Michael O'Leary - Alan Ruddock 2008-03-27
Michael O'Leary is a business giant. He transformed Ryanair from a loss-making joke of an Irish carrier into one of the most valuable airlines in the world, and in the process he has revolutionized the very nature of commercial aviation. In this, the first biography of O'Leary, Alan Ruddock portrays the man in three dimensions and examines the business miracle - often talked about but poorly understood - that O'Leary has wrought. 'Ruddock's fast-paced retelling of Ryanair's rise and rise confirms O'Leary's insistence that his success has little to do with the management maxims of business gurus and everything to do with graft and ruthless attention to detail' Observer 'Probably the definitive Ryanair story ... a good read' Sunday Independent 'The fullest and most accurate picture of O'Leary to date' Irish Daily Mail 'Unlike previous books which simply chart the growth of the airline, this one is bound to get under O'Leary's skin because it reveals a great deal about his hugely driven character' Irish Independent 'Ruddock is good on the flavour of the man, a bundle of energy whose two favourite words start with an F and an S (they aren't flower and sugar)' Irish Examiner

QF32 - Richard de Crespigny 2012-08-01
QF32 is the award winning bestseller from

Richard de Crespigny, author of the forthcoming *Fly! Life Lessons from the Cockpit of QF32* On 4 November 2010, a flight from Singapore to Sydney came within a knife edge of being one of the world's worst air disasters. Shortly after leaving Changi Airport, an explosion shattered Engine 2 of Qantas flight QF32 - an Airbus A380, the largest and most advanced passenger plane ever built. Hundreds of pieces of shrapnel ripped through the wing and fuselage, creating chaos as vital flight systems and back-ups were destroyed or degraded. In other hands, the plane might have been lost with all 469 people on board, but a supremely experienced flight crew, led by Captain Richard de Crespigny, managed to land the crippled aircraft and safely disembark the passengers after hours of nerve-racking effort. Tracing Richard's life and career up until that fateful flight, QF32 shows exactly what goes into the making of a top-level airline pilot, and the extraordinary skills and training needed to keep us safe in the air. Fascinating in its detail and vividly compelling in its narrative, QF32 is the riveting, blow-by-blow story of just what happens when things go badly wrong in the air, told by the captain himself. Winner of ABIA Awards for Best General Non-fiction Book of the Year 2013 and Indie Awards' Best Non-fiction 2012 Shortlisted ABIA Awards' Book of the Year 2013
Entrepreneurs, Managers, and Leaders - A. Mayo 2016-05-23
This book reveals how leadership evolves through the story of the American airline industry across the 20th century. Entrepreneurs dominate the industry's early history, but as the

industry evolved a new breed of managers emerged who built a dominant business model that enabled their companies to grow dramatically.

The Conquest of Mexico - Hugh Thomas 2004-11
Hugh Thomas' account of the collapse of Montezuma's great Aztec empire under the onslaughts of Cort's' conquistadors is one of the great historical works of our times. A thrilling and sweeping narrative, it also bristles with moral and political issues. After setting out from Spain - against explicit instructions - in 1519, some 500 conquistadors destroyed their ships and fought their way towards the capital of the greatest empire of the New World. When they finally reached Tenochtitlan, the huge city on lake Texcoco, they were given a courtly welcome by Montezuma, who believed them to be gods. Their later abduction of the emperor, their withdrawal and the final destruction of the city make the Conquest one of the most enthralling and tragic episodes in world history.

