COPO Camaro, Chevelle & Nova - Matt Avery 2018-09-14

The COPO Camaros, Chevelles, and Novas of the 1960s and early 1970s were the ultimate high-

performance GM muscle cars. While few knew about this back channel program at the time, it is now recognized as the origin of GM's top muscle cars. Dedicated Chevy racers and car owners were determined to compete head-to-head with Mopar and Ford at the racetrack and on the street. But in order to do so, they needed to circumvent the corporate ban on racing and resolve the restriction of 400-ci engines in intermediate vehicles. Don Yenke and some other creative individuals recognized the loophole in the COPO (Central Office Production Order) system at General Motors. The COPO program was designated for fleet vehicles such as taxicabs, but at the peak of the muscle car wars it was used to build the ultimate high-performance Chevy muscle cars. Some horrific on-track accidents compelled General Motors to drop out of racing, yet GM did not want to allow Chrysler and Ford to steal the glory on Sundays while they stood on the sidelines. As a result, GM inconspicuously ran the Chevy racing and high-performance program through back channels, and COPO was integral part of the program. Don Yenke became the COPO muscle car program chief architect and champion. He ordered the Corvair through the COPO program and created the Corvair Stinger to mount a SCCA road race campaign. From these humble beginnings, the road map for creating the ultimate Camaros, Chevelles, and Novas was established. Factory Camaro V-8s came equipped with the 350 small-block or 396 big-block, which had to compete with the Mustang Cobra Jets and Mopar Wedge and Hemi cars. In response, building the big-block Camaro through the COPO program was devised. At the factory, Camaros were fitted with the 396 engines and shipped to dealers where the 427s were installed in the cars. From 1967 to 1969, the factory and dealers installed eight different 427 engines, including the all aluminum ZL1 427. Later on, others used the road map to build COPO Novas and Chevelles to similar spec, with similar results. The COPO performance car program did not end with these muscle cars. Yenke even ordered several hundred Vegas through the COPO program, so they could be fitted with turbochargers and raced in SCCA competition. Chevy muscle car aficionado and author Matt Avery retraces the history of the COPO program

and the creation of these premier muscle cars. He has scoured archives and tracked down owners and personnel involved in the program to deliver a comprehensive story and complete guide to the COPO cars. The COPO muscle car and racing program produced a storied and remarkable journey, and author Matt Avery captures all these facets in this entertaining and revealing history. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

Collecting Muscle Car Model Kits - Tim Boyd
2018-05-15

In the 1960s, model kit building was a huge hobby. Kids built plastic kits of planes, tanks, race cars, space ships, creatures from scary movies, you name it. Before baseball card collecting, Pokémon, and video games, model kit building was one of the most popular hobby

activities. Car and airplane kits were the most popular, and among the car kits, muscle cars, as we know them today, were one of the most popular categories. Many owners of real muscle cars today were not old enough to buy them when the cars were new, of course. Yet kids of the 1960s and 1970s worshiped these cars to an extent completely foreign to kids today. If you couldn't afford or were too young to buy a muscle car back then, what could you do? For many, the next best thing was to buy, collect, and build muscle car kits from a variety of kit companies. Hundreds were made. Many of these kits have become collectible today, especially in original, unassembled form. Although people still build kits today, there is a broad market for collectors of nostalgic model kits. People love the kits for the great box art, to rekindle fond memories of building them 40 years ago, or even as a companion to the full-scale cars they own today. Here, world-leading authority Tim Boyd takes you through the entire era of muscle car kits, covering the options, collectability, variety availability, and value of these wonderful kits today. Boyd also takes you through the differences between the original kits, the older reproduction kits, and the new reproduction kits that many people find at swap meets today. If you are looking to build a collection of muscle car kits, interested in getting the kits of your favorite manufacturer or even just of the cars you have owned, this book will be a valuable resource in your model kit search.

Stardust International Raceway - Randall Cannon 2018-10-02

Professional motorsports came to Las Vegas in the mid-1950s at a bankrupt horse track swarmed by gamblers—and soon became enmeshed with the government and organized crime. By 1965, the Vegas racing game moved from makeshift facilities to Stardust International Raceway, constructed with real grandstands, sanitary facilities and air-

conditioned timing towers. Stardust would host the biggest racing names of the era—Mario Andretti, Parnelli Jones, John Surtees, Mark Donohue, Bobby Unser, Dan Gurney and Don Garlits among them. Established by a notorious racketeer, the track stood at the confluence of shadowy elements—wiretaps, casino skimming, Howard Hughes, and the beginnings of Watergate. The author traces the Stardust's colorful history through the auto racing monthlies, national newspapers, extensive interviews and the files of the FBI.

Aston Martin Vantage 2018: Best Features Buyer's Guide - Dale Michelson 2018-01-31

The new Vantage Aston Martin 2018 sports car was released a few weeks ago with its new sport design and beautifully sculpted exterior. The car features a sharp, low grille lined with chrome as well as a pair of headlights that are positioned far apart on the front of the vehicle. The new design helps with aerodynamics as a front

splitter sends air beneath the car and directs it to the area where it is needed the most; this also allows clean air to get to the diffuser at the back of the car. Besides design, the new Vantage Aston Martin 2018 sports car has also been

manufactured to produce more speed on the road, with a twin-turbocharged 4.0 litre V8 engine. The 2018 Vantage has been termed the bread and butter of the company and is the bestselling car for Aston Martin.
