Mini Weapons of Mass Destruction: Build a Secret Agent Arsenal - John Austin 2011

"As a budding spy, what better way to conceal your clandestine activities than to miniaturize your secret agent arsenal? Hide a mini catapult in a breath mint tin. Turn a Tic Tac case into vest-pocket candy shooter. Or transform a milk jug cap onto a fake wristwatch that launches tiny paper darts. Toy designer and author John Austin provides detailed, step-by-step instructions with diagrams to show James Bondiacs how to build 35 different spy weapons and surveillance tools. All of the projects in Mini Weapons of Mass Destruction 2 are built from common household items—binder clips, playing cards, rubber bands, markers, clothespins, paper clips, and discarded packaging—clearly detailed on materials lists. In addition to movie-inspired sidearms and other "weapons," you'll find plans to construct periscopes, bionic ears, grappling hooks, and decipher pens. Once you have assembled your arsenal, the author provides a number of ideas on how to hide your stash—inside a deck of cards, a false-bottom soda bottle, or a cereal box briefcase—and targets for practicing your spycraft, including a flip-down firing range, a fake security camera, and sharks with laser beams. And if you think yourself more of an evil-genius in training, this book also has projects to keep you busy while you finish planning your volcano lair—a Q-pick blow gun, a paper throwing star, a bowler hat launcher, and more. Fluffy Persian cat not included"—Provided by publisher.

The Darwin Elevator - Jason M. Hough 2013-07-30

NEW YORK TIMES BESTSELLER Jason M. Hough's pulse-pounding debut combines the drama, swagger, and vivid characters of Joss Whedon's *Firefly* with the talent of sci-fi author John Scalzi. In the mid-23rd century, Darwin, Australia, stands as the last human city on Earth. The world has succumbed to an alien plague, with most of the population transformed into mindless, savage creatures. The planet's refugees flock to Darwin, where a space elevator—created by the architects of this apocalypse, the Builders—emits a plague-suppressing aura. Skyler Luiken has a rare immunity to the plague. Backed by an international crew of fellow "immunes," he leads missions into the dangerous wasteland beyond the aura's edge to find the resources Darwin needs to stave off collapse. But when the Elevator starts to malfunction, Skyler is tapped—along with the brilliant scientist, Dr. Tania Sharma—to solve the mystery of the failing alien technology and save the ragged remnants of humanity. Praise for *The Darwin Elevator* "A hell of a fun book."—James S. A. Corey, New York Times bestselling author of *Abaddon's Gate* "[Jason M.] Hough's first novel combines the rapid-fire action and memorable characters associated with Joss Whedon's short-lived *Firefly* TV series with the accessibility and scientific acumen of [James S. A.] Corey's 'Expanses' series."—Library Journal (starred review) "The best part about alien stories is their mystery, and Jason Hough understands that like no other. Full of compelling characters and thick with tension, *The Darwin Elevator* delivers both despair and hope along with a gigantic dose of wonder. It's a brilliant debut, and Hough can take my money whenever he writes anything from now on."—Kevin Hearne, New York Times bestselling author of *The Iron Druid Chronicles* "Newcomer Hough displays a talent for imaginative plotting and realistic dialogue, and the brisk pacing and cliffhanger ending will keep readers enthralled and eagerly awaiting the next installment."—Publishers Weekly "Jason M. Hough does a great job with this huge story. The world of Darwin and the Elevator is deliciously complex and satisfying. Skyler, Tania, and all the other characters are delightfully drawn and fun to spend time with. . . . The story unfolds with just the right balance of high adventure, espionage, humor, and emotional truth. . . . As soon as you finish, you'll want more."—Analog "A debut novel unlike any other . . . This is something special. Something iconic. *The Darwin Elevator* is full of majesty and wonder, mystery and mayhem, colorful characters and insidious schemes."—SF Signal "Fun, action-packed and entertaining . . . a sure contender for science fiction debut of the year!"—Pat's Fantasy Hotlist "Claustrophobic, intense, and satisfying . . . I couldn't put this book down. *The Darwin Elevator* depicts a terrifying world, suspends it from a delicate thread, and forces you to read with held breath as you anticipate the inevitable fall."—Hugh Howey, New York Times bestselling author of *Wool*

Reading it will change your heart' Christian Kiefer, author of *Phantoms* * The Long Way to a Small, Angry Planet meets *The 100* in this unforgettable debut by a brilliant new voice. * A century ago, scientists theorised that a habitable planet existed in a nearby solar system. Today, ten astronauts will leave a dying Earth to find it. Four are decorated veterans of the 20th century’s space-race. And six are teenagers, graduates of the exclusive Dalton Academy, who’ve been in training for this mission for most of their lives. It will take the team twenty-three years to reach Terra-Two. Twenty-three years spent in close quarters. Twenty-three years with no one to rely on but each other. Twenty-three years with no rescue possible, should something go wrong. And something always goes wrong. * Don't miss one of *Cosmopolitans* books by people of colour to get excited about in 2019, called 'a tightly wound epic' that 'will change your heart' by Christian Kiefer, author of *Phantoms*. * WHY READERS DREAM OF TERRA-TWO . . . 'An ambitious 500-page coming-of-age blockbuster . . . Oh is excellent at portraying the aching sense of loss on a one-way trip to the stars' Guardian 'A tightly wound, emotional epic that asks important questions about humanity, goodness, belief, technology, love, friendship, and duty. At what point is grabbing hold of one’s destiny ultimately an attempt to escape some other? Like all great writers, Temi Oh refuses the easy answer, instead ruminating upon the question itself. This novel is a brilliant, beautiful debut. Reading it will change your heart.' Christian Kiefer, author of *Phantoms* 'One of the most absorbing books I have ever read' 'This book seemed to take over my life whilst I was reading it - if I wasn't actually reading, I was thinking about it' 'I'm in love with this book . . . Blueprint for Revolution - Srdja Popovic 2015-02-03

