The First Crusade - August Charles Krey 1921
This complete history of the First Crusade places particular emphasis on using eye witness accounts of the happenings as its source. Author August Krey notes that the eye witness accounts written during the time of the Crusades were really the first time since the fall of the Roman Empire that we derived information about life, societal culture and norms in the Middle Ages in Europe. Krey uses this influx of writings to construct an accurate and detailed history of the origins and happenings of the First Crusade.

Of Stones and Spirits - Jeffrey H. Altschul 2000 Antelope Hill is a prominent fixture on the landscape of the lower Gila River in southwestern Arizona. Archaeologists know the hill as the largest and most impressive milling implement quarry in the western United States, with tools made from Antelope Hill sandstone found at sites stretching for hundreds of miles up and down the Gila and Colorado rivers. According to modern Native Americans, the hill was a no-man's-land in a hotly contested region, and the hundreds of rock art images that adorn

the hill attest to its use by many peoples over many years. The hill was also used by more-recent migrants. Spanish explorers camped at Antelope Hill; fur trappers passed by; Mexican and American military expeditions left their marks in the rocks, as did many on their way to seek their fortune in gold in California. The archaeology, ethnography, and history of Antelope Hill are presented here in a unique format. The handsome book reports on the findings of archival research, oral histories, and archaeological excavation and analysis. The accompanying CD-ROM presents color images of rock art as well as a video of the archaeology of Antelope Hill and nearby sites.

The Role of Transit in Emergency Evacuation - Transportation Research Board 2008-12-09

TRB Special Report 294: The Role of Transit in Emergency Evacuation explores the roles that transit systems can play in accommodating the evacuation, egress, and ingress of people from and to critical locations in times of emergency. The report focuses on major incidents that could necessitate a partial to full evacuation of the central business district or other large portion of an urban area. According to the committee that produced the report, transit agencies could play a significant role in an emergency evacuation, particularly in transporting carless and special needs populations, but few urban areas have planned for a major disaster and evacuation that could involve multiple jurisdictions or multiple states in a region, or have focused on the role of transit and other public transportation providers in such an incident. The report offers recommendations for making transit a full

partner in emergency evacuation plans and operations, while cautioning emergency managers, elected officials, and the general public to be realistic in their expectations, particularly in a no-notice incident that occurs during a peak service period.

Up Front - Bill Mauldin 1968

Up Front by Bill Mauldin is one of the most famous books to emerge from the Second World War, a classic in every sense of the word. In his drawings of the infantry dog-faces Willie and Joe, done while he himself fought in campaigns in Sicily and Italy, Mauldin created the immortal archetypes of the American fighting man. He knew, as one who had been there himself on the front lines and in the slit trenches, drenched with mud and rain, that Willie and Joe - with their unshaven faces, their gallows humor, their

fortitude, and their dislike of privilege and cant - exemplify something enduring and surely noble about Americans at war. He knew their gripes, their fears, their jokes, and their opinions, and he recorded their talk with the most pungent accuracy. As for the timelessness of this book, David Halberstam puts it best: "One senses that if a war reporter who had been with Hannibal or Napoleon saw Mauldin's work, he would know immediately that the work was right". This new edition of Up Front is being published to coincide with the fiftieth anniversary of the end of World War II. It reproduces the exact design of the interior of the original 1946 edition as well as its front cover art. Up Front endures today as a piece of living history and a potent reminder of the sacrifices made by the men who fight our wars, whether that fighting takes place in Italy or France or Korea or Vietnam or the Persian Gulf.

Transport Justice - Karel Martens 2016-07-01

Transport Justice develops a new paradigm for transportation planning based on principles of justice. Author Karel Martens starts from the observation that for the last fifty years the focus of transportation planning and policy has been on the performance of the transport system and ways to improve it, without much attention being paid to the persons actually using - or failing to use - that transport system. There are far-reaching consequences of this approach, with some enjoying the fruits of the improvements in the transport system, while others have experienced a substantial deterioration in their

situation. The growing body of academic evidence on the resulting disparities in mobility and accessibility, have been paralleled by increasingly vocal calls for policy changes to address the inequities that have developed over time. Drawing on philosophies of social justice, Transport Justice argues that governments have the fundamental duty of providing virtually every person with adequate transportation and thus of mitigating the social disparities that have been created over the past decades. Critical reading for transport planners and students of transportation planning, this book develops a new approach to transportation planning that takes people as its starting point, and justice as its end.

