*The Sociology of Military  
Science* - Colonel (US Army  
Ret.) Chris Papparone  
2012-11-08

This groundbreaking work  
challenges modernist military  
science and explores how a  
more open design epistemology  
is becoming an attractive  
alternative to a military staff  
culture rooted in a monistic  
scientific paradigm. The author  
offers fresh sociological  
avenues to become more  
institutionally reflexive - to  
offer a variety of design frames  
of reference, beyond those  
typified by modern military

doctrine. Modernist military  
knowledge has been  
institutionalized to the point  
that blinds militaries to  
alternative designs  
organizationally and in their  
interventions. This book seeks  
to reconstruct strategy and  
operations in "designing ways"  
and develops theories of action  
through multifaceted  
contextualizations and  
recontextualizations of  
situations, showing that  
Military Design does not have  
to rely on set rational-analytic  
decision-making schemes, but  
on seeking alternative  
meanings in- and on-action.  
The work offers an alternative  
philosophy of practice that  
embraces the unpredictability  
of tasks to be accomplished.  
Written by Colonel Papparone  
(U.S. Army, Ret., PhD) with a  
special chapter by two active  
duty officers, it will appeal to  
all in military and security  
studies, including professionals  
and policymakers.
