Burt Rutan's Race to Space - Dan Linehan 2011-07-17

Years ago, Burt Rutan told a reporter for *Popular Mechanics*, “If we make a courageous decision like the goal and program we kicked off for Apollo in 1961, we will see our children or grandchildren in outposts on other planets.” Legendary science-fiction writer Arthur C. Clark would later recall Rutan’s quote in a piece he wrote about *SpaceShipOne* and comment,

“Fortunately, we need not rely solely on governments for expanding humanity’s presence beyond the Earth.” Burt Rutan’s *Race to Space* showcases Rutan’s herculean efforts to do just that. Smithsonian’s Air and Space Museum displays his most celebrated achievements, including *SpaceShipOne*, which won the coveted \$10 million Ansari X Prize for private spaceflight; *Voyager*, which hangs with *SpaceShipOne* in the Milestones of Flight gallery; the Virgin Atlantic *GlobalFlyer*; and the *VariEze*. His many aerospace innovations preceding his most recently conceived designs, *SpaceShipTwo* and *WhiteKnightTwo*, chronicle a progressive, step-by-step attempt to break barriers with engineering know-how and a wondrous imagination, all the while remaining on the forefront of the burgeoning private spaceflight industry. Rutan’s X Prize triumph and subsequent spacecraft designs are not a beginning, nor an end, but are steps in Burt

Abandoned in Place - Roland Miller 2016-03-01

Stenciled on many of the deactivated facilities at Cape Canaveral Air Force Station, the evocative phrase "abandoned in place" indicates the structures that have been deserted. Some structures, too solid for any known method of demolition, stand empty and unused in the wake of the early period of US space exploration. Now Roland Miller's color photographs document the

NASA, Air Force, and Army facilities across the nation that once played a crucial role in the space race. Rapidly succumbing to the elements and demolition, most of the blockhouses, launch towers, tunnels, test stands, and control rooms featured in *Abandoned in Place* are located at secure military or NASA facilities with little or no public access. Some have been repurposed, but over half of the facilities photographed no longer exist. The haunting images collected here impart artistic insight while preserving an important period in history.

Saturn - Liz Greene 2021-12-01
This classic astrology text, revered by beginners and professional astrologers alike, is now available in a Weiser Classics edition. "The most important single contribution of twentieth-century astrology is that astrology is not a map of one's fixed destiny but is a potential map of the unfolding of the authentic, higher self."
—Robert Hand, from the foreword *Saturn's darker*

persona is recognized universally in myth and fairytale. In this classic astrology text, renowned astrologer and Jungian analyst Liz Greene offers a fresh perspective on how to handle the influence of this much-maligned astrological symbol. In *Saturn*, Greene shows us how the frustrating experiences connected to this planet can be turned into opportunities for greater insight and meaning in our lives. Saturn, she says, symbolizes a psychic process—one that allows us to utilize the experience of pain for self-discovery and a more fulfilling and complete life. Greene retraces Saturn's character through sign, house, aspect, and synastry in a brilliant analysis that reveals his other face: that of the initiator who, for the price of our honesty with ourselves, offers us greater consciousness, self-understanding, and, eventually, freedom.

Like all great empires, the global society of the mid-twenty-first century collapsed. The moons and planets terraformed and colonized during that golden age were cut off from the civilization. The people left on those far-flung worlds were forced to survive by themselves as the light of the greatest society humans ever created, dimmed and faded to nothing. It is the year 3010 and humans have returned to the stars. Saturn's moon, Titan, was once a major outpost for resource extraction and trade. Now, a thousand years after the Fall of Civilization, the Corporation has returned to exploit the moon's vast hydrocarbon resources and subjugate the people still living in the ruins of that once great city. The only hope for the native people lies with the Human Reconnection Project, a ragtag team of explorers from Earth who have dedicated themselves to studying and protecting lost civilizations. When they discover the long-lost city nestled within the towering

forests of Titan, they find a society gripped in a bloody religious war and poised to destroy themselves. It's a race against time to forge a tenuous alliance between the people that still live among the ruins and those that make their home in the forests outside the city walls. If they fail, the Corporation's military might will wipe them off the face of the solar system.

The Rings of Saturn - W. G. Sebald 2016-11-08

"The book is like a dream you want to last forever" (Roberta Silman, The New York Times Book Review), now with a gorgeous new cover by the famed designer Peter Mendelsund The Rings of Saturn—with its curious archive of

photographs—records a walking tour of the eastern coast of England. A few of the things which cross the path and mind of its narrator (who both is and is not Sebald) are lonely eccentrics, Sir Thomas Browne's skull, a matchstick model of the Temple of Jerusalem, recession-hit seaside towns, wooded hills, Joseph Conrad, Rembrandt's "Anatomy Lesson," the natural history of the herring, the massive bombings of WWII, the dowager Empress Tzu Hsi, and the silk industry in Norwich. W.G. Sebald's *The Emigrants* (New Directions, 1996) was hailed by Susan Sontag as an "astonishing masterpiece perfect while being unlike any book one has ever read." It was "one of the great books of the last few years," noted Michael Ondaatje, who now acclaims *The Rings of Saturn* "an even more inventive work than its predecessor, *The Emigrants*."

The first bomb goes off on the top floor of PyeMart's headquarters. The second one explodes at the construction site itself. The blasts are meant to inflict maximum damage - and they do. Who's behind the bombs, and how far will they go? It's Virgil Flowers's job to find out . . . before more people get killed. * * * Praise for John Sandford and the Virgil Flower novels * * * 'Along the way to the satisfying ending, Virgil displays the rough humor and rough justice that make him such an appealing character' Publishers Weekly on Deep Freeze 'A knowing portrait of small-town life layered into a very well plotted mystery. We can do this. Let's see a show of hands. It's unanimous, or it's prison. Do we kill Clancy Conley?' "They all looked around at each other, each of them reluctant to go first. Then the fat man raised his hand, and then Kerns, and then the rest of them. "'It's unanimous,' Barns said." In southeast Minnesota, down on the

Mississippi, a school board meeting is coming to an end. The board chairman announces that the rest of the meeting will be closed, due to personnel issues. "Issues" is correct. The proposal up for a vote before them is whether to authorize the killing of a local reporter. There are no votes against. Meanwhile, not far away, Virgil Flowers is helping out a friend by looking into a dognapping, which seems to be turning into something much bigger and uglier -- a team of dognappers supplying medical labs -- when he gets a call from Lucas Davenport. A murdered body has been found -- and the victim is a local reporter...

The Road to Sparta - Dean Karnazes 2016-10-25

The Road to Sparta is the story of the 153-mile run from Athens to Sparta that inspired the marathon and saved democracy, as told—and experienced—by ultramarathoner and New York Times bestselling author Dean Karnazes. In 490 BCE, Pheidippides ran for 36 hours straight from Athens to Sparta to seek help in defending Athens from a Persian invasion in the Battle of Marathon. In doing so, he saved the development of Western civilization and inspired the birth of the marathon as we

know it. Even now, some 2,500 years later, that run stands enduringly as one of greatest physical accomplishments in the history of mankind.

Karnazes personally honors Pheidippides and his own Greek heritage by recreating this ancient journey in modern times. Karnazes even abstains from contemporary endurance nutrition like sports drinks and energy gels and only eats what was available in 490 BCE, such as figs, olives, and cured meats. Through vivid details and internal dialogs, The Road to Sparta offers a rare glimpse into the mindset and motivation of an extreme athlete during his most difficult and personal challenge to date. This story is sure to captivate and inspire—whether you run great distances or not at all.