A Glossary of Dialect and Archaic Words Used in the County of Gloucester (Classic Reprint) - John Drummond Robertson
2018-03-20

Excerpt from A Glossary of Dialect and Archaic Words Used in the County of Gloucester I have also found the Glossaries of my fellow-workers in adjoining fields of great assistance in determining the range of words, a matter which I consider to be of very great importance. And in this connection I would say that I have found myself obliged to admit a good many words - in self-defence, so to say - which I should

personally have preferred to omit, on the ground that they are words in common usage all over the country, although perhaps not sufficiently polite to find a place in the dictionary. Had I altogether omitted them, it might in the future be supposed that they were not used in this County, and thus a false idea of their range would necessarily arise. The New Transit Town - Hank Dittmar
2012-06-22

Transit-oriented development (TOD) seeks to maximize access to mass transit and nonmotorized transportation with centrally located rail or bus stations surrounded by relatively high-density commercial and residential development. New Urbanists and smart growth proponents have embraced the concept and interest in TOD is growing, both in the United States and around the world. *New Transit Town* brings together leading experts in planning, transportation, and sustainable design—including Scott Bernstein, Peter Calthorpe, Jim Daisa, Sharon Feigon, Ellen Greenberg, David Hoyt, Dennis Leach, and Shelley Poticha—to examine the first generation of TOD projects and derive lessons for the next generation. It offers topic chapters that provide

detailed discussion of key issues along with case studies that present an in-depth look at specific projects. Topics examined include: the history of projects and the appeal of this form of development a taxonomy of TOD projects appropriate for different contexts and scales the planning, policy and regulatory framework of "successful" projects obstacles to financing and strategies for overcoming those obstacles issues surrounding traffic and parking the roles of all the actors involved and the resources available to them performance measures that can be used to evaluate outcomes Case Studies include Arlington, Virginia (Roslyn-Ballston corridor); Dallas (Mockingbird Station and Addison Circle); historic transit-oriented neighborhoods in Chicago; Atlanta (Lindbergh Center and BellSouth); San Jose (Ohlone-Chynoweth); and San Diego (Barrio Logan). *New Transit Town* explores the key challenges to transit-oriented development, examines the lessons learned from the first generation of projects, and uses a

systematic examination and analysis of a broad spectrum of projects to set standards for the next generation. It is a vital new source of information for anyone interested in urban and regional planning and development, including planners, developers, community groups, transit agency staff, and finance professionals.

Geospatial Technologies and Homeland Security - Daniel Sui 2008-05-25

Homeland security and context In the Geographical Dimensions of Terrorism (GDOT) (Cutter et al. 2003), the first book after 9/11 to address homeland security and geography, we developed several thematic research agendas and explored intersections between geographic research and the importance of context, both geographical and political, in relationship to the concepts of terrorism and security. It is good to see that a great deal of new thought and research continues to flow from that initial research agenda, as illustrated by many of the papers of this new book, entitled Geospatial Technologies and Homeland Security: Research Frontiers and Future Challenges. Context is relevant not only to understanding homeland security issues broadly, but also to the conduct

of research on geospatial technologies. It is impossible to understand the implications of a homeland security strategy, let alone hope to make predictions, conduct meaningful modeling and research, or assess the value and dangers of geospatial technologies, without consideration of overarching political, social, economic, and geographic contexts within which these questions are posed.

Pain Psychology for Clinicians - Leanne R. Cianfrini 2021-02-12

Given the heightened focus on the opioid crisis and its intersection with adequate chronic pain management, there is an impetus to shift patient care toward self-management and comprehensive interdisciplinary modalities.

However, despite the evidence base for efficacy, pain psychology remains largely relegated to the complementary and alternative medicine designations and medical providers struggle to search for trained pain psychologists in their community. This unique book makes core psychological techniques accessible to medical providers and allied health professionals who are on the front lines of routine communication with patients living with chronic pain. Practical suggestions and vignettes demonstrate how to briefly and effectively incorporate key concepts from Cognitive-Behavioral Therapy, Acceptance and Commitment Therapy, Motivational Interviewing and other orientations into any health care setting.
