International Perspectives and Empirical Findings on Child Participation - Tali Gal 2015-03-20

The 1989 UN Convention on the Rights of the Child has inspired advocates and policy makers across the globe, injecting children's rights terminology into various public and private arenas. Children's right to participate in decision-making processes affecting their lives is the acme of the Convention and its central contribution to the children's rights discourse. At the same time the participation right presents enormous

challenges in its implementation. Laws, regulations and mechanisms addressing children's right to participate in decision-making processes affecting their lives have been established in many jurisdictions across the globe. Yet these worldwide developments have only rarely been accompanied with empirical investigations. The effectiveness of various policies in achieving meaningful participation for children of different ages, cultures and circumstances have remained largely unproven empirically. Therefore, with the growing awareness of the importance of evidence-based policies, it becomes clear that without empirical investigations on the implementation of children's right to participation it is difficult to promote their effective inclusion in decision making. This book provides a much-needed, first broad portrayal of how child participation is implemented in practice today. Bringing together 19 chapters written by prominent authors from the United States, Canada, the United Kingdom, Ireland, New Zealand, Australia, and Israel, the book includes descriptions of programs that engage children and youth in decision-making processes, as well as insightful findings regarding what children, their families, and professionals think about these programs. Beyond their contribution to the empirical evidence on ways

children engage in decision-making processes, the volume's chapters contribute to the theoretical development of the meaning of "participation," "citizenship," "inclusiveness," and "relational rights" in regards to children and youth. There is no matching to the book's scope both in terms of its breadth of subjects and the diversity of jurisdictions it covers. The book's chapters include experiences of child participation in special education, child protection, juvenile justice, restorative justice, family disputes, research, and policy making.

America's Teenagers--Myths and Realities - Sharon L. Nichols
2004-07-19

The media's presentation suggests that American teenage culture today is the most violent, sexual, and amoral youth culture in history. In this book, Nichols and Good deconstruct the negative images held by large numbers of adults. Recognizing that many teenagers are left by adults to socialize themselves and the consequences of this "careless indifference," the authors' goal is to influence a more positive view leading to stronger social policies and better services, resources, and programs to meet the needs of America's youth. Unique features of *America's Teenagers--Myths and Realities: Media Images, Schooling, and the Social Costs of Careless Indifference* include: *powerful analytic lenses used to revisit typical depictions of youth; *a wealth of information brought to bear on understanding teenagers' behavior; and

*consideration of a broad range of adolescent behaviors across critical socializing settings. The book begins with a discussion of the continuing myth of adolescence--how and why youth are devalued, and an overview of current beliefs about youth drawn from two 1990s Public Agenda Polls. This is followed by chapters on youth and the media, and the pressures that youth face in various dimensions of their lives. Topics include youth violence; the sex lives of teenagers; tobacco, alcohol, drugs, and teens; healthy living and decision making; working teens; and youth and education. The concluding chapter pulls together themes generated throughout the book and provides examples of policies that would underscore the value of viewing youth as a social investment. General guidelines are provided for teachers, parents, policymakers, and citizens to facilitate responding to youth in meaningful, proactive ways that improve the quality of life for teenagers and the broader society.

Teen 2.0 - Robert Epstein 2010-02-24

National Indie Excellence Awards, first prize in the Parenting and Family category Arguing that adolescence is an unnecessary period of life that people are better off without, this groundbreaking study shows that teen confusion and hardships are caused by outmoded systems that were designed to destroy the continuum between childhood and adulthood. Documenting how teens are isolated from adults and are forced to look to their media-dominated peers for knowledge, this discussion contends that by infantilizing young people, society does irrevocable harm to their development and well-being. Instead, parents, teachers, employers, and others must rediscover the adults in young people by giving them authority and responsibility as soon as they exhibit readiness. Teens are highly capable--in some ways more than adults--and this landmark discussion offers paths for reaching and enhancing the competence in America's youth.
