Koffman & Macdonald's Law of Contract -

Elizabeth Macdonald 2014

A clear and non-technical account of contract law, ideal for university students new to the study of law.

Freight Forwarding and Multi Modal Transport Contracts - David Glass 2013-07-18

Freight Forwarding and Multimodal Transport Contracts, 2nd Edition, is a comprehensive guide to the law in relation to contract forms and terms created by operators, trade associations or international bodies such as the UN and used as a basis for trading conditions by freight forwarders, logistics suppliers, combined or multimodal transport operators and container operators. This second edition examines the latest editions of contract forms and terms, both where their object is the supply or procurement of multimodal carriage, as well as where they are directed to the use of combined transport equipment (ie containers, swap bodies). Of particular prominence will be a detailed examination of the latest versions of conditions used by the principal UK forwarding, logistics, intermodal and container operators such as the British International Freight Association (BIFA) conditions 2005A and the current Freightliner Conditions as well as updates on many of the conditions in use and legal developments relevant to them, eg Road Haulage Association Conditions 2009, Maersk Conditions of Carriage, TT Club Conditions.

The Navy of the Nuclear Age, 1947-2007 - Paul Silverstone 2011-04-06

The Navy of the Nuclear Age, 1947-2007, the fifth volume in the monumental U.S. Navy Warship series, presents an all-inclusive compendium of the ships that served in the U.S. Navy from the Cold War up through the present day. Featuring radical new developments in warships such as nuclear-powered submarines and carriers equipped with ballistic missiles, the post-World War II period was one of unprecedented technological growth for the U.S. Navy. The Navy of the Nuclear Age contains specifications and illustrations for all the ships and submarines that have helped the U.S. to achieve its present-day status as the country with the world's largest and most powerful navy. A further article about Paul Silverstone and the Navy Warships series can be found at:

U.S. Amphibious Ships and Craft - Norman Friedman 2002

In this latest addition to his acclaimed U.S. warship design history series, Norman Friedman describes the ships and the craft of the U.S. amphibious force, from its inception in the 1920s through World War II to the present. He explains how and why the United States successfully created an entirely new kind of fleet to fight and win such World War II battles as D-Day and the island landings in the Pacific. To an extent not previously documented, his book lays out the

differing views and contributions of the U.S. Army, Navy, and Marines as well as the British, and how they affected the development of prewar and wartime amphibious forces. Current and future amphibious forces and tactics are explained, together with their implications for ships and craft, from 40,000-ton amphibious carriers down to tracked amphibious vehicles. As in earlier volumes in the series, this study uses previously unpublished sources to illustrate not only what was actually built but what was planned and never brought into service. For example, the book offers the first comprehensive and fully illustrated account of abortive attempts in the 1960s and beyond to build new fire support ships (LFS). With nearly two hundred photographs and specially commissioned line drawings and extensive appendixes, the work conveniently brings together details of the ships and their service histories found elsewhere only in scattered official references.

1996 - Kirsty McManus 2018-10-31

When food blogger Anna Matthews takes a vitamin supplement that thrusts her back in time to 1996--and into her sixteen year old body--she is naturally a little shocked. But after a hasty re-assimilation, she decides to take advantage of this amazing second chance to view her teenage years from a more mature perspective. But with the effectiveness of each dose only lasting twelve hours, and any new actions initiated in the past having no effect on the future, Anna wonders whether taking it again would serve any purpose. Of course, curiosity gets the better of her, and she soon becomes addicted to travelling back in time to relive what she originally believed to be some of her best memories. Knowing that her husband grew up in the same area--and with him unwilling to talk about the past--Anna decides to track him down in 1996. But an unexpected discovery forces her to make a heartbreaking decision that will change both her and her husband's future forever.

Dynamics of Molecules and Chemical Reactions - Robert Wyatt 1996-06-27

Covers both molecular and reaction dynamics. The work presents important theoretical and computational approaches to the study of energy transfer within and between molecules, discussing the application of these approaches to problems of experimental interest. It also describes time-dependent and time-independent methods, variational and perturbative techniques, iterative and direct approaches, and methods based upon the use of physical grids of finite sets of basis functions.

