Encyclopedia of Inland Waters
- 2009-03-19

Inland aquatic habitats occur world-wide at all scales from marshes, swamps and temporary puddles, to ponds, lakes and inland seas; from streams and creeks to rolling rivers. Vital for biological diversity, ecosystem function and as resources for human life, commerce and leisure, inland waters are a vital component of life on Earth. The Encyclopedia of Inland Waters describes and explains all the basic features of the subject, from water chemistry and physics, to the biology of aquatic creatures and the complex function and balance

of aquatic ecosystems of varying size and complexity. Used and abused as an essential resource, it is vital that we understand and manage them as much as we appreciate and enjoy them. This extraordinary reference brings together the very best research to provide the basic and advanced information necessary for scientists to understand these ecosystems - and for water resource managers and consultants to manage and protect them for future generations.

Encyclopedic reference to Limnology - a key core subject in ecology taught as a specialist course in universities Over 240 topic related articles cover the field Gene Likens is a renowned limnologist and conservationist, Emeritus Director of the Institute of Ecosystems Research, elected member of the American Philosophical Society and recipient of the 2001 National Medal of Science Subject Section Editors and authors include the very best research workers in the field

The Concise Animal Encyclopedia - David Burnie
2003

This compact marvel covers the animal kingdom from the tiniest protozoan to the mightiest mammal. Organized by classification and packed with vibrant photographs and informative detail, this visual safari covers the gamut of phylums, classes, orders, families, and genus, including invertebrates, insects, amphibians, mammals, birds, and reptiles. Encyclopedia of Deserts - Michael A. Mares 2017-01-19
Encyclopedia of Deserts represents a milestone: it is the first comprehensive reference to the first comprehensive reference to deserts and semideserts of the world. Approximately seven hundred

entries treat subjects ranging from desert survival to the way deserts are formed. Topics include biology (birds, mammals, reptiles, amphibians, fishes, invertebrates, plants, bacteria, physiology, evolution), geography, climatology, geology, hydrology, anthropology, and history. The thirty-seven contributors, including volume editor Michael A. Mares, have had extensive careers in deserts research, encompassing all of the world's arid and semiarid regions. The Encyclopedia opens with a subject list by topic, an organizational guide that helps the reader grasp interrelationships and complexities in desert systems. Each entry concludes with cross-references to other entries in the volume, inviting the reader to embark on a personal expedition into fascinating, previously unknown terrain. In addition a list of important readings facilitates in-depth study of each topic. An exhaustive index permits quick access to places,

topics, and taxonomic listings of all plants and animals discussed. More than one hundred photographs, drawings, and maps enhance our appreciation of the remarkable life, landforms, history, and challenges of the world's arid land.

[Animal](#) - David Burnie 2011
Offers photographs and information about mammals, birds, reptiles, amphibians, fishes, and invertebrates from throughout the world.

Photographic reference with facts about twenty-five hundred animal species that detail animal habitats, life cycles, and conservation efforts. Includes glossary and separately paged section at the end, Amazing animal facts.

Encyclopedia of Animals - 2003-01

Humans have always relied heavily on animals. We have worshipped them, befriended them, sacrificed them, domesticated them, eaten them, hunted them, drawn them, and written about them. We have come to appreciate them, especially in their natural habitats, as an essential part of our world. They are creatures that deserve our respect and reward our curiosity. As intrinsic as they are to the ecological balance of our world, animals are under threat from their human admirers, and in dire need of our help. Habitat destruction spells disaster for many species, leaving them teetering on the brink of extinction. Only through a greater

understanding of the fragile balance that exists between species and their habitats will it become possible for us to ensure the survival of our precious wildlife heritage. This comprehensive encyclopedia presents a wide-ranging survey of four major groups of living things: mammals, birds, reptiles, and amphibians. The text is written by a team of international experts in the zoological sciences. It is carefully constructed to be read and appreciated by everyone with an interest in natural history. Complemented by superb full-color photographs by the world's leading wildlife photographers, and specially commissioned illustrations, maps, and diagrams, this stunning volume gives an up-to-date overview of nature's most enthralling creatures. A team of internationally renowned authorities has provided the text for this publication. The photographs have been provided by some of the world's leading wildlife photographers. The original

illustrations are by specialist wildlife artist Dr David Kirshner. Book jacket.

