Genetics and the Behavior of Domestic Animals - Temple Grandin 2013-04-22

Behavior is shaped by both genetics and experience--nature and nurture. This book synthesizes research from behavioral genetics and animal and veterinary science, bridging the gap between these fields. The objective is to show that principles of behavioral genetics have practical applications to agricultural and companion animals. The continuing domestication of animals is a complex process whose myriad impacts on animal behavior are commonly under-appreciated. Genetic factors play a significant role in both species-specific behaviors and behavioral differences exhibited by individuals in the same species. Leading authorities explore the impact of increased intensities of selection on domestic animal behavior. Rodents, cattle, pigs, sheep, horses, herding and guard dogs, and poultry are all included in these discussions of genetics and behavior, making this book useful to veterinarians, livestock producers, laboratory animal researchers and technicians, animal trainers and breeders, and any researcher interested in animal behavior. Includes four new chapters on dog and fox behavior, pig behavior, the effects of domestication and horse behavior Synthesizes research from behavioral genetics, animal science, and veterinary literature Broaches fields of behavior genetics and behavioral research Includes practical applications of principles discovered by behavioral genetics researchers Covers many species ranging from pigs, dogs, foxes, rodents, cattle, horses, and cats

How to Build a Hug - Amy Guglielmo 2018-08-28

Amy Guglielmo, Jacqueline Tourville, and Giselle Potter come together to tell the inspiring story of autism advocate Dr. Temple Grandin and her brilliant invention: the hug machine. As a young girl, Temple Grandin loved folding paper kites, making obstacle courses, and building lean-tos. But she really didn't like hugs. Temple wanted to be held—but to her, hugs felt like being stuffed inside the scratchiest sock in the world; like a tidal wave of dentist drills, sandpaper, and awful cologne, coming at her all at once. Would she ever get to enjoy the comfort of a hug? Then one day, Temple had an idea. If she couldn't receive a hug, she would make one...she would build a hug machine!

Thinking in Pictures, Expanded Edition - Temple Grandin 2006-01-10

The 25th anniversary edition of this seminal work on autism and neurodiversity provides "a uniquely fascinating view" (Deborah Tannen, author of *You Just Don't Understand*) of the differences in our brains, and features updated research and insights. With a foreword by Oliver Sacks. Originally published in 1995 as an unprecedented look at autism, Grandin writes from the dual perspectives of a scientist and an autistic person to give a report from "the country of autism." Introducing a groundbreaking model which analyzes people based on their patterns of thought, Grandin "charts the differences between her life and the

lives of those who think in words" (The Philadelphia Inquirer). For the new edition, Grandin has written a new afterword addressing recent developments in the study of autism, including new diagnostic criteria, advancements in genetic research, updated tips, insights into working with children and young people with autism, and more.

Developing Talents - Temple Grandin 2008
Developing Talents: In this updated and expanded edition, the authors take an in-depth look at a growing area of the U.S. economy: entrepreneurship. Using real-life examples, they point out that many of the unique characteristics of individuals on the autism spectrum lend themselves well to entrepreneurial ventures. The book also explores many often unnoticed aspects of Vocational Rehabilitation programs that provide job training and placement for people with disabilities as well as Social Security Administration programs that offer vocational assistance. Finally, employment figures and prospects have been updated and new jobs have been added that are particularly well suited for those on the spectrum, resulting in the most

current look at the employment prospects for individuals with Asperger Syndrome and high-functioning autism.

Calling All Minds - Temple Grandin, Ph.D.

2019-04-30

From world-renowned autism spokesperson, scientist, and inventor Temple Grandin -- a book of personal stories, inventions, and facts that will blow young inventors' minds and make them soar. Have you ever wondered what makes a kite fly or a boat float? Have you ever thought about why snowflakes are symmetrical, or why golf balls have dimples? Have you ever tried to make a kaleidoscope or build a pair of stilts? In *Calling All Minds*, Temple Grandin explores the ideas behind all of those questions and more. She delves into the science behind inventions, the steps various people took to create and improve upon ideas as they evolved, and the ways in which young inventors can continue to think about and understand what it means to tinker, to fiddle, and to innovate. And laced throughout it all, Temple gives us glimpses into her own childhood tinkering, building, and inventing. More than a blueprint for how to build things, in *Calling All Minds* Temple Grandin creates a blueprint for different ways to look at the world. And more than a call to action, she gives a call to imagination, and shows readers that there is truly no single way to approach any given problem--but that an open and inquisitive mind is always key. Praise for *Calling All Minds*: "An impassioned call to look at the world in unique ways with plenty of practical advice on how to cultivate a curious, inquiring, imaginative mind." —Kirkus Reviews "Both practical and inspirational, this useful book describes an overall approach to viewing the world creatively, as exemplified by the numerous projects and supporting material provided here." —VOYA "Grandin offers a nuanced perspective on the qualities of a successful inventor—notably, a sense of wonder and curiosity, careful observation, and the willingness to learn from mistakes." —Publishers Weekly

Animals in Translation - Temple Grandin 2006
Animals in Translation is the culmination of Temple Grandin's extraordinary life's work, drawing upon the latest research, her distinguished career as an animal scientist and her own experience of being autistic. With co-author Catherine Johnson, Grandin argues that while 'normal people' convert experience into words and abstractions, animals and autistics process the world as sensory information - specific pictures, sights and sounds. This difference is the key to understanding how animals see, think and feel. As much a revelation about life with autism as it is about life with animals, Animals in Translation explores pain, fear, aggression, love, friendship, communication and learning in a startling book that will change the way you think about animals.

The Autistic Brain - Temple Grandin 2013
Offers the latest research and science on autism, including new neuroimaging and genetic research that provide new theories on what causes autism spectrum disorders as well as new ways to treat and diagnose them.

Who Is Temple Grandin? - Patricia Brennan Demuth 2020-04-07

Autism did not stop her--in fact, it helped Temple Grandin become a brilliant scientist and inventor. Temple Grandin wasn't officially diagnosed with autism until she was in her 40s, but she knew at an early age that she was different from her family and classmates. She couldn't show affection, she acted out when noises or other stimuli overwhelmed her, and she only felt comfortable when spending time with the animals on her aunt's ranch. But instead of seeing her differences as limitations, Temple used them to guide her education and career in animal science. She has become a leading advocate for the autistic as well as for the humane treatment of animals at meat packing companies. This inspiring biography by Patricia Brennan Demuth shines a light on Temple Grandin's intellect, creativity, and unique spirit.