Restoration and Management of Lakes and Reservoirs, Third Edition - G. Dennis Cooke 2016-04-19

It has been more than ten years since the last edition of the bestselling *Restoration and Management of Lakes and Reservoirs*. In that time, lake and reservoir management and restoration technologies have evolved and an enhanced version of this standard resource is long overdue. Completely revised and updated, the third edition continues the tradition of providing comprehensive coverage of the chemical, physical, and biological processes of eutrophication and its control. The authors describe the eutrophication process, outline methods for developing a pre-management and restoration diagnosis-feasibility study, and provide detailed descriptions of scientifically sound management and restoration methods. See what's new in the Third Edition: • New chapters on aquatic plant ecology and management • Emphasis on freshwater availability • A regional framework for water quality attainment • Methods of lake and reservoir restoration and management •

Updates or revisions to all other chapters The book features in-depth discussions of techniques used to manage eutrophication in standing water bodies, procedures for using these techniques, the principles involved, and successes and failures through a selection of case studies and cost analyses. Each chapter includes an introduction to the scientific basis of the problem, a description of the methods and procedures, and presents several case histories. Potential negative impacts and costs, where known, are described. A useful classroom text, reference manual, and general guide, this is the text against which all other resources in this field are measured.

The Retreat of the Elephants - Mark Elvin
2004-01-01

A landmark account of China's environmental history--by an internationally pre-eminent China specialist This is the first environmental history of China during the three thousand years for which there are written records. It is also a treasure trove of literary, political, aesthetic, scientific, and religious sources, which allow the reader direct access to the views and feelings of the Chinese people toward their environment and their landscape. Elvin chronicles the spread of the Chinese style of farming that eliminated the habitat of the elephants that populated the country alongside much of its original wildlife; the destruction of most of the forests; the impact of war on the environmental transformation of the landscape; and the re-engineering of the countryside through water-control systems, some of gigantic size. He documents the histories of three contrasting localities within China to show how ecological dynamics defined the lives of the inhabitants. And he shows that China in the eighteenth century, on the eve of the modern era, was probably more environmentally degraded than northwestern Europe around this time. Indispensable for its new perspective on long-term Chinese history and its explanation of the roots of China's present-day environmental crisis, this book opens a door into the Chinese past.

World Cheese Book - Juliet Harbutt 2009-10-05
The book is about cheese in all its many glorious varieties. What it looks like, what it tastes like, where it comes from, what you should do with it and why, how to choose a cheese you'll like and how best to enjoy it. It gives you an indepth understanding of the world of cheese - the science, the smells, the succulence. The core of the book is formed by the Directory Spreads, packed with clear and expert information about each cheese and illustrated with excellent photography. The cheeses are arranged by country, each section written by an expert "cheesie" from that country. For the novice, the intermediate and expert cheese eater, it will become the undisputed best guide to the world's cheeses.

A Pure Drop' The Life Of Jeff Buckley - Jeff Apter 2009-11-11

'Jeff Buckley was a pure drop in an ocean of noise.' - Bono It was his take on John Cale's cover version of Leonard Cohen's song 'Hallelujah' that made the number famous and his album - Grace - that caused everyone from Led Zeppelin and U2 to Radiohead and Coldplay to look up to Buckley as an illuminating spirit. But who was the man behind the music? Buckley's many personal letters are revealed for the first time. His struggle with writers block is explored, as is his ongoing battles with the concept of stardom, his desire for escape and the attempts to deal with the unavoidable legacy of his equally gifted father, Tim Buckley. In A Pure Drop, his friends, peers, enemies, lovers and collaborators all speak of the Jeff Buckley they knew, or in some cases, they thought they knew.

The Mouth that Roared - Les Twentyman
2017-07-01

Award-winning writer, Robert Hillman, has collaborated with one of Australia's best-known youth outreach workers and social campaigners, to bring his story to the public in that wonderful storytelling style that Robert and Les share. Raised in Braybrook in Melbourne's Western suburbs, Les has devoted his life to young people doing it tough both in Melbourne's west and more recently in western Sydney, setting up

crucial programs, services and resources to assist youth at risk. His is a success story on many fronts: attracting a dedicated and passionate team who work directly with the young people to bring about individual change; and building a huge public profile to support his work. His personal contact list would be the envy of prime ministers: from politicians to prominent business people to police command to sports champions and CEOs of major sporting codes, to the governor general. In this memoir, Robert goes behind the public knowledge to find out what makes Les tick, where he came from, who and what made him Australia's number one advocate for our most vulnerable young people. And what of his private life, if he has one at all? Take a journey with one of Australia's living treasures to the ugliest side of life and to the best.

