*Principles of Effective Parenting* - Joan E. Grusec 2019-06-07

Grounded in pioneering research, this authoritative text examines the parenting strategies that help children and adolescents develop into productive, happy members of society. Joan Grusec gives students and practitioners a roadmap for navigating the vast, seemingly contradictory literature on parenting. Rather than advocating one "best" style of parent-child interaction, Grusec identifies five domains of socialization and shows that different ways of responding to children are appropriate for each one. Chapters on each domain--protection, reciprocity, control, guided learning, and group participation--combine theory, empirical findings, cross-cultural considerations, and real-world applications. Personal recollections from culturally diverse young adults illustrate how parents helped impart important life lessons. Learning exercises present examples of children's behavior and invite the reader to select the most effective parenting action from several possible options.

**Life-Span Developmental Psychology** - Paul B. Baltes 2013-09-11  
Life-Span Developmental Psychology: Personality and Socialization presents papers on personality and socialization. The book discusses the history, theory, and psychological approaches of developmental psychology, with focus on socialization and personality development through the life span; personality dimensions; and theories of socialization and sex-role development. The text also describes the life-span perspective of creativity and cognitive styles; continuities in childhood and adult moral development revisited; and issues of intergenerational relations as they affect both individual socialization and continuity of culture. The interactional analysis of family attachments; social-learning theory as a framework for the study of adult personality development; person-perception research; and the perception of life-span development are also considered. The book further tackles the potential usefulness of the life-span developmental perspective in education; the strategies for enhancing human development over the life span through educational intervention; and some ecological implications for the organization of human intervention throughout the life span. Developmental psychologists, sociologists, gerontologists, and people involved in the study of child development will find the book invaluable.

**Socialization in Higher Education and the Early Career** - John C. Weidman 2020-02-17

This book celebrates the contributions of John Weidman and his colleagues to the understanding of student socialization in higher education. It includes innovative chapters reflecting new approaches to higher education student socialization with respect to students of color, gender, STEM, and students in higher education systems outside the USA. Specifically, the book examines socialization between and within in a range of groups, including national, international and minority students, parents, doctoral students, early career faculty, and scholarly

practitioners. The book assesses methodological approaches and suggests directions for reformulating theory and practice. Using sociological perspectives to address issues and concerns at both the undergraduate and graduate levels, the book gives renewed life to the college impact literature. It includes revisions and expansions of the original Weidman frameworks based on the synthesis of existing research with new work reflecting unique perspectives by a variety of authors. John Weidman has been an indisputable force in the study and understanding of student socialization in higher education. This new book by Weidman and his coeditor, Linda DeAngelo, represents an undeniably significant and welcomed expansion of the original "Weidman model" of student socialization. In updating and revising the original model, chapter authors give attention to various contemporary issues such as student diversity, gender differences, early career experiences, and internationalism. Whether one samples only some of the articles that constitute this book or reads all of them, the professional payoff will be substantial. Kenneth A. Feldman, Professor of Sociology, Stony Brook University John Weidman has made a number of groundbreaking contributions to our understanding of student socialization in postsecondary education. This book, edited with Linda DeAngelo, brings together a group of fine scholars whose contributions will push our understanding even further. It is a significant addition to the college impact literature. Ernest T. Pascarella, Petersen Chair in Higher Education, University of Iowa

*Inside Family Viewing (Routledge Revivals)* - James Lull 2014-04-23  
First published in 1990, this title presents a rich account of how television intersects with family life in American and other world cultures. From an analysis of the political and cultural significance of China's most important television series to detailed descriptions of how families in the United States interpret and use television at home, James Lull's ethnographic work marks an important stage in the study of the role of the mass media in contemporary culture. This title will be of interest not only to those in media and communications, but also to those in the broader fields of cultural anthropology and sociology.

**Communication and Student Socialization** - Ann Q. Staton 1990  
Focusing on the role communication plays in the process of student socialization at the elementary and secondary school levels, this text examines the underlying theoretic framework. It contains chapters that explore the socialization process by youngsters at various grade levels or with special needs. The final chapter compares and contrasts the socialization process across the spectrum of elementary, middle, and high school.

**Social Theory and Social Structure** - Robert King Merton 1968  
Examines the interactions between sociological theory and research in various approaches to the study of social structure, evaluating the limitations and functions of each

**Applied Studies Towards a Sociology of Language** - Basil Bernstein 2004-11-23

The papers in this second volume show some of the results of the empirical exploration of Bernstein's hypothesis. The volume represents a significant contribution not only to the study of the sociology of language, but also to education and the social sciences. "This collection demonstrates the magnitude of Bernstein's pioneering contribution to socio-linguistic studies" - S. John Eggleston, Times Educational Supplement

**New Directions for Writers** - Carol Ann D. Ellis 2002-12  
New Directions in Writing is a developmental writing text developed to help readers meet the writing requirements of the real world as well as the classroom. By guiding learners through the steps of the writing process, providing examples of both student and professional writing, and emphasizing the advantages of being able to write well, this text makes it possible for readers to handle the demands of college writing as well those of the business and professional workplace. A unique feature called "Writing On the Job" presents interviews with people who are not primarily writers, but whose professions require that they write everyday, showing readers the benefit of being able to express oneself clearly in real life and in academic situations. For those interested in developing their writing skills at the paragraph to essay level.

