Markets in Profile - James F. Dalton 2011-01-11

Markets in Profile explores the confluence of three disparate philosophical frameworks: the Market Profile, behavioral finance, and neuroeconomics in order to present a unified theory of how markets work. The Market Profile is an ever-evolving, multidimensional graphic that gives visual form to the market's continuing auction process, revealing the myriad underlying dynamics that influence market activity. Behavioral finance posits that investors are driven more by emotional factors and the subjective interpretation of minutia than by "rationality" when making investment decisions. And neuroeconomics is the study of how investor psychology permeates and affects the financial markets. Mr. Dalton explicates the ways in which irrational human behavior influences the market's natural auction process, creating frequently predictable market structure, which results in opportunities for investors to ameliorate risk. The book will improve investors ability to interpret change in markets, enabling better, more confident investment decisions.

Marc Rivalland on Swing Trading - Marc Rivalland 2002-11

Although the ranks of swing traders swell daily, not many traders know that there is a type of chart, a swing chart, which is designed specifically for swing trading. In this ground-breaking book, Marc Rivalland, author of 'The Trader' column in Investors Chronicle, shows how swing charts can be used to perfect market timing. Point & figure is enjoying an enormous resurgence. Readers of this book will discover new insights into this proven and popular 100+ year old method of charting share prices. Marc reveals his proprietary method of integrating swing charts and point & figure charts to further increase the chances of success. Each technique is critically examined. The advantages are highlighted but t