Her Last Flight - Beatriz Williams 2020-06-30
One of Summer's Most Anticipated Reads, according to Goodreads, SheReads, and Bookish "I think Beatriz Williams is writing the best historical fiction out there. It's lush with period detail but feels immediate."—Elin Hilderbrand
The beloved author returns with a remarkable novel of both raw suspense and lyric beauty—the story of a lost pilot and a wartime photographer that will leave its mark on your soul. In 1947, photographer and war correspondent Janey Everett arrives at a remote surfing village on the Hawaiian island of Kauai to research a planned biography of forgotten aviation pioneer Sam Mallory, who joined the loyalist forces in the Spanish Civil War and never returned. Obsessed with Sam's fate, Janey has tracked down Irene Lindquist, the owner of a local island-hopping airline, whom she believes might actually be the legendary Irene Foster, Mallory's onetime student and flying partner. Foster's disappearance during a round-the-world flight in 1937 remains one of the world's greatest unsolved mysteries. At first, the flinty Mrs. Lindquist denies any connection to Foster. But Janey informs her that the wreck of Sam Mallory's airplane has recently been discovered in a Spanish desert, and piece by piece, the details of Foster's extraordinary life emerge:

from the beginnings of her flying career in Southern California, to her complicated, passionate relationship with Mallory, to the collapse of her marriage to her aggressive career manager, the publishing scion George Morrow. As Irene spins her tale to its searing conclusion, Janey's past gathers its own power. The duel between the two women takes a heartstopping turn. To whom does Mallory rightfully belong? Can we ever come to terms with the loss of those we love, and the lives we might have lived?

Tony Ryan - Richard Aldous 2014

Ronald Reagan and Margaret Thatcher - Nicholas Wapshott 2007-11-08

New details of the remarkable relationship between two leaders who teamed up to change history. It's well known that Ronald Reagan and Margaret Thatcher were close allies and kindred political spirits. During their eight overlapping years as U.S. president and UK prime minister, they stood united for free markets, low taxes, and a strong defense against communism. But just how close they really were will surprise you. Nicholas Wapshott finds that the Reagan-Thatcher relationship was much deeper than an alliance of mutual interests. Drawing on extensive interviews and hundreds of recently declassified private letters and telephone calls, he depicts a more complex, intimate, and occasionally combative relationship than has previously been revealed.

Your Precious Life - Shane Martin 2016-08-12

We all want a life worth living. The search for 'the good life' has been a driving force for humanity throughout history. But what exactly is a 'good life'? For too long psychologists have concerned themselves solely with helping the mentally unwell - those who suffer from depression, anxiety and a range of other mental health problems. However, psychologists have recently begun to focus on mental health, not

just mental ill health, on happiness as well as unhappiness. Drawing on the latest research in the area of positive psychology, and using a practical, down-to-earth style with real-life stories, Shane Martin teaches us how to bolster our mental health in order to be as happy and resilient as we can be. In *Your Precious Life*, he guides us along the path to optimal mental health and inner happiness, focusing on:

Rational thinking
Compassion
Gratitude
Savouring
Resilience
Community and belonging
Mindfulness
The importance of a healthy body - diet, exercise and sleep
Martin believes that everyone can use the tools of psychology to improve their happiness. We should not wait for a crisis before learning to address this crucial part of our well-being, but take proactive steps towards mental wellness. *Your Precious Life* will appeal to anyone who wants to ensure that the one life we have is a good one.

winning through intimidation - robert j. ringer 1974

Tony Ryan - Richard Aldous 2013-08-30
In this authorised biography of one of the most remarkable Irishmen of the twentieth century, Richard Aldous is independent in his judgements and frank in his examination of his subject's shortcomings and eccentricities. But most of all, he writes with verve and pace. Tony Ryan was born in a railwayman's cottage and rose to enormous success, overseeing the spectacular making of two business fortunes and the dramatic loss of one. After an early spell in Aer Lingus, he set up an airline leasing company, Guinness Peat Aviation (GPA), which had its headquarters in Shannon and quickly became the largest such enterprise in the world. Ryan was a hard taskmaster and the company reflected his ferocious work ethic. Yet, despite a stellar board of directors, a botched and poorly timed Initial Public Offering in the 1990s saw GPA crash and burn. Ryan lost almost everything. All that remained was a little airline running massive deficits. Ryan set about turning Ryanair around, putting in one of his assistants, Michael O'Leary, to help knock it into shape. The rest is history. Ryan remade his fortune, lived lavishly and elegantly, was a generous patron of the arts, and in every respect larger

than life. His spirit is one that Ireland needs more than ever today. As the nation strives for its own recovery, it can find inspiration in the story of how one of its most famous sons rose and fell, and then rose again. Not one to stand still or lament mistakes, Tony Ryan's determination never to give up is the real lesson of this story. He was in so many ways Ireland's Aviator.

