lessons learned during the longest war in American history, and building on seminal works like *The Gift of Fear* and *On Combat*, this book provides a framework of knowledge that will bring military,

law enforcement, and individual citizens to new levels of survival mindset and performance in life-and-death situations. Left of Bang is an instant classic." --Lt. Colonel Dave Grossman, U.S. Army Ret., author of *On Combat* and *On Killing* -- You walk into a restaurant and get an immediate sense that you should leave. -- You are about to step onto an elevator with a stranger and something stops you. -- You interview a potential new employee who has the resume to do the job, but something tells you not to offer a position. These scenarios all represent LEFT OF BANG, the moments before something bad happens. But how many times have you talked yourself out of leaving the restaurant, getting off the elevator, or getting over your silly "gut" feeling about someone? Is there a way to not just listen to your inner protector more, but to actually increase your sensitivity to threats before they happen? Legendary Marine General James Mattis asked the same question and issued a directive to operationalize the Marine Corps' Combat Hunter program. A comprehensive and no-nonsense approach to heightening each and every one of our gifts of fear, LEFT OF BANG is the result.

Police Promotion Super Course - Andrew Borrello 2013-01-07

The contents of this book are designed specifically for law enforcement officers, front-line supervisors, and managers who have reached the point in their careers where they are ready to advance their rank. The focus of this information is on the police promotional oral interview. In a majority of police agencies across

the country the oral interview is both the most critical part of the promotion process and the most difficult. An officer's performance during the oral interview is paramount because the process is highly competitive. Officers must "out-score" others also vying for promotion. This is difficult in that candidates may be competing against dozens or even hundreds of other police personnel many of whom may have greater education or more experience. The goal of this book is to provide professional law enforcement officers with a highly effective and valuable preparatory edge. This "edge" translates into real-world techniques, easy-to-apply skills, and a wealth of information on how to be distinctive and perform in an exceptional manner during the oral interview. The police officer, deputy, supervisor, or manager who utilizes the content of this unique book correctly can stand out among the other candidates, be more competitive, achieve preparatory confidence, and up their performance toward higher interview scores.

Managing for World Class Safety - James Melville Stewart 2012-11-28

Despite the extensive literature on safety, few tools have been available to help managers quantitatively assess the level of safety management and the quality of the safety practices in organizations. In his consulting practice, Dr. Jim Stewart, a former executive at DuPont, developed such a method, crafting a safety survey centering on a comprehensive questionnaire for employees at all levels, that reveals the true level of corporate commitment to safety. *Managing for World Class Safety* first describes the model of safety management that underpins the questionnaire and then demonstrates how this innovative procedure illuminates critical intangibles like management commitment, the enforcement of rules, worker involvement, and injury investigation. The central part of this book is the description of research at the University of Toronto that applies the questionnaire in comprehensive research at five of the world's safest companies and five with very poor safety. The questionnaire polled 700 people in the ten companies, "measuring" the level of more than twenty key elements such as: The workers' perception of the priority given to safety The belief that all injuries

can be prevented The extent to which line management takes responsibility/accountability for safety How well safety rules are followed and enforced The frequency and quality of safety meetings The level of recognition to reinforce safety excellence In every element, the contrast between the responses from the very safe companies and those from the companies with poor safety was dramatic, clearly depicting where the former succeed and the latter fail By developing quantitative benchmark data, Stewart reasons that it will be easier to convince reluctant management to undertake the fundamental change necessary for a "step change" in their company performance. *Managing for World Class Safety* promises a revolutionary new approach to workplace safety improvement for corporate leaders, safety professionals, and regulators.

The Psychology of Police Deadly Force Encounters - Laurence Miller 2020-02-11
The Psychology of Police Deadly Force Encounters: Science, Practice, and Police is a fascinating look into the reality of police work. The author integrates noted theories into a "street-wise" understanding of being a police officer. The focus of this book is on the use of deadly force by officers—a topic of considerable importance. The author discusses the psychosocial aspects of deadly force use, stemming from the individual officer, the situation, organizational influences, and the police culture. Expanding further into social issues, the controversial topic of race and use of deadly force is discussed. This depiction looks at both sides—that of racial victimization and that of the police—which helps to provide a rather unique perspective on this important issue. Of interest, the author breaks down the different

dimensions of cognition as a factor in decision making among police, including the perception of the situation, the action taken depending on that perception, and the role of present and past memory. This will make for a useful training topic to alert officers to the cognitive processes that go into deadly force use—processes that they have the control to change to make a better decision. Next, the book delves into the biological factors that may be involved in police decision making—again where deadly force is involved. The various negative psychological impacts that a deadly force situation may bring about are identified and explained. This book will be useful as a tool for both law enforcement practitioners and researchers to better understand the intricacies of deadly force by the police. For researchers, the book has a multitude of references available for further exploration. It will prove to be a useful guide and reference volume for police managers and supervisors, mental health clinicians, investigators, attorneys, judges, law enforcement educators and trainers, rank and file police officers, including expert witnesses.
