Educating the Student Body - Committee on

Physical Activity and Physical Education in the School Environment 2013-11-13

Physical inactivity is a key determinant of health across the lifespan. A lack of activity increases the risk of heart disease, colon and breast cancer, diabetes mellitus, hypertension, osteoporosis, anxiety and depression and others diseases. Emerging literature has suggested that

in terms of mortality, the global population health burden of physical inactivity approaches that of cigarette smoking. The prevalence and substantial disease risk associated with physical inactivity has been described as a pandemic. The prevalence, health impact, and evidence of changeability all have resulted in calls for action to increase physical activity across the lifespan. In response to the need to find ways to make physical activity a health priority for youth, the Institute of Medicine's Committee on Physical Activity and Physical Education in the School Environment was formed. Its purpose was to review the current status of physical activity and physical education in the school environment, including before, during, and after school, and examine the influences of physical activity and physical education on the short and long term physical, cognitive and brain, and psychosocial health and development of children and adolescents. Educating the Student Body makes recommendations about approaches for

strengthening and improving programs and policies for physical activity and physical education in the school environment. This report lays out a set of guiding principles to guide its work on these tasks. These included: recognizing the benefits of instilling life-long physical activity habits in children; the value of using systems thinking in improving physical activity and physical education in the school environment; the recognition of current disparities in opportunities and the need to achieve equity in physical activity and physical education; the importance of considering all types of school environments; the need to take into consideration the diversity of students as recommendations are developed. This report will be of interest to local and national policymakers, school officials, teachers, and the education community, researchers, professional organizations, and parents interested in physical activity, physical education, and health for school-aged children and adolescents.

Sports Crazy - Steven J. Overman 2019-02-11
Sports Crazy: How Sports Are Sabotaging American Schools exposes the excesses of middle and high school sports and the detrimental effects our sports obsession has on American education. Institutions are increasingly emulating college and professional sports models and losing sight of a host of

educational and health goals. Steven J. Overman describes how this agenda is driven largely by partisan fans and parents of athletes who exert an inordinate influence on school priorities, and he explains how and why school administrators shockingly and consistently capitulate to these demands. The author underscores the incongruity of public schools involved in an entertainment business and the effects this diversion has on academic integrity, learning, life experience, and overall educational outcomes. Overman examines out-of-control school sports within the context of a school's educational mission and curriculum, with telling reference to impacts on physical education. He explores as well the outsized place of interscholastic sports beyond the classroom and scrutinizes the distorted relationship between intramural or recreational sports and elitist, varsity athletics. Overman's chapter on tackle football explains many reasons why this sport should be eliminated from the school

extracurriculum and replaced by flag or touch football. Overman presents a brief history of interscholastic sports, and he compares and contrasts the American experience of school-sponsored sport to the European model of community-based clubs. Which approach better serves students? Overman recommends reforms in the context of a radical proposal to phase out interscholastic sports in favor of an intramural or club model. This approach would alleviate such problems as elitism and gender bias and reign in hypercompetitiveness while freeing schools to educate students rather than provide public entertainment.

Play Like a Girl - Ellie Roscher 2017-07-18
Growing up and living in Kibera, Kenya, Abdul Kassim was well aware of the disproportionate number of challenges faced by women due to the extreme gender inequalities that persist in the slums. After being raised by his aunts, mother, and grandmother and having a daughter himself, he felt that he needed to make a difference. In 2002, Abdul started a soccer team for girls called Girls Soccer in Kibera (GSK), with the hope of fostering a supportive community and providing emotional and mental support for the

young women in the town. The soccer program was a success, but the looming dangers of slum life persisted, and the young women continued to fall victim to the worst kinds of human atrocities. Indeed, it was the unyielding injustice of these conditions that led Abdul to the conclusion that soccer alone was not enough to create the necessary systemic change. In 2006, after much work, the Kibera Girls Soccer Academy (KGSA) was established with their first class of 11 girls and 2 volunteer teachers. Today, KGSA is composed of 20 full-time staff, provides a host of artistic and athletic programs for more than 130 students annually, and continues to expand. By providing academics inside and outside of the classroom along with artistic and athletic opportunities, KGSA inspires the young women of Kibera to become advocates for change within their own communities and for Kenya as a whole. *Play Like a Girl* tells the KGSA story through Abdul's voice and vision and the stories of key staff and students. It is written by

Ellie Roscher who spent 2 summers doing research at KGSA and several years writing this book.

Facilitating Interdisciplinary Research -
Institute of Medicine 2005-04-04

Facilitating Interdisciplinary Research examines current interdisciplinary research efforts and recommends ways to stimulate and support such research. Advances in science and engineering

increasingly require the collaboration of scholars from various fields. This shift is driven by the need to address complex problems that cut across traditional disciplines, and the capacity of new technologies to both transform existing disciplines and generate new ones. At the same time, however, interdisciplinary research can be impeded by policies on hiring, promotion, tenure, proposal review, and resource allocation that favor traditional disciplines. This report identifies steps that researchers, teachers, students, institutions, funding organizations, and disciplinary societies can take to more effectively conduct, facilitate, and evaluate interdisciplinary research programs and projects. Throughout the report key concepts are illustrated with case studies and results of the committee's surveys of individual researchers and university provosts.

The Aims of Higher Education - Harry Brighouse
2015-05-04

This book features a group of top-notch philosophers tackling some of the biggest questions in higher education: What role should the liberal arts have in a college education? Should colleges orient themselves to the educational demands of the business sector? What is the role of highly selective colleges in the public sphere? To what extent should they be subsidized directly, or indirectly, by the public? Should they simply teach students skills and academic knowledge, or should they play a role in shaping character, and if so to what end?