The Audubon Society Encyclopedia of Animal Life - Ralph Buchsbaum 1982

Offers photographs and brief descriptions of many of the world's mammals, birds, reptiles, amphibians, fishes, and invertebrates

Illustrated Encyclopedia of Animal Life - Charlotte Uhlenbroek 2012-03-01

A thrilling face-to-face encounter with the intimate lives, elaborate displays and extraordinary behaviour of animals in the wild. Internationally renowned zoologist and TV presenter, Charlotte Uhlenbroek, brings the animal kingdom to vivid life in the Illustrated Encyclopedia of Animal Life. Illustrated with astonishing wildlife photography and action sequences, every aspect of animal life and behaviour is explored and explained - from courtship rituals and birth to hunting and death. Mammals, birds, reptiles, amphibians, fish and invertebrates - thousands of all kinds are featured as well as explanations on how the animal kingdom is organised and how animals' bodies function. Plus, critical

conservation issues are also explored. From the fleeting life of a mayfly to the ten-year courtship of the manakin, the Illustrated Encyclopedia of Animal Life lays bare the animal kingdom in all its awe-inspiring glory and detail.

Firefly Encyclopedia of Animals

- Philip Whitfield 2014

A lavishly illustrated who's who of the animal kingdom. Firefly Encyclopedia of Animals is a stunning new reference guide to 840 members of the Animal Kingdom from every continent - North and South America, Africa, Europe, Asia and Australia. More than 1,000 commissioned full-color watercolors, photographs and distribution maps describe the animal world for readers of all ages. From the smallest mouse to the largest whale, this book offers a detailed and thorough guide to a wide array of mammals, birds, reptiles, amphibians and fish, as well as insects, spiders and other invertebrates. Firefly Encyclopedia of Animals presents accurate, succinct and essential information, as

follows: General descriptions of animal Orders and Families
Common and species names
Shared characteristics in animal groups
Describes size, distribution, anatomy, ecology
migration, habitats and survival skills
Features on animal behavior
Accurate labeled illustrations and maps
Wildlife conservation and updates on endangered animals.
In addition to the principal text, there are side illustrations throughout along with fast-fact panels. Written in clear language that will engage readers of all ages, this authoritative reference is ideal for home and school, where it will be especially useful for natural history reports.

Animal - DK 2017-09-12

View the animal kingdom up close as never before in this breathtaking title, which has already sold over 1.5 million copies. Written by 70 specialists, it features stunning wildlife photography of more than 2000 of the world's most important wild mammals, birds, reptiles, amphibians, and insects. With around two

million species identified to date, animals are the dominant and most varied form of life on the planet. Animal presents a representative selection, ranging from the giant baleen whale, to fast-moving predators such as sharks, big cats, and birds of prey, as well as microscopic beetles barely 1mm long and other insects. It presents some of the latest species to be described: meet the cute but elusive olinguito from South America, which was only identified in 2013, or the skywalker hoolock gibbon that was named after a Star Wars character in 2017. Animal also explains how the earth's biodiversity is in sharp decline and the conservation projects underway to safeguard precious species. For each one, it gives a locator map and statistics, including its conservation status. For anyone who wants a reliable and enthralling reference, in which you can find the answers to everything - from why zebras are striped or how the sunbear got its name - Animal is your essential one-stop guide.

The encyclopedia of animals - 2008

Animals Alive - DK
2011-03-21

What will life on Earth be like in one hundred years? Which species will go extinct and what new species will we discover? From the fantastical to the practical, *Animals Alive* looks at the possibility of re-creating extinct animals and provides information on what you can do to help keep animals alive. *Animals Alive* is an exciting exploration of animal life through the ages. Earth was once home to some very strange species, from a giant sloth the size of an

African elephant, to the woolly mammoth and saber-toothed tiger. But why are they not alive today? The concept of extinction is explained, with a look at the death of the dinosaurs and the other major extinction events. We meet some of the "fossil species" that have outlived the dinosaurs and look at why they are so successful, as well as some of the animals pushed to extinction by people. Looking to the present, *Animals Alive* celebrates the diversity of life on Earth today. Animal profiles are packed with photos and include key facts, distribution data, and awe-inspiring information. Learn about the amazing long-distance flights of the wandering albatross, find out how the great white shark uses electricity to track down prey, and witness the extraordinary migration of the monarch butterflies.

Children's First Animal Encyclopedia - Claudia Martin