### **Handbook of the Sociology of Gender** - Janet Saltzman Chafetz 2006-11-22

During the past three decades, feminist scholars have successfully demonstrated the ubiquity and omnirelevance of gender as a sociocultural construction in virtually all human collectivities, past and present. Intrapsychic, interactional, and collective social processes are gendered, as are micro, meso, and macro social structures. Gender shapes, and is shaped, in all arenas of social life, from the most mundane practices of everyday life to those of the most powerful corporate actors. Contemporary understandings of gender emanate from a large community of primarily feminist scholars that spans the gamut of learned disciplines and also includes non-academic activist thinkers. However, while incorporating some cross-disciplinary material, this volume focuses specifically on sociological theories and research concerning gender, which are discussed across the full array of social processes, structures, and institutions. As editor, I have explicitly tried to shape the contributions to this volume along several lines that reflect my long-standing views about sociology in general, and gender sociology in particular. First, I asked authors to include cross-national and historical material as much as possible. This request reflects my belief that understanding and evaluating the here-and-now and working realistically for a better future can only be accomplished from a comparative perspective. Too often, American sociology has been both tempero- and ethnocentric. Second, I have asked authors to be sensitive to within-gender differences along class, racial/ethnic, sexual preference, and age cohort lines.

### *Parenting Matters* - National Academies of Sciences, Engineering, and Medicine 2016-11-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive

developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Transforming the Workforce for Children Birth Through Age 8** - National Research Council 2015-07-23

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education

professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

*Difference Matters* - Brenda J. Allen 2010-07-19

Allens proven ability and flare for presenting complex and oftentimes sensitive topics in nonthreatening ways carry over in the latest edition of *Difference Matters*. Her down-to-earth analysis of six social identity categories reveals how communication establishes and enacts identity and power dynamics. She provides historical overviews to show how perceptions of gender, race, social class, sexuality, ability, and age have varied throughout time and place. Allen clearly explains pertinent theoretical perspectives and illustrates those and other discussions with real-life experiences (many of which are her own). She also offers practical guidance for how to communicate difference more humanely. While many examples are from organizational contexts, readers from a wide range of backgrounds can relate to them and appreciate their relevance. This eye-opening, vibrant text, suitable for use in a variety of

disciplines, motivates readers to think about valuing difference as a positive, enriching feature of society. Interactive elements such as Spotlights on Media, I.D. Checks, Tool Kits, and Reflection Matters questions awaken interest, awareness, and creative insights for change.

*The Handbook of Experimental Economics, Volume 2* - John H. Kagel 2020-05-26

An indispensable survey of new developments and results in experimental economics When The Handbook of Experimental Economics first came out in 1995, the notion of economists conducting lab experiments to generate data was relatively new. Since then, the field has exploded. This second volume of the Handbook covers some of the most exciting new growth areas in experimental economics, presents the latest results and experimental methods, and identifies promising new directions for future research. Featuring contributions by leading practitioners, the Handbook describes experiments in macroeconomics, charitable giving, neuroeconomics, other-regarding preferences, market design, political economy, subject population effects, gender effects, auctions, and learning and the economics of small decisions.

Contributors focus on key developments and report on experiments, highlighting the dialogue between experimenters and theorists. While most of the experiments consist of laboratory studies, the book also includes several chapters that report extensively on field experiments related to the subject area studied. Covers exciting new growth areas in experimental economics Features contributions by leading experts Describes experiments in macroeconomics, charitable giving, neuroeconomics, market design, political economy, gender effects, auctions, and more Highlights the dialogue by experimenters with theorists and each other Includes several chapters covering field experiments related to the subject area studied

**Preparing To Teach Writing** - James D. Williams 2003-03

Preparing to Teach Writing: Research, Theory, and Practice, Third Edition is a comprehensive survey of theories, research, and methods associated with teaching composition successfully. The primary goal is to provide practicing and prospective teachers with the knowledge they need to be effective teachers of writing and to prepare them for the many challenges they will face in the classroom. Overall, the third edition of Preparing to Teach Writing is clearer and more comprehensive than the previous editions. It combines the best of the old with new information and features. The discussions and references to foundational studies that helped define the field of rhetoric and composition are preserved in this edition. Also preserved is most of the pedagogical apparatus that characterized the first two editions; research and theory are examined with the aim of informing teaching. New in the Third Edition: \*a more thorough discussion of the history of rhetoric, from its

earliest days in ancient Greece to the first American composition courses offered at Harvard University in 1874; \*a major revision of the examination of major approaches to teaching writing--current-traditional rhetoric, new rhetoric, romantic rhetoric, writing across the curriculum, social-theoretic rhetoric, postmodern rhetoric, and post-postmodern rhetoric--considering their strengths and weaknesses; \*an extension of the discussion of strengths and weaknesses of major approaches to its logical conclusion--Williams advocates an epistemic approach to writing instruction that demonstrably leads to improved writing instruction when implemented effectively; \*a more detailed account of the phonics--whole language debate that continues to puzzle many teachers and parents; \*a new focus on why grammar instruction alone does not lead to better writing, the difference between grammar and usage, and how to teach grammar and usage effectively; \*an expanded section on Chicano English that now includes a discussion of Spanglish; \*more information on outcome objectives; the Council of Writing Program Administrators' statement of learning outcomes for first-year composition courses has been included to help high school teachers better understand how to prepare high school students for college writing, and to help those in graduate programs prepare for teaching assistantships in first-year composition courses; and \*a more comprehensive analysis of assessment that considers such important factors as the validity, reliability, predictability, cost, fairness, and politics of assessment and the effects on teaching of state-mandated testing, and also provides an expanded section on portfolios.