Should highly selective colleges admissions practices give an edge to racial minorities, or legacies, or poor students? How much should the public purse subsidize disadvantaged students attending such institutions? These questions are fundamentally about moral and political values questions of distributive justice and of what constitutes valuable education. Philosophers are trained to identify value considerations in great detail indeed, often with more precision than is ever needed for practical purposes! but most disagreements about policy and practice proceed with minimal attention to the values assumed on either side, and all sides can benefit from more clarity about exactly what moral values are at play. The philosophers here, then, address some of the fundamental questions underlying debates about higher education and in ways that are interesting and accessible to others."

Migration, Diaspora and Identity - Georgina Tsolidis
2013-10-07

Framed in relation to diaspora this collection engages with the subject of how cultural difference is lived and how complex and shifting identities shape and respond to spatial politics of belonging. Diaspora is understood in a variety of ways, which makes this an eclectic collection of papers. Authors use various theoretical frameworks to explore diverse groups of people with a variety of experiences in a wide range of settings. They are making sense of the experiences of women and men from a range of ethnic backgrounds, negotiating identities through family, work and education. The micro dynamics of the everyday offer an evocative 'bottom up' means of understanding the tensions implicit in living multiple belongings. The common thread for the collection comes from the glimpses these authors provide into the remaking of our globalized world. The aim is to shed light on racism, dislocation and alienation on the one hand, and on the other hand, to consider how the complex power relations within

the everyday mediate a sense of resistance and hope. The papers are arranged around four themes; 1. Multiple Belongings, 2. Representing a Way of Being, 3. Sexualised Identifications and 4. Marriage and Family.

My Body - Emily Ratajkowski 2021-11-09
INSTANT NEW YORK TIMES BESTSELLER "My Body offers a lucid examination of the mirrors in which its author has seen herself, and her indoctrination into the cult of beauty as defined by powerful men. In its more transcendent passages . . . the author steps beyond the reach of any 'Pygmalion' and becomes a more dangerous kind of beautiful. She becomes a kind of god in her own right: an artist." —Melissa Febos, The New York Times Book Review A "MOST ANTICIPATED" AND "BEST OF FALL 2021" BOOK FOR * VOGUE * TIME * ESQUIRE * PEOPLE * USA TODAY * CHICAGO TRIBUNE * LOS ANGELES TIMES * SHONDALAND * ALMA * THRILLEST * NYLON * FORTUNE A deeply honest investigation of what it means to be a

woman and a commodity from Emily Ratajkowski, the archetypal, multi-hyphenate celebrity of our time Emily Ratajkowski is an acclaimed model and actress, an engaged political progressive, a formidable entrepreneur, a global social media phenomenon, and now, a writer. Rocketing to world fame at age twenty-one, Ratajkowski sparked both praise and furor with the provocative display of her body as an unapologetic statement of feminist empowerment. The subsequent evolution in her thinking about our culture's commodification of women is the subject of this book. *My Body* is a profoundly personal exploration of feminism, sexuality, and power, of men's treatment of women and women's rationalizations for accepting that treatment. These essays chronicle moments from Ratajkowski's life while investigating the culture's fetishization of girls and female beauty, its obsession with and contempt for women's sexuality, the perverse dynamics of the fashion and film industries, and

the gray area between consent and abuse. Nuanced, fierce, and incisive, *My Body* marks the debut of a writer brimming with courage and intelligence.

Structural Equation Modeling With Lisrel, Prelis, and Simplis - Barbara M. Byrne

2013-05-13

This book illustrates the ease with which various features of LISREL 8 and PRELIS 2 can be implemented in addressing research questions that lend themselves to SEM. Its purpose is threefold: (a) to present a nonmathematical introduction to basic concepts associated with SEM, (b) to demonstrate basic applications of SEM using both the DOS and Windows versions

of LISREL 8, as well as both the LISREL and SIMPLIS lexicons, and (c) to highlight particular features of the LISREL 8 and PRELIS 2 programs that address important caveats related to SEM analyses. This book is intended neither as a text on the topic of SEM, nor as a comprehensive review of the many statistical functions available in the LISREL 8 and PRELIS 2 programs.

Rather, the intent is to provide a practical guide to SEM using the LISREL approach. As such, the reader is "walked through" a diversity of SEM applications that include both factor analytic and full latent variable models, as well as a variety of data management procedures.

Football, Corruption and Lies - John Sugden
2017-12-04

World football is in crisis. The corruption scandal engulfing FIFA is arguably the biggest story in the history of modern sport and a watershed for sport governance. More than a decade ago, John Sugden and Alan Tomlinson laid the foundations for subsequent investigations with the publication of *Badfellas*, a groundbreaking work of critical sport sociology that exposed the systematic corruption at the heart of world football. It was a book that FIFA and Sepp Blatter tried to ban. Now re-issued to combine the original contents of *Badfellas* with new chapters covering the current crisis, this book points to the ways in

which FIFA's new administration can learn from the Blatter story. The prequel traces the course of Sugden and Tomlinson's game-changing investigation into FIFA, while the sequel updates the FIFA story from 2002 onwards and provides a chronology of crises and scandals within the FIFA narrative. Demonstrating the vital importance of critical investigative methods in sport studies, *Football, Corruption and Lies: Revisiting Badfellas*, the book FIFA tried to ban is essential reading for anybody looking to understand Blatter's rise and fall.