Psychiatrist in the Chair - Brendan Kelly
2020-10-22

Born in Dublin in 1942, Anthony Clare was the best-known psychiatrist of his generation. His BBC Radio 4 show, *In the Psychiatrist's Chair*, which ran from 1982 to 2001, brought him international fame and changed the nature of broadcast interviews forever. Famous interviewees included Stephen Fry, Anthony Hopkins, Spike Milligan, Maya Angelou and Jimmy Savile, each of whom yielded to Clare's inimitable gentle yet probing style. Clare made unique contributions to the demystification and practice of psychiatry, most notably through his classic book *Psychiatry in Dissent: Controversial Issues in Thought and Practice* (1976). This book, the first, official biography of this much-loved figure, examines the man behind these achievements: the debater and the doctor, the writer and the broadcaster, the public figure and the family man. Using extensive public and family records, we ask: Who was Anthony Clare, really? Were there just one Anthony Clare, or many? What drove him? And what is to be learned from his life, his career, and his unique, sometimes controversial legacy to our understanding of the mind? This is the remarkable story of a remarkable person.

How to Change Your Mind - Michael Pollan
2018-05-15

"Pollan keeps you turning the pages . . . cleareyed and assured." —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have

surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's "mental travelogue" is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

The Shape Of Things To Come - H.G. Wells
2017-06-08

When Dr Philip Raven, a diplomat working for the League of Nations, dies in the 1930s, he leaves behind a book of dreams outlining the visions he has been experiencing for many years. These visions seem to be glimpses into the future, detailing events that will occur on Earth for the next two hundred years. This fictional 'history of the future' proved prescient in many ways, as Wells predicted events such as the Second World War, the rise of chemical warfare, climate change and the growing instability of the Middle East.

Michael O'Leary - Matt Cooper 2018-09-27

Outliers - Malcolm Gladwell 2008-11-18
From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to

professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

The first major biography of preeminent historian and intellectual Arthur Schlesinger Jr., a defining figure in Kennedy's White House. Arthur M. Schlesinger Jr. (1917-2007), known today as the architect of John F. Kennedy's presidential legacy, blazed an extraordinary path from Harvard University to wartime London to the West Wing. The son of a pioneering historian—and a two-time Pulitzer Prize and National Book Award winner in his own right—Schlesinger redefined the art of presidential biography. A Thousand Days, his best-selling and immensely influential record of the Kennedy administration, cemented Schlesinger's place as one of the nation's greatest political image makers and a key figure of the American intellectual elite—a peer and contemporary of Reinhold Niebuhr, Isaiah Berlin, and Adlai Stevenson. The first major biography of this defining figure in Kennedy's Camelot, *Schlesinger: The Imperial Historian* presents a dramatic life and career set against the backdrop of the American Century. Biographer Richard Aldous draws on oral history, rarely seen archival documents, and the official Schlesinger papers to craft a portrait of the incandescently brilliant and controversial historian who framed America's ascent to global empire.

Mellon - David Cannadine 2021-06-02

A landmark work from one of the preeminent historians of our time: the first published biography of Andrew W. Mellon, the American colossus who bestrode the worlds of industry, government, and philanthropy, leaving his transformative stamp on each. Andrew Mellon, one of America's greatest financiers, built a legendary personal fortune from banking to oil to aluminum manufacture, tracking America's course to global economic supremacy. As treasury secretary under Presidents Harding, Coolidge, and finally Hoover, Mellon made the federal government run like a business—prefiguring the public official as CEO. He would be hailed as the architect of the Roaring Twenties, but, staying too long, would be blamed for the Great Depression, eventually to find himself a broken idol. Collecting art was his only nonprofessional gratification and his great gift to the American people, The National Gallery of Art, remains his most tangible legacy.

