Adoption, Identity, and Kinship - Katarina Wegar 2008-10-01

Sociologist Katarina Wegar offers a new perspective on adoption and the search debate, placing them within a social context. She argues that Americans who are embroiled in adoption controversies have failed to understand how much the debate, adoption research, and the experience of adoption itself are affected by persistent social beliefs that adopted children are different from and somehow inferior to children reared by their biological families. Wegar begins by considering the historical and legal development of adoption and of sealed-records policies, showing how kinship ideology, the helping professions, and gender issues intersect to frame adoption policies and the ongoing debate. Drawing on articles in social work and mental health journals, activist newsletters, and autobiographies by search

activists, as well as on popular images of adoption portrayed in talk shows and other media, she analyzes the rhetoric to reveal the unconscious biases that exist. She concludes with a discussion of ways in which adoption reformers can avoid perpetuating harmful and confining images of those who participate in adoption.

Beggars and Choosers - Rickie Solinger 2002-09-18

In the late 1960s and early 1970s, advocates of legal abortion mostly used the term rights when describing their agenda. But after Roe v. Wade, their determination to develop a respectable, nonconfrontational movement encouraged many of them to use the word choice--an easier concept for people weary of various rights movements. At first the distinction in language didn't seem to make much difference--the law seemed to guarantee both. But in the years since, the change has become enormously important. In *Beggars and Choosers*, Solinger shows how historical distinctions between women of color and white women, between poor and middle-class women, were used in new ways during the era of "choice." Politicians and policy makers began to exclude certain women from the class of "deserving mothers" by using the language of choice to create new public policies concerning everything from Medicaid funding for abortions to family tax credits, infertility treatments, international adoption, teen pregnancy, and welfare. Solinger argues that the class-and-race-inflected guarantee of "choice" is a shaky foundation on which to build our notions of reproductive freedom. Her impassioned argument is for reproductive rights as human rights--as a basis for full citizenship status for women.

The story every mother in America needs to read. As featured on NPR and the TODAY Show. All moms have to deal with choosing baby names, potty training, finding your village, and answering your kid's tough questions, but if you are raising a Black child, you have to deal with a lot more than that. Especially if you're a single Black mom... and adopting. Nefertiti Austin shares her story of starting a family through adoption as a single Black woman. In this unflinching account of her parenting journey, Nefertiti examines the history of adoption in the African American community, faces off against stereotypes of single Black moms, and confronts the reality of what it looks like to raise children of color and answer their questions about racism in modern-day America. Honest, vulnerable, and uplifting, *Motherhood So White* is a fantastic book for mothers who have read *White Fragility* by Robin DiAngelo, *Stamped from the Beginning* by Ibram X. Kendi, *Why Are All The Black Kids Sitting Together in the Cafeteria?* by Beverly Daniel Tatum, or other books about racism and want to see how these social issues play out in a very personal way for a single mom and her Black son. American Baby - Gabrielle Glaser 2022-01-25

A New York Times Notable Book The shocking truth about postwar adoption in America, told

through the bittersweet story of one teenager, the son she was forced to relinquish, and their search to find each other. "[T]his book about the past might foreshadow a coming shift in the future... 'I don't think any legislators in those states who are anti-abortion are actually thinking, "Oh, great, these single women are gonna raise more children." No, their hope is that those children will be placed for adoption. But is that the reality? I doubt it.'"[says Glaser]" -Mother Jones During the Baby Boom in 1960s America, women were encouraged to stay home and raise large families, but sex and childbirth were taboo subjects. Premarital sex was common, but birth control was hard to get and abortion was illegal. In 1961, sixteen-year-old Margaret Erle fell in love and became pregnant. Her enraged family sent her to a maternity home, where social workers threatened her with jail until she signed away her parental rights. Her son vanished, his whereabouts and new identity known only to an adoption agency that would never share the slightest detail about his fate. The adoption business was founded on secrecy and lies. *American Baby* lays out how a lucrative and exploitative industry removed children from their birth mothers and placed them with hopeful families, fabricating stories about infants' origins and destinations, then closing the door firmly between the parties forever. Adoption agencies and other organizations that purported to help pregnant women struck unethical deals with doctors and researchers for pseudoscientific "assessments," and shamed millions of women into surrendering their children. The identities of many who were adopted or who surrendered a child in the postwar decades are still locked in sealed files. Gabrielle Glaser dramatically illustrates in Margaret and David's tale—one they share with millions of Americans—a story of loss, love, and the search for identity.

Increasing the adoption of conservation agriculture: A framed field experiment in Northern Ghana - Ambler, Kate 2020-05-25

Conservation agriculture techniques can increase agricultural production while decreasing CO₂ emissions, yet adoption in the developing world remains low—in part because many years of continuous adoption may be required to realize gains in production. We conduct a framed field experiment in northern

Ghana to study how randomly assigned incentives and peer information may affect adoption. Incentives increase adoption, both while they are available and after withdrawal. There is no overall effect of peer information, but we do find evidence that information about long-term adoption increased adoption, particularly when that information shows that production gains have been achieved.

Global Families, Inequality and Transnational Adoption - Riitta Högbacka
2017-01-18

This book looks at the simultaneous processes of making and un-making of families that are part of the adoption practice. Whereas most studies on transnational adoption concentrate on the adoptive family, the author identifies not only the happy occasion when a family gains a child, but also the sorrow and loss of the child to its family of origin. Situating transnational adoption

in the context of the Global North-South divide, Hogbacka investigates the devastating effects of unequal life chances and asymmetrical power relations on the adoption process and on the mothers whose children are adopted. Based on unique primary material gathered in in-depth interviews with South African families of origin and Finnish adoptive families, the book investigates the decision-making processes of both sets of parents and the encounters between them. The first mothers' narratives are juxtaposed with those of the adopters and of the adoption social workers who act on the principles of the wider adoption system. Concluding with a critique of the Global Northism that exemplifies current practices, Hogbacka sketches the contours of a more just approach to transnational adoption that would shatter rather than perpetuate inequality. The book can also be read as an expose of the consequences of current inequalities for poor families. *Global Families, Inequality and Transnational Adoption* will be of interest to students and scholars of adoption studies, family and kinship, sociology, anthropology, social work and development.
