Cities at War - Mary Kaldor 2020-03-31

Warfare in the twenty-first century goes well beyond conventional armies and nation-states. In a world of diffuse conflicts taking place across sprawling cities, war has become fragmented and uneven to match its settings. Yet the analysis of failed states, civil war, and state building rarely considers the city, rather than the country, as the terrain of battle. In *Cities at War*, Mary Kaldor and Saskia Sassen assemble an international team of scholars to examine cities as sites of contemporary warfare and insecurity. Reflecting Kaldor's expertise on security cultures and Sassen's perspective on cities and their geographies, they develop new insight into how cities and their residents encounter instability and conflict, as well as the ways in which urban forms provide possibilities for countering violence. Through a series of case studies of cities including Baghdad, Bogotá, Ciudad Juarez, Kabul, and Karachi, the book reveals the unequal distribution of insecurity as well as how urban capabilities might offer resistance and hope. Through analyses of how contemporary forms of identity, inequality, and segregation interact with the built environment, *Cities at War* explains why and how political violence has become increasingly urbanized. It also points toward the capacity of the city to shape a different kind of urban subjectivity that can serve as a foundation for a more peaceful and equitable future.

A Dangerous Assignment: An Artillery Forward Observer In World War 2 - William B. Hanford 2020-02-04

Merriam Press World War 2 Memoir. Corporal Bill Hanford had one of the US Army's most dangerous jobs in World War II: artillery forward observer (FO). Tasked with calling in heavy fire on the enemy, FOs accompanied infantrymen into combat, crawled into no-man's-land, and ascended observation posts like hills and ridges to find their targets. But beyond the usual perils of ground combat, FOs were specially targeted by the enemy because of their crucial role in directing artillery fire. Hanford spent much of his time fighting in the Vosges Mountains in eastern France and then in Germany in late 1944/early 1945. Rare memoir of a risky job performed by relatively few troops. Honest and observant narrative describes the good, bad, and ugly of the war. Originally published by Stackpole Books in 2008 and discontinued in 2015, this brand new edition from Merriam Press has a completely revised and improved design with additional photos. 23 photos.

Hav - Jan Morris 2011-08-30

A New York Review Books Original Hav is like no place on earth. Rumored to be the site of Troy, captured during the crusades and recaptured by Saladin, visited by Tolstoy, Hitler, Grace Kelly, and Princess Diana, this Mediterranean city-state is home to several architectural marvels and an annual rooftop race that is a feat of athleticism and insanity. As Jan Morris guides us through the corridors and quarters of Hav, we hear the mingling of Italian, Russian, and Arabic in its markets, delight in its famous snow raspberries, and meet the denizens of its casinos and cafés. When Morris published *Last Letters from Hav* in 1985, it was short-listed for the Booker Prize. Here it is joined by *Hav of the Myrmidons*, a sequel that brings the story up-to-date. Twenty-first-century Hav is nearly unrecognizable. Sanitized and monetized, it is ruled by a group of fanatics who have rewritten its history to reflect their own blinkered view of the past. Morris's only novel is dazzlingly sui-generis, part erudite travel memoir, part speculative fiction, part cautionary political tale. It transports the reader to an extraordinary place that never was, but could well be.

Battle Focused Training (FM 7-1) - Department of the Army 2012-09-30
Battle Focused Training, FM 7-1, is the Army's doctrinal foundation for how to train, and it is applicable to all units and organizations of the Army. It explains how the Army assesses, plans, prepares, and executes training and leader development; it is critical to all the Army does. The goal of this manual is to create leaders who know how to think and apply enduring training principles to their units and organizations. FM 7-0 introduces the training cycle, the linkage of Army training and leader development, and the three domains where training occurs—the operational, institutional, and self-development domains. FM 7-1 defines The Army Training System, outlines who is responsible for training and training support, and describes how to conduct training. This top-to-bottom understanding of training—ranging from policy and resources allocation at Headquarters, Department of the Army to unit and organization methods—is critical to executing training successfully and to linking the three domains where training occurs. The training doctrine in this manual will shape Army training regulations and support unit and organization training plans. The emphasis is on teaching leaders to think through the training process, as opposed to simply following a prescribed method. There is no training model or strategy that can achieve warfighting readiness in a unit without intensive leadership to build both competence and confidence. FM 7-1 builds on task, condition, and standards-based training. Knowing the task, assessing the level of proficiency against the standard, and developing a sustaining or improving training plan is the essence of all Army training and development. But warfighting readiness is about more than just technical competence. It is about developing confidence through trust—soldier-to-soldier, leader-to-led, and unit-to-unit—and the will to succeed. It is about leadership. Understanding how to conduct tough, realistic training at every echelon of the Army sets the foundation for successful multi echelon, joint, interagency, and coalition operations. Leaders train the unit and organizational capabilities required to fight and win across the full spectrum of operations. This manual provides leaders with the doctrinal guidelines for how to train, and is the basis for successful training and operations. Soldiers have never let the nation fail—it is essential to train soldiers and units to uphold the Army's nonnegotiable contract with the American people—to fight and win the nation's wars, decisively.
