Security and Artificial Intelligence - Lejla Batina

AI has become an emerging technology to assess security and privacy, with many challenges and potential solutions at the algorithm, architecture, and implementation levels. So far, research on AI and security has looked at subproblems in isolation but future solutions will require sharing of experience and best practice in these domains. The editors of this State-of-the-Art Survey invited a cross-disciplinary team of researchers to a Lorentz workshop in 2019 to improve collaboration in these areas. Some contributions were initiated at the event, others were developed since through further invitations, editing, and cross-reviewing. This contributed book contains 14 invited chapters that address side-channel attacks and fault injection, cryptographic primitives, adversarial machine learning, and intrusion detection. The chapters were evaluated based on their significance, technical quality, and relevance to the topics of security and AI, and each submission was reviewed in single-blind mode and revised. .

*Social Housing in the Middle East* - Kıvanç Kılınç 2019-03-05

As oil-rich countries in the Middle East are increasingly associated with soaring skyscrapers and modern architecture, attention is being diverted away from the pervasive struggles of social housing in those same urban settings. *Social Housing in the Middle East* traces the history of social housing—both gleaming postmodern projects and bare-bones urban housing structures—in an effort to provide a wider understanding of marginalized spaces and their impact on identities, communities, and class. While architects may have envisioned utopian or futuristic experiments, these buildings were often constructed with the knowledge and skill sets of local workers, and the housing was in turn adapted to suit the modern needs of residents. This tension between local needs and national aspirations are linked to issues of global importance, including security, migration, and refugee resettlement. The essays collected here consider how culture, faith, and politics influenced the solutions offered by social housing; they provide an insightful look at how social housing has evolved since the 19th century and how it will need to adapt to suit

the 21st.
