Douglas R Hofstadter

Analogy is the core of all thinking. This is the simple but unorthodox premise that Pulitzer Prize -- winning author Douglas Hofstadter and French psychologist Emmanuel Sander defend in their new work.

thought for over thirty years. Now, with his trademark wit and special talent for making complex ideas vivid, he has partnered with Sander to put forth a highly novel perspective on cognition. We are constantly faced with a swirling and intermingling multitude of ill-defined situations. Our brain's job is to try to make sense of this unpredictable, swarming chaos of stimuli. How does it do so? The ceaseless hail of input triggers analogies galore, helping us to pinpoint the essence of what is going on. Often this means the spontaneous evocation of words, sometimes idioms, sometimes the triggering of nameless, long-buried memories. Why did two-year-old Camille proudly exclaim, "I undressed the banana!"? Why do people who hear a story often blurt out, "Exactly the same thing happened to me!" when it was a completely different event? How do we recognize an aggressive driver from a split-second glance in our rearview mirror? What in a friend's remark triggers the

offhand reply, "That's just sour grapes"? What did Albert Einstein see that made him suspect that light consists of particles when a century of research had driven the final nail in the coffin of that long-dead idea? The answer to all these questions, of course, is analogy-making -- the meat and potatoes, the heart and soul, the fuel and fire, the gist and the crux, the lifeblood and the wellsprings of thought. Analogy-making, far from happening at rare intervals, occurs at all moments, defining thinking from top to toe, from the tiniest and most fleeting thoughts to the most creative scientific insights. Like Gö, Escher, Bach before it, *Surfaces and Essences* will profoundly enrich our understanding of our own minds. By plunging the reader into an extraordinary variety of colorful situations involving language, thought, and memory, by revealing bit by bit the constantly churning cognitive mechanisms normally completely hidden from view, and by discovering in them one

central, invariant core -- the incessant, unconscious quest for strong analogical links to past experiences -- this book puts forth a radical and deeply surprising new vision of the act of thinking.

Faculty Meetings with Rudolf Steiner: 1919-1922 -

Rudolf Steiner 1998
The Waldorf School movement has its roots in the chaotic period following the First World War. Struggling to create the first school, Rudolf Steiner worked on every detail. Lesson plans, religious education, school hours, course resources, administration, finance, child study; no aspect of school life was beyond his attention. Guiding the faculty and demonstrating a phenomenal range of knowledge, Steiner moved toward his goal of creating a vehicle for social transformation. These two volumes span the years 1919 to 1924 and cover, meeting by meeting, the development of the first Waldorf School. Here is Rudolf Steiner, not through the written word or lectures but in transcribed interaction that details the creation process. Participating in a work in progress, Steiner deals with an amazing array of problems, frustrations, successes and failures. His sleeves rolled up and his sight on a vision that he made a reality, Rudolf

Steiner lays the foundations of Waldorf Education. This detailed look, behind the scenes, will interest not only teachers, but also parents and students: anyone who wants to know how a successful worldwide school movement arose.

Cork Dork - Bianca Bosker

"Thrilling . . . [told] with gonzo élan . . . When the sommelier and blogger Madeline Puckette writes that this book is the Kitchen Confidential of the wine world, she's not wrong, though Bill Buford's Heat is probably a shade closer."

journalist and amateur drinker Bianca Bosker didn't know much about wine—until she discovered an alternate universe where taste reigns supreme, a world of elite sommeliers who dedicate their lives to the pursuit of flavor. Astounded by their fervor and seemingly superhuman sensory

powers, she set out to uncover what drove their obsession, and whether she, too, could become a “cork dork.” With boundless curiosity, humor, and a healthy dose of skepticism, Bosker takes the reader inside underground tasting groups, exclusive New York City restaurants, California mass-market wine factories, and even a neuroscientist’s fMRI machine as she attempts to answer the most nagging question of all: what’s the big deal about wine? What she learns will change the way you drink wine—and, perhaps, the way you live—forever. “Think: Eat, Pray, Love meets Somm.”

We Call Them Beautiful - KC Trommer 2019-03-27

We Call Them Beautiful is a vibrant debut, filled with emergencies and responses to them. “This, all this, is the making of you,” the poet KC Trommer writes, reminding us that what we live through changes us and the stories we

tell about our lives. In these poems of love, pleasure, and survival, the poet navigates the cold menace of the Atlantic Ocean, the wild terrors of sex and carnival rides, the bittersweetness of watching her sleeping child’s quiet breathing, all while mapping the power, joy, and dangers of being a woman in the world. Drawing its strength from discovery, We Call Them Beautiful explores the necessary making and remaking of the self, through art and stories, while looking unflinchingly at the ways that time works on us all.