An urgent and accessible handbook for peaceful protesters, activists, and community organizers—anyone trying to defend their rights, hold their government accountable, or change the world *Blueprint for Revolution* will teach you how to • make oppression backfire by playing your opponents' strongest card against them • identify the “almighty pillars of power” in order to shift the balance of control • dream big, but start small: learn how to pick battles you can win • listen to what people actually care about in order to incorporate their needs into your revolutionary vision • master the art of compromise to bring together even the most disparate groups • recognize your allies and view your enemies as potential partners • use humor to make yourself heard, defuse potentially violent situations, and “laugh your way to victory” Praise for *Blueprint for Revolution* “The title is no exaggeration. Otpor's methods . . . have been adopted by democracy movements around the world. The Egyptian opposition used them to topple Hosni Mubarak. In Lebanon, the Serbs helped the Cedar Revolution extricate the country from Syrian control. In Maldives, their methods were the key to overthrowing a dictator who had held power for thirty years. In many other countries, people have used what Canvas teaches to accomplish other political goals, such as fighting corruption or protecting the environment.”—The New York Times “A clear, well-constructed, and easily applicable set of principles for any David facing any Goliath (sans slingshot, of course) . . . By the end of *Blueprint*, the idea that a punch is no match for a punch line feels like anything but a joke.”—The Boston Globe “An entertaining primer on the theory and practice of peaceful protest.”—The Guardian “With this wonderful book, Srdja Popovic is inspiring ordinary people facing injustice and oppression to use this tool kit to challenge their oppressors and create something much better. When I was growing up, we dreamed that young people could bring down those who misused their power and create a more just and democratic society. For Srdja Popovic, living in Belgrade in 1998, this same dream was potentially a much more dangerous idea. But with an extraordinarily courageous group of students that formed Otpor!, Srdja used imagination, invention, cunning, and lots of humor to create a movement that not only succeeded in toppling the brutal dictator Slobodan Milošević but has become a blueprint for nonviolent revolution around the world. Srdja rules!”—Peter Gabriel “*Blueprint for Revolution* is not only a spirited guide to changing the world but a breakthrough in the annals of advice for those who seek justice and democracy. It asks (and not heavy-handedly): As long as you want to change the world, why not do it joyfully? It's not just funny. It's

seriously funny. No joke.”—Todd Gitlin, author of *The Sixties* and *Occupy Nation*

An Immense World - Ed Yong 2022-06-21

NEW YORK TIMES BESTSELLER • A “thrilling” (The New York Times), “dazzling” (The Wall Street Journal) tour of the radically different ways that animals perceive the world that will fill you with wonder and forever alter your perspective, by Pulitzer Prize-winning science journalist Ed Yong “One of this year's finest works of narrative nonfiction.”—Oprah Daily ONE OF THE TEN BEST BOOKS OF THE YEAR: The Wall Street Journal, The New York Times, Time, Publishers Weekly, BookPage ONE OF THE BEST BOOKS OF THE YEAR: Oprah Daily, The Washington Post, Kirkus Reviews The Earth teems with sights and textures, sounds and vibrations, smells and tastes, electric and magnetic fields. But every kind of animal, including humans, is enclosed within its own unique sensory bubble, perceiving but a tiny sliver of our immense world. In *An Immense World*, Ed Yong coaxes us beyond the confines of our own senses, allowing us to perceive the skeins of scent, waves of electromagnetism, and pulses of pressure that surround us. We encounter beetles that are drawn to fires, turtles that can track the Earth's magnetic fields, fish that fill rivers with electrical messages, and even humans who wield sonar like bats. We discover that a crocodile's scaly face is as sensitive as a lover's fingertips, that the eyes of a giant squid evolved to see sparkling whales, that plants thrum with the inaudible songs of courting bugs, and that even simple scallops have complex vision. We learn what bees see in flowers, what songbirds hear in their tunes, and what dogs smell

on the street. We listen to stories of pivotal discoveries in the field, while looking ahead at the many mysteries that remain unsolved. Funny, rigorous, and suffused with the joy of discovery, *An Immense World* takes us on what Marcel Proust called "the only true voyage . . . not to visit strange lands, but to possess other eyes." FINALIST FOR THE KIRKUS PRIZE • FINALIST FOR THE ANDREW CARNEGIE MEDAL

Mini Weapons of Mass Destruction - John Austin 2017-06-05

We've come a long way from the Peashooter Era: with the advent of modern household products and office supplies - foldback clips, clothespins, rubber bands, ballpoint pens, toothpicks, paper clips and plastic utensils - the everyday junk drawer can hold all the materials needed to create pocket-sized weaponry. Whether you're slowing dying of boredom in a stuffy office, plotting revenge on your older siblings or simply looking for a wonderful way to kill some time, this book is for you. Toy designer John Austin provides detailed, step-by-step instructions for each project, including materials and ammo lists, clear pictures, and construction tips, for mayhem-loving MacGyvers. The 35 devices include catapults, slingshots, darts, crossbows, and combustion shooters. Build a tiny trebuchet from paper clips and a D-cell battery. Wrap a penny in a string of paper caps to create a surprisingly impressive "bomb." Several of the projects even include variations where combatants mount laser pointer sights to their shooters to increase their accuracy. The instructions are simple so that anyone can make these wacky innovations in minutes whilst also learning about mechanics and physics in a fun, hands-on way.