The Maximalist - Matt Cooper 2015-09-11

'I am a maximalist ... I want more of everything.' Tony O'Reilly strode into the twenty-first century an Irishman apart. Strikingly good-looking, athletically gifted, irresistibly charismatic and phenomenally wealthy, he had everything any man could want. For many, he was a hero, the living embodiment of Irish potential; for others, he was an arrogant and overbearing presence at the heart of power. Without doubt, he was the most powerful unelected Irishman of the past 50

years. His philosophy was simple: 'I am a maximalist ... I want more of everything.' But it was never enough. And today, O'Reilly's empire and the formidable reputation it established lie in tatters. In this landmark biography, Matt Cooper draws on an abundance of new material, including interviews with many of O'Reilly's closest family, friends, associates and rivals, to uncover the man behind the myth. An Irish epic, it documents in unflinching detail and with great subtlety the meteoric rise and slow unravelling of an Irish icon.

[More Money Than God](#) - Sebastian Mallaby
2011-05-03

Wealthy, powerful, and potentially dangerous, hedge-fund managers have emerged as the stars of twenty-first century capitalism. Based on unprecedented access to the industry, *More Money Than God* provides the first authoritative history of hedge funds. This is the inside story of their origins in the 1960s and 1970s, their explosive battles with central banks in the 1980s and 1990s, and finally their role in the financial crisis of 2007-9. Hedge funds reward risk takers, so they tend to attract larger-than-life personalities. Jim Simons began life as a code-breaker and mathematician, co-authoring a paper on theoretical geometry that led to breakthroughs in string theory. Ken Griffin started out trading convertible bonds from his Harvard dorm room. Paul Tudor Jones happily declared that a 1929-style crash would be 'total rock-and-roll' for him. Michael Steinhardt was capable of reducing underlings to sobs. 'All I want to do is kill myself,' one said. 'Can I watch?' Steinhardt responded. A saga of riches and rich egos, this is also a history of discovery. Drawing on insights from mathematics, economics and psychology to crack the mysteries of the market, hedge funds have transformed the world, spawning new markets in exotic financial instruments and rewriting the rules of capitalism. And while major banks, brokers, home lenders, insurers and money market funds failed or were bailed out during the crisis of 2007-9, the hedge-fund industry survived the test, proving that money can be successfully managed without taxpayer safety nets. Anybody pondering fixes to the financial system could usefully start here: the future of finance lies in the history of hedge funds.

[The Wild Blue](#) - Stephen E. Ambrose 2001-08-14
Stephen E. Ambrose, acclaimed author of *Band of Brothers* and *Undaunted Courage*, carries us along in the crowded and dangerous B-24s as their crews fought to destroy the German war machine during World War II. The young men who flew the B-24s over Germany in World War II fought against horrific odds, and, in *The Wild Blue*, Ambrose recounts their extraordinary heroism, skill, daring, and comradeship with vivid detail and affection. Ambrose describes how the Army Air Forces recruited, trained, and selected the elite few who would undertake the most demanding and dangerous jobs in the war. These are the boys—turned pilots, bombardiers, navigators, and gunners of the B-24s—who suffered over fifty percent casualties. With his remarkable gift for bringing alive the action and tension of combat, Ambrose carries us along in the crowded, uncomfortable, and dangerous B-24s as their crews fought to the death through thick black smoke and deadly flak to reach their targets and destroy the German war machine. Twenty-two-year-old George McGovern, who was to become a United States senator and a presidential candidate, flew thirty-five combat missions (all the Army would allow) and won the Distinguished Flying Cross. We meet him and his mates, his co-pilot killed in action, and crews of other planes. Many went down in flames. As *Band of Brothers* and *Citizen Soldiers* portrayed the bravery and ultimate victory of the American soldiers from Normandy on to Germany, *The Wild Blue* illustrates the enormous contribution that these young men of the Army Air Forces made to the Allied victory.

American Women and Flight - Deborah G.

Women run wind tunnel experiments, direct air