Melbourne's Water Catchments - James Viggers 2013-11-14

This book charts the history of the water catchments and water supply for the city of Melbourne, which has many unique aspects that are a critical part of the history of Melbourne, Victoria and Australia. Much of the development of the water supply system was many decades ahead of its time and helped buffer the city of Melbourne from major diseases, droughts and water shortages. The authors present a chronology of the evolution of the catchment and water supply system pre-1900 to today. They discuss major developments, policies, and construction and management activities. Each chapter is illustrated with historical black and white images as well as newly taken photos that contrast present scenes with those from the past. Chapters also include many fascinating stories of life within the water catchments and working for the Melbourne and Metropolitan Board of Works. Finally, the book includes many extraordinary insights into current and future issues with Melbourne's water supply, including issues associated with the highly controversial North-South Pipeline and the desalination plant.

Climate Law in Australia - Tim Bonyhady 2007
Climate Law in Australia provides the first extended account of Australia's new climate law. It examines key federal and state legislation and the main cases brought before Australian courts. It combines incisive legal analysis with a deep understanding of climate-related issues and policy. The authors include leading academics such as Professors Robyn Eckersley, David Farrier, Rob Fowler and Jan McDonald, and leading practitioners such as Charles Berger, Kirsty Ruddock, Chris McGrath, Allison Warburton and Martijn Wilder. The editors are Professor Tim Bonyhady, Director of the Australian Centre for Environmental Law at the Australian National University, and Dr Peter Christoff of the University of Melbourne and Vice President of the Australian Conservation Foundation. The book examines pivotal issues in Australian climate law and policy - the Kyoto Protocol and its alternatives, emissions targets, carbon trading, geosequestration, nuclear decision-making, adaptation to climate change and legal liability. It contains detailed analysis of

the leading cases involving the Hazelwood power station, the Anvil Hill, Xstrata and Bowen Basin coal mines, and the Bald Hills and Taralga wind farms. *Climate Law in Australia* explores both the need for conventional legal regulation and the potential of economic responses to climate change. It shows how climate law has grown in Australia - and how far the law still has to go.

Chemicals from Microalgae - Zvi Cohen 2002-09-11

The production of chemicals from microalgae is becoming a significant area of biological research. *Chemicals from Microalgae* seeks to cover the various aspects that relate to the use of microalgae as a source of chemicals. The chapters discuss the occurrence and physiological role of these chemicals and concentrates on the methods aimed at enhancing *River Management* - Sandra Brizga 2000-02-21 Only in Australasia can the effect of technological societies on river systems be truly

analysed and this unique, accessible book covers key issues in river management from a geomorphological perspective. Australia and New Zealand were colonised only 200 years ago by central bureaucratic administrations. For the whole period of European settlement most river management activities have been carried out by government agencies and the record of their activities is relatively complete. These countries therefore provide good case studies for the impact of technological societies on river systems, having transformed their rivers in a short time from their 'natural' into a heavily managed condition. Geomorphology provides the scientific basis for much of our understanding of river behaviour and geomorphologists are now actively involved in the management process. This book provides a collection of case studies, the first to be produced to date, which describe the management of rivers covering issues of environmental flow, stream condition, mining and extractive activities, river channel change, river stabilisation, river regulation and urban streams. The book will prove invaluable to geomorphologists, river engineers, stream ecologists, river managers, and environmental impact assessors involved in river management and restoration.

The Future of the Law of Contract - Michael Furmston 2020-05-10

The Future of the Law of Contract brings together an impressive collection of essays on contract law. Taking a comparative approach, the aim of the book is to address how the law of contract will develop over the next 25 years, as well as considering the ways in which changes to the way that contracts are made will affect the law. Topics include good faith; objectivity; exclusion clauses; economic duress; variation of contract; contract and privacy law in a digital environment; technological change; Choice of Court Agreements; and Islamic finance contracts. The chapters are written by leading academics from England, Australia, Canada, the United States, Singapore and Malaysia. As such, this collection will be of global interest and importance to professionals, academics and students of contract law.
